What Environmental History:

What is Environmental History? J. Donald Hughes, 2015-11-30 What is environmental history It is a kind of history that seeks understanding of human beings as they have lived worked and thought in relationship to the rest of nature through the changes brought by time In this new edition of his seminal student textbook J Donald Hughes provides a masterful overview of the thinkers topics and perspectives that have come to constitute the exciting discipline that is environmental history He does so on a global scale drawing together disparate trends from a rich variety of countries into a unified whole illuminating trends and key themes in the process Those already familiar with the discipline will find themselves invited to think about the subject in a new way This new edition has been updated to reflect recent developments trends and new work in environmental history as well as a brand new note on its possible future Students and scholars new to environmental history will find the book both an indispensable guide and a rich source of inspiration for future work *An Environmental History of the World* J. Donald Hughes, 2002-09-26 *An Environmental History of the World* is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history *An Environmental History of the Early Modern Period* Martin Knoll, Reinhold Reith, 2014 The environmental history of early modern times is a seminal and lively field of historical research This volume offers ten concise essays that provide an overview of current research debates on a broad span of topics such as historical climatology and climate reconstruction coping with disaster land use and agricultural knowledge forest history urbanization the perceptions of alpine nature and societal dealings with water and rivers Taken together the contributions establish early modern studies as a promising laboratory for new avenues in environmental history Series Austria Research and Science History Austria Forschung und Wissenschaft Geschichte Vol 10 Subject History Environmental Studies *A Field on Fire* Mark D. Hersey, Ted Steinberg, 2019-01-29 A frank and engaging exploration of the burgeoning academic field of environmental history Inspired by the pioneering work of preeminent environmental historian Donald Worster the contributors to *A Field on Fire The Future of Environmental History* reflect on the past and future of this discipline Featuring wide ranging essays by leading environmental historians from the United States Europe and China the collection challenges scholars to rethink some of their orthodoxies inviting them to approach familiar stories from new angles to integrate new methodologies and to think creatively about the questions this field is well positioned to answer Worster's groundbreaking research serves as the organizational framework for the collection Editors Mark D Hersey and Ted Steinberg have arranged the book into three

sections corresponding to the primary concerns of Worster's influential scholarship: the problem of natural limits, the transnational nature of environmental issues, and the question of method. Under the heading *Facing Limits*, five essays explore the inherent tensions between democracy, technology, capitalism, and the environment. The *Crossing Borders* section underscores the ways in which environmental history moves easily across national and disciplinary boundaries. Finally, *Doing Environmental History* invokes Worster's work as an essayist by offering self-conscious reflections about the practice and purpose of environmental history. The essays aim to provoke a discussion on the future of the field, pointing to untapped and underdeveloped avenues ripe for further exploration. A forward thinker like Worster presents bold challenges to a new generation of environmental historians on everything from capitalism and the Anthropocene to war and wilderness. This engaging volume includes a very special afterword by one of Worster's oldest friends, the eminent intellectual historian Daniel Rodgers, who has known Worster for close to fifty years.

[What is Environmental History?](#) Johnson, Donald Hughes, 2006-12-08. What is environmental history? It is a kind of history that seeks understanding of human beings as they have lived, worked, and thought in relationship to the rest of nature through the changes brought by time. In this seminal student textbook, J. Donald Hughes provides a masterful overview of the thinkers, topics, and perspectives that have come to constitute the exciting discipline that is environmental history. He does so on a global scale, drawing together disparate trends from a rich variety of countries into a unified whole, illuminating trends and key themes in the process. Those already familiar with the discipline will find themselves invited to think about the subject in a new way. Students and scholars new to environmental history will find the book both an indispensable guide and a rich source of inspiration for future work.

Out of the Woods Char Miller, Hal Rothman, 1997. This Land, This South Albert E. Cowdrey, 2021-12-14 Here is the story of the long interaction between humans land and climate in the American South It is a tale of exploitation and erosion of destruction disease and defeat but also of the persistent search for knowledge and wisdom It is a story whose villains were also its victims and sometimes its heroes Ancient forces created the southern landscape but as Albert E Cowdrey shows humankind from the time of earliest habitation has been at work reshaping it The southern Indians far from being the natural ecologists of myth radically transformed their environment by hunting and burning Such patterns were greatly accelerated by the arrival of Europeans who viewed the land as a commodity to be exploited for immediate economic benefit Cowdrey documents not only the long decline but the painfully slow struggle to repair the damage of human folly The eighteenth century saw widespread though ineffectual efforts to protect game and conserve the soil In the nineteenth century the first hesitant steps were taken toward scientific flood control forestry wildlife protection and improved medicine In this century the New Deal the explosion in scientific knowledge and the national environmental movement have spurred more rapid improvements But the efforts to harness the South's great rivers to save its wild species and to avert serious environmental pollution have often had equivocal results Originally published in 1983 and needed now more than ever *This Land This South* was the first book to explore the cumulative impact of humans on the southern landscape and its effect on them In graceful and at times lyrical prose Albert Cowdrey brings together a vast array of information Now revised and updated this important book should be read by every person concerned with the past present or future of the South

Ecology and Empire Tom Griffiths, Libby Robin, 1997 *Ecology and Empire* forged a historical partnership of great power and one which particularly in the last 500 years radically changed human and natural history across the globe This book scrutinizes European expansion from the perspectives of the so called colonized peripheries the settler societies It begins with Australia as a prism through which to consider the relations between settlers and their lands but moves well beyond this to a range of lands of empire It uses their distinctive ecologies and histories to shed new light on both the imperial and the settler environmental experience *Ecology and Empire* also explores the way in which the science of ecology itself was an artifact of empire drawing together the fields of imperial history and the history of science
