What Does China Think:

What Does China Think? Mark Leonard, 2008-04-29 We know everything and nothing about China We know that China is changing so fast that the maps in Shanghai need to be redrawn every two weeks We know that China has brought 300 million people from agricultural backwardness into modernity in just thirty years and that its impact on the global economy is growing at unprecedented speed We have an image of China as a dictatorship a nationalist empire that threatens its neighbors and global peace But how many people know about the debates raging within China What do we really know about the kind of society China wants to become What ideas are motivating its citizens We can name America's neo-cons and the religious right but cannot name Chinese writers thinkers or journalists what is the future they dream of for their country or for the world Because China's rise like the fall of Rome or the British Raj will echo down generations to come these are the questions we increasingly need to ask Mark Leonard asks us to forget everything we thought we knew about China and start again He introduces us to the thinkers who are shaping China's wide open future and opens up a hidden world of intellectual debate that is driving a new Chinese revolution and changing the face of the world *The Rise of Think Tanks in China* Xufeng Zhu, 2013 Despite continuing criticism of the Chinese authoritarian political system the range of participants in the decision making process has widened with different social actors now playing an increasingly important role in the Chinese policymaking process Accordingly the role of think tanks in the policymaking process has generated great interest within and outside China This book explores the behaviour and influence of China's think tanks and explains the reasons and social consequences of the rise of think tanks in China The book raises several questions on the topic How did think tanks emerge in China What are the essential factors that determine think tanks in terms of building their governmental and personal networks How do think tanks work and build their influence in the Chinese policy process What happens to Chinese society when think tanks become important policy participants in the policy process The book goes on to discuss new perspectives on policy processes and elite politics in China and empirically with comparative case study and data from nationwide questionnaire surveys provides a comprehensive picture of think tanks in the current political system of the country

Political Thought and China's Transformation H. Li, 2015-04-07 Since the late 1970s China has undergone a great transformation during which time the country has witnessed an outpouring of competing schools of thought This book analyzes the major schools of political thought redefining China's transformation and the role Chinese thinkers are playing in the post Mao era *Asian Thought on China's Changing International Relations* Emilian Kavalski, 2014-08-05 At the end of the Cold War commentators were pondering how far Western ideas would spread today the debate seems to be how far Chinese ideas will reach This volume examines Chinese international relations thought and practices identifying the extent to which China's rise has provoked fresh geo strategic and intellectual shifts within Asia *The Pulse of China's Grand Strategy* Jean Kachiga, 2022-07-08 This book identifies and assesses the grand strategy of Chinese foreign policy following a

flurry of diplomatic and investment activities in recent years Through its adept application of the concept of grand strategy it examines a series of questions concerning China s objectives targets theaters operations coordination and purpose teleology By answering these questions the book uncovers the deeper motivations behind China s diplomatic policy revealing the pulse of China s grand strategy and its implications more broadly to the structure of the international system Additionally it offers an evaluation of the external influence exerted by the United States as the incumbent hegemonic power presenting both the probable policy attitudes of the United States and China s possible reactions and responses Through these discussions and evaluations it ultimately reveals that China s motivations are deeply rooted both in its political past and in the interests of its ruling communist party whose determination is the main source of China s current and future successes in ascending past any other nation Offering an in depth exploration of China s grand strategy this book will be of great value to students and scholars of Chinese politics international relations and diplomacy

Is China Playing by the Rules? United States. Congressional-Executive Commission on China,2003

Hu Jintao: China's Silent Ruler Kerry Brown,2012-03-26 Over the six month period from late 2012 to early 2013 Hu Jintao the President of the People s Republic of China Chair of the Central Military Commission and Party Secretary of the Chinese Communist Party CCP will relinquish at least two of his three positions According to the constitution of the CCP his time as Party head will come to an end given that he has already served for two terms Well over the supposed retirement age of 68 he will have to hand over the leadership of China to a new generation of leaders at the 18th Party Congress in Beijing In Chinese politics the act of retirement is surprisingly difficult but Hu Jintao is widely known for his reserve and reticence there is little doubt that he could disappear into a quiet and anonymous retirement if he so desires This timely volume thus aims to provide an analytical assessment of Hu s period in charge of the world s most populous country It concentrates briefly on his early life and entry into politics then considers and evaluates his stewardship of the economy and of international affairs as well as his ideological contribution and leadership of the communist party In the process the reader will also be afforded a broad overview of China s rapid developments over the last decade since 2002

China United States. Congress. House. Committee on Armed Services,2008 **Shortening the Distance between Government and Public in China II** Liu Xiaoyan,2020-12-15 Distance in its traditional sense connotes estrangement and division But in the context of modern political studies it means a controllable resource which can be manipulated to change the relationship between the government and the public Drawing on this concept from western political science the author explores the law and mechanisms of China s political communication In this volume the author introduces the empirical investigation of the distance between government and the public in China First it discusses how the use of online social media such as Weibo can be used strategically to mediate the distance of offline communication Then it points out that social media can also lead to unlimited expression of general will to which governments should pay attention An empirical study on how rural residents of five provinces in China obtain political information is used to illustrate the point Students and scholars who are interested in political science and political communication especially Chinese politics would find this title a useful reference The World in 2020 According to China SHAO Binhong,2014-06-26 Where do we see China s changes What are the guiding principles behind these changes Are China s diplomatic policies and international strategies more reflective of its own national conditions or international trends How will China balance its ideology with national interests How does China see the current international order and its new position within the existing order Besides answering these basic questions this volume considers two other important issues First the future of China after its era of continuous high speed growth and second the all important question in China s foreign affairs the future of Sino US relations 2013 was China s first year under new leadership and there is a consensus amongst researchers of China s international affairs that the diplomatic practices China undertook to a great extent demonstrated new characteristics perspectives and requirements of the new leadership

Ancient Chinese Thought, Modern Chinese Power Yan Xuetong,2013-08-25 From China s most influential foreign policy thinker a vision for a Beijing Consensus for international relations The rise of China could be the most important political development of the twenty first century What will China look like in the future What should it look like And what will China s rise mean for the rest of world This book written by China s most influential foreign policy thinker sets out a vision for the coming decades from China s point of view In the West Yan Xuetong is often regarded as a hawkish policy advisor and enemy of liberal internationalists But a very different picture emerges from this book as Yan examines the lessons of ancient Chinese political thought for the future of China and the development of a Beijing consensus in international relations Yan it becomes clear is neither a communist who believes that economic might is the key to national power nor a neoconservative

who believes that China should rely on military might to get its way Rather Yan argues political leadership is the key to national power and morality is an essential part of political leadership Economic and military might are important components of national power but they are secondary to political leaders who act in accordance with moral norms and the same holds true in determining the hierarchy of the global order Providing new insights into the thinking of one of China's leading foreign policy figures this book will be essential reading for anyone interested in China's rise or in international relations

Deepening the EU-China Partnership Mario Telò,Ding Chun,Zhang Xiaotong,2017-11-14 The China EC EU relationship started in 1975 is a highly institutionalized multidimensional and complex but to some extent controversial international partnership It is also challenged within the current unstable world This book addresses the convergences and the differences ideational political institutional and interests related between China and the EU by a collective interaction between Chinese and European scholars Among other things the book assesses sectoral bilateral dialogue and focuses on the interplay between internal complexity and external policies discusses ideational divergences in international law and rule of law and in many relevant policy fields Furthermore it compares sustainable growth policies explores trade and investment controversies and negotiations human rights dialogue and addresses environment and climate change policies This text will be of key interest to EU studies and politics China studies and more broadly to area Asian studies and international relations global governance

China's Belt And Road Initiative And Building The Community Of Common Destiny Linggui Wang,Jianglin Zhao,2019-05-09 China's Belt and Road Initiative BRI has attracted growing attention from around the world since it was first announced It is along with the Asian Infrastructure Investment Bank AIIB a critical instrument for realizing what the Chinese government calls the Community of Common Destiny CCD The core idea presented in this volume is that the CCD represents a new paradigm for promoting regional collaboration in socio economic development and plays a crucial role in reshaping the international geopolitical landscape Contributors show that the belief in common development and common security transcends differences in cultural tradition and pre existing level of development This belief underlies the commitments among countries and regions participating in the BRI to working closely together in pursuit of shared and sustained prosperity The chapters are based on papers presented at Building the Community of Common Destiny between China and Its Neighbors Challenges and the Future an international forum co organized by the National Institute for Global Strategy of the Chinese Academy of Social Sciences and the University of International Relations China Thirty experts from more than twenty countries have contributed to this volume

Inertia of History Yan Xuetong,2019-07-18 This book predicts possible international changes that may occur between 2013 and 2023 It forecasts that China will become a global superpower no later than 2023 and that a bipolar world will be formed with a strategic rivalry between China and the US China may also further reduce the disparity in capability with the US while other major powers will witness an enlarged

capability gap with both China and the US Therefore this bipolarization will drive the world center to shift from Europe to East Asia In East Asia Japan will become a lesser state North Korea will keep its nuclear arsenal but stop nuclear tests and the maritime disputes in South China Sea will no longer be the major problem to ASEAN countries by 2023 In Europe Germany will dominate the EU while it is decentralized the UK will withdraw from the EU and Russia will deteriorate dramatically under Putin's rule Globalization will also worsen polarization at both domestic and international levels and India will lag behind China even further the Middle East will suffer from the rivalry among regional powers and Africa will be further marginalized

Do We Really Know China? Iris Efthymiou-Egleton, 2016-06-23 Different cultures and civilizations have different perceptions of a history context and ideas The Greek philosophers Socrates Plato Demosthenes Aristotle etc shaped Western thought Western logic and built our thought systems Nowadays we need historical pluralism and to form a cohesive whole especially in an increasingly multipolar world It is said that Western people from a European philosophical perspective are only capable of addressing alternate philosophies using our own mindset China historically saw its civilization as self-evident universal and did not feel the need to justify this in European terms Despite the difficulties in comparing different cultures and civilizations this text summarizes the influence between China and the West Chinas soft power as well as the current situation of China and its way up the global ladder of power The concept of Chineseness and the identity with the Sinosphere a brief presentation of Chinas history geopolitical influences and industrial aspects the foundation of Chinese thought language and writing system as well as technological achievements traditional medicine arts and cuisine are only some of the topics covered in the next pages In addition more subjects are analyzed that provide an overview of the current global position of China the countrys efforts for reform and global influence as well as its future potentials These subjects dont fall far from discussing various economic and industrial facts like the integration of Chinese and European renewable energy markets the made in China phenomenon foreign policy and the countrys position as a rising aid donor After reading this book it should become obvious that China sees herself as Chung Kuo that means the Middle Kingdom the centre of the universe and the worlds oldest culture and society So one could say that this is what they are trying to do so they can make their country again the centre of todays world But during their rise which they characterize as peaceful they need to maintain global balance and escape from potential unpleasant events for example one could think of an analogy of US China relations and the Thucydides trap Its seems so far that all the odds are with them their soft power in combination with political strategies their ability to evolve and follow global trends in addition with a huge internal market brought China to its position today But will China hold this place Will the country rise to worlds number one and in Chinas way to global dominance are we expected to see any more reforms It seems that all these are in the hands of the Chinese

When China Rules the World Martin Jacques, 2009-11-12 Greatly revised and expanded with a new afterword this update to Martin Jacques's global bestseller is an essential guide to understanding a world increasingly shaped by Chinese power Soon China

will rule the world But in doing so it will not become more Western Since the first publication of *When China Rules the World* the landscape of world power has shifted dramatically In the three years since the first edition was published *When China Rules the World* has proved to be a remarkably prescient book transforming the nature of the debate on China Now in this greatly expanded and fully updated edition boasting nearly 300 pages of new material and backed up by the latest statistical data Martin Jacques renews his assault on conventional thinking about China's ascendancy showing how its impact will be as much political and cultural as economic changing the world as we know it First published in 2009 to widespread critical acclaim and controversy *When China Rules the World: The End of the Western World and the Birth of a New Global Order* has sold a quarter of a million copies been translated into eleven languages nominated for two major literary awards and is the subject of an immensely popular TED talk

Power Of Ideas, The: The Rising Influence Of Thinkers And Think Tanks In China Cheng Li, 2017-03-14 China's momentous socioeconomic transformation is not taking place in an intellectual vacuum Chinese scholars and public intellectuals are actively engaged in fervent discussions about the country's domestic and foreign policies demographic constraints and ever growing integration into the world community This book focuses on China's major think tanks where policies are initiated and on a few prominent thinkers who influence the way in which elites and the general public understand and deal with the various issues confronting the country The book examines a number of factors contributing to the rapid rise of Chinese think tanks in the reform era These include the leadership's call for scientific decision making the need for specialized expertise in economics and finance as China becomes an economic powerhouse the demand for opinion leaders in the wake of a telecommunication revolution driven by social media the accumulation of human and financial capital and the increasing utility of the revolving door nature of think tanks It has been widely noted that think tanks and policy advisors have played an important role in influencing the strategic thinking of the top leadership including the formation of ideas such as the Three Represents China's peaceful rise One Belt One Road and the founding of the Asian Infrastructure Investment Bank AIIB In 2014 President Xi Jinping made think tank development a national strategy and he claimed that building a new type of think tank with Chinese characteristics is an important and pressing mission Though the media outside China has often reported on this important development it has all but escaped rigorous scholarly scrutiny This book will categorize Chinese think tanks by their various forms such as government agencies university based think tanks private think tanks business research centers or consultancies and civil society groups It will not only analyze the problems and challenges in China's think tank development but also reveal the power of ideas
