Touching (Learn About: The Five Senses) Sonia W. Black, 2023-09-05 How do we experience the world Let s learn all about the five senses The sense of touch is one of our five senses And it is amazing Every day it starts working the very same moment we wake It tells us that our pillow feels soft the floor is hard the shower is hot and the juice is cold Touch also tells us that tickling feels good and bumping into something feels bad Learn about feeling how it works and common problems and diseases connected with it with this perfect first introduction to the sense of touch ABOUT THE SERIES The human body is amazing It gives us five different ways to learn about the world around us through the eyes through the skin through the tongue through the ears and through the nose Thanks to these parts of our bodies we can see feel taste hear and smell These are the five senses Why do bananas taste so good Why does tickling cause so much laughter Illustrated with familiar examples this fun nonfiction set in the Learn About series gives readers a close up look at the five senses and it teaches them how each of the senses work

The Switch Image Lorenz Engell, 2021-04-22 Television is the most powerful system of images in the late 20th and early 21st centuries Nonetheless TV has attained only little philosophical attention so far especially compared to other visual media such as film This book looks at TV as what happens on the screen and beyond it which is mainly the operation of switching images It therefore proposes a new definition of TV as the first picture that can be switched on off and over which stresses that TV is more tactile than visual Through the operation of switching TV figures the world from within and as the course of its figuration This is grasped here by the term of ontography Through the ongoing interlacing and bridging of TV 1 0 the image is being switched and TV 2 0 the image is a switch TV exponentially increases the production and circulation of images It transforms the world and itself from an analogue state to a digital one and from central perspectivism to pluri perspective In terms of time through switching and the switch it develops and reworks new temporal orderings such as instantaneity synchronicity flow and seriality TV makes its own history In space it creates a mediasphere as its habitat and hence new forms of being in the world of proximity and distance and scale Anthropologically it works on what a subject and an object is on what makes the human being and ontographically how it is possible that there is something at all instead of nothing through switch images

The Cinema of Sensations Ágnes Pethő, 2015-01-12 Following a previous international conference at the Sapientia Hungarian University of Transylvania in Cluj Napoca Romania and the subsequent publication of a volume of studies with the title Film in the Post Media Age Cambridge Scholars Publishing 2012 which insisted citing the words of Jacques Rancière that the ecosystem of contemporary moving images should be understood not as a unified digital environment but as a highly diversified multisensory milieu another conference was organised focusing this time directly on the multisensory nature of moving images Pairing the keywords cinema and sensation an invitation was extended for presentations offering a closer examination of the sensual aspects of moving images in order to identify and map out at least some of the possible new directions perceived as taking shape as sensuous film

studies The questions contributors addressed included What kind of paradigms authors and styles can be identified in the practice of a cinema exploring the palpable presence of bodies in film history How can sensory audiovisual perception and cognitive knowledge be connected when watching moving images What does the experience of so called haptic images entail in film and video art How does an emphasis on sensations and the body relate to representations of social issues and cultural difference How are representations of other arts in films or the filmic image appearing as a painterly tableau perceived How can new images incorporate a sensation of old images What is the difference between haptic images and hyper cinema in the form of 3D movies How can the new naturalistic trends in contemporary cinema be interpreted What kind of sensual forms are devised for what is unrepresentable or impalpable The conference took place between the 25th and 27th of May 2012 with the title The Cinema of Sensations and attracted researchers from all over the world for what turned out to be three days of presentations on extremely varied subjects and lively discussions conducted in a memorably cheerful atmosphere The present volume is the palpable outcome of these debates and publishes a selection of articles that have been written for or after this conference

Temporality and Film Analysis Matilda Mroz, 2012-08-06 Matilda Mroz argues that cinema provides an ideal opportunity to engage with ideas of temporal flow and change Temporality however remains an underexplored area of film analysis which frequently discusses images as though they were still rather than moving This book traces the operation of duration in cinema and argues that temporality should be a central concern of film scholarship In close readings of Michelangelo Antonioni's *L'Avventura* Andrei Tarkovsky's *Mirror* and the ten short films that make up Krzysztof Kieślowski's *Decalogue* series Mroz highlights how film analysis must consider both particular moments in cinema which are critically significant and the way in which such moments interrelate in temporal flux She explores the concepts of duration and rhythm resonance and uncertainty affect sense and texture to bring a fresh perspective to film analysis and criticism Essential reading for students and scholars in Film Studies this engaging study will also be a valuable resource for critical theorists
