Who Designed The Designer A Rediscovered Path To Gods Existence:

Who Designed the Designer? Michael Augros, 2015-04-01 The New Atheists are pulling no punches If the world of nature needs a designer they ask then why wouldn't the designer itself need a designer too Or if it can exist without any designer behind it then why can't we just say the same for the universe and wash our hands of a designer altogether Interweaving its pursuit of the First Cause with personal stories and humor this ground breaking book takes a fresh approach to ultimate questions While attentive to empirical science it builds its case not on authoritative pronouncements of experts that readers must take on faith but instead on a nuanced understanding of universal principles implicit in everyone's experience Here is essential reading for all people who care about contemplating God not exclusively as a best explanation for the findings of science but also as the surprising yet inevitable implication of our commonsense contact with reality Augros harnesses such intellects as Plato Aristotle and Aquinas ushering into the light a wealth of powerful inferences that have hitherto received little or no public exposure The result is an easygoing yet extraordinary journey beginning from the world as we all encounter it and ending in the divine mind

Saint John Henry Newman Robert C. Christie, 2020-01-17 This volume of essays sponsored by the Newman Association of America serves to identify preserve and promote the legacy of John Henry Newman It argues that eleven major elements of Newman's life and work speak to us today and in fact are very important resources for believers in their confrontation with the challenges of an increasingly secular world They also resonate loudly to a church in crisis both internally and externally in its confrontation with that world Ten authors included among them some of the world's most noted Newman scholars as well as several emerging ones address various aspects of Newman's legacy on a host of subjects These include the nature and challenges of faith both for believers and contemporary nones with no religious affiliations and

analysis of what and how we know things particularly bearing on religious matters the experience of conversions the place and meaning of relationships in our search for God especially those of family home and friendships the indispensable role of the church in our drive for holiness the nature and importance of education and its personal dimension and the correct application of history in studying and learning from Newman's legacy Those who have questions and who think about these subjects academics and non academics alike will find much to ponder in these essays

The Debaters of This Age Steven H Propp, 2019-02-05 It is June 2018 as an unusual group of scholars professors lecturers and students gather in a California hotel They are all attendees of an Apologetics conference intended to join qualified representatives of Christian Deist and Atheist thought for a two week no holds barred debate and discussion of their respective positions that will ultimately be included in a book published after the conference Evangelical Christianity is represented by advocates of Evidentialist and Presuppositionalist approaches to Apologetics Catholicism liberal Christianity and Deism are also well supported The Atheist perspective is advocated by a polemical author and a college professor notorious for attacking the views of his Christian students As the participants argue over controversial issues such as cosmology evolution The Bible historical evidence for Jesus the resurrection biblical prophecies and the problem of evil intellectual fireworks result But what will result when such a volatile and eclectic group is placed face to face for more than two weeks The Debaters of this Age is the tale of what happens inside a California hotel in 2018 when a group of intellectuals gather to vigorously discuss the religious issues of our time

The Immortal in You Michael Augros, 2017-07-20 Many scientists and philosophers believe that you are no more than a machine By their account there is no afterlife and you are no better than any other kind of animal The existence of mankind according to such thinkers is purely the outcome of chance events There never was any tendency natural or supernatural to produce life and the human mind The universe is hostile or indifferent toward you and you occupy no special place within it At the heart of this story of mankind lies not science but a rarely expressed philosophical assumption that modern science at least in principle tells all there is to know about you and the world With his unique blend of cogency clarity and charm philosopher Michael Augros hauls that assumption out into the light and demolishes it The Immortal in You demonstrates how an astute use of common sense and a study of common human experience reveal that there is more to you much more than science could possibly say From the author of Who Designed the Designer this modern response to the ancient exhortation Know thyself delivers a wealth of fresh powerful and uplifting ideas about what it is to be human which will engage thoughtful readers regardless of their beliefs

Cosmological Fine-Tuning Arguments Jason Waller, 2019-09-05 If the physical constants initial conditions or laws of nature in our universe had been even slightly different then the evolution of life would have been impossible This observation has led many philosophers and scientists to ask the natural next question why is our universe so fine tuned for life The debates around this question are wide ranging multi disciplinary complicated technical and at times heated This study is a comprehensive investigation of these debates and

the many metaphysical and epistemological questions raised by cosmological fine tuning Waller's study reaches two significant and controversial conclusions First he concludes that the criticisms directed at the multiverse hypothesis by theists and at the theistic hypothesis by naturalists are largely unsuccessful Neither of these options can plausibly be excluded Choosing between them seems to turn on primitive and so hard to justify metaphysical intuitions Second in order to break the philosophical deadlock Waller moves the debate from the level of universes to the level of possible worlds Arguing that possible worlds are also fine tuned in an important and interesting sense Waller concludes that the only plausible explanation for the fine tuning of the actual world is to posit the existence of some kind of God like thing

How Science Points to God Gerard Verschuuren, 2020-07-16 This book scans science and its findings for pointers to God More than any other book on this issue it scans a wide range of scientific fields astronomy physics genetics biology neuroscience behavioral science and semantics

In the Beginning Gerard Verschuuren, 2019-07-08 In this work of basic science written for nonspecialists scientist Gerard Verschuuren shows how the latest findings of modern cosmology physics chemistry geology and other sciences prove that Earth was created to be our home

From the Dust of the Earth Matthew J. Ramage, 2022-05-06 In this book the author's fourth dedicated to applying Joseph Ratzinger Benedict XVI's wisdom to pressing theological difficulties Matthew Ramage attempts to square advances in the field of evolutionary biology with the Bible as interpreted through the teaching of the Catholic Church Distinguishing between evolutionary theory properly speaking and materialist philosophy Ramage's work both addresses the challenge of evolutionary science to Catholic teaching on human origins and argues that discoveries in evolutionary biology yield precious insight into the mystery of God's saving plan in Christ applying Ratzinger's principles to such issues as the meaning of man's special creation the relationship between sin and death and the implications of evolution for eschatology

The Comprehensive Guide to Science and Faith William A. Dembski, Casey Luskin, Joseph M. Galileo Revisited Paschal Scotti, 2017-09-01 No other work on Galileo Galilei has brought together such a complete description of the historical context in its political cultural philosophical religious scientific and

personal aspects as this volume has done In addition to covering the whole of Galileo's life it focuses on those things that are most pertinent to the Galileo Affair which culminated in his condemnation by the Inquisition in 1633 It also includes an extensive discussion of the relationship between religion and science in general and of the relationship between Christianity and science in particular without which a true understanding of the affair is much weakened This discussion of the relationship of Christianity with science a long generally positive relationship is most timely since the case of Galileo is as many historians and Pope Benedict XVI have stated the beginning of the alienation of the Church from much of the intellectual culture of our present age The warfare between science and religion is an old myth that should finally be retired but for many it is still axiomatic This work shows the significance of astrology in the history of society and the Church Galileo was a master astrologer and the importance of the internal tensions and factions within the Roman Curia in the seventeenth century It also tells of the profound battles among Church leadership over the direction of the Church in a time of uncertainty and intellectual and cultural ferment The Galileo Affair is not just of its time and place and it is not just about Galileo but it touches upon that perennial issue of how the Church deals with issues of adaptation and change **By Strange Ways**

Jonathan Fuqua, Daniel Strudwick, 2022-10-24 The only work that exclusively features the conversion stories of theologians this book provides a unique vantage point on the intellectual challenges faced by those being drawn to the Catholic Church The men and women featured here come from a variety of backgrounds Agnosticism Secularism New Age thought punk rock and various stripes of Christianity Their theological vocation had specially prompted them to question their own intellectual presuppositions once they encountered Catholicism which only gained in credibility the more they studied it Although it was the theological truth of the Catholic faith that initially captured the attention of these theologians each of these essays tells a fully human story They are not collections of arguments but stories of grace Among the ten converts are Scott Hahn Lawrence Feingold Melanie Barrett Petroc Willey and Jeff Morrow Each story offers a fresh glimpse at God's work in the world **A Mind at Peace** Christopher O. Blum, Joshua P. Hochschild, 2017-08-11 These past two decades modern

digital age Do you yearn for a mind that is more focused and a soul able to put down that iPhone and simply rejoice in the good and the true It s not hard to do The saints and the wise can show you how this book makes their counsel available to you *Intuition of Significance* Albert Norton,2020-02-06 Why am I here What is here What constitutes all of reality One view materialism is that all of reality consists only in physical things and the forces acting on them Another theism tells us there is a spiritual realm too which pervades the physical In our post Christian culture the default perspective is materialism yet we tend to self identify in reference to religion We might say I m not very religious for example defining our views by what they are not rather than what they are This feels neutral but amounts to an embrace of materialism We should look critically at these competing metaphysical views theism and materialism and follow the evidence where it leads This book traces the fault line between them examining evidence like the fact of being our incessant yearning our competing desires both for significance and insignificance and our subjective motivations regarding beauty morality and truth to show they all point to God *Thinking About It* Steven H. Propp,2021-01-31 Steve Propp most often writes novels with serious intellectual themes But this nonfiction book contains writings and essays dealing with a wide variety of topics in the areas of science religion philosophy and politics The first section includes expansions of topics that were briefly covered in his earlier nonfiction book *Inquiries Philosophical* 2002 Subjects include Science and the Multiverse Time Travel Extraterrestrial Life Artificial Intelligence Life after Death and more The second section consists of twelve Lay Sermons such as could be addressed to a religious congregation on topics such as the Image of God the Problem of Suffering Social Justice Forgiveness hurtful divisions based on gender sexual orientation etc Negative images in the mass media and others The third section contains thirty brief topical essays such as Family Education Loneliness Freedom Authority Justice Progress Individuality Civility Technology Emotions and even Holidays The final section has several previously unpublished writings [AQA AS Philosophy](#) Dan Cardinal,Jeremy Hayward,Gerald Jones,2014-10-17 Help students navigate key concepts and philosophical arguments and develop their own points of view with our clear engaging AS Philosophy textbook written for the new AQA AS Philosophy specification Written by the authors of *Philosophy in Focus* this book covers both units Epistemology and Philosophy of Religion and supports students in understanding difficult material through a clear style and visual examples of concepts and ideas Encourages students to engage with the anthology texts with clear prompts to read the relevant extracts helpfully provided at the back of the book for ease of teaching and studying Cements knowledge and understanding of key philosophical ideas through varied activities Develops analytical skills and students own philosophical viewpoints through practical tasks Stretches students with clearly signposted extension material Contents Introduction Introduction to Descartes Meditations Section 1 Epistemology Section 2 Philosophy of Religion Section 3 Preparing for the exam 3 1 How to approach the exam 3 2 How to read philosophy Section 4 Anthology extracts Glossary Notes Selected bibliography Index [God, Science and the Universe](#) John Swanson,2010-03 No religion that claims to be relevant in today s world can ignore the truths

that science teaches us Nor can it ignore the spiritual values and teachings of past generations The deep religious heritage of humanity is like a pirate s buried treasure chest The ancient chest decays into rotten wood and rusty iron but the precious jewels inside remain as fresh as the day they were buried They need only to be reclaimed and then placed in a fresh container The same is true for our religious heritage Religion today is undergoing a radical transformation that is affecting all aspects of our lives This book presents a synthesis between traditional values and our changing understanding of the universe We live in an age of science and technology that profoundly affects the way we see things God Science and the Universe presents the outline for a new faith grounded in the natural world *A Sceptic's Guide to Atheism* Peter S Williams,2013-09-01 This is an accessible response to the contemporary anti God arguments of the new atheists Dawkins Dennett Harris Hitchens Grayling etc Atheism has become militant in the past few years with its own popular mass media evangelists such as Richard Dawkins and Daniel Dennett In this readable book Christian philosopher Peter S Williams considers the arguments of the new atheists and finds them wanting Williams explains the history of atheism and responds to the claims that belief in God causes more harm than good religion is about blind faith and science is the only way to know things science can explain religion away there is not enough evidence for God the arguments for God s existence do not work Williams argues that belief in God is more intellectually plausible than atheism *The God of Jesus--Our God?* Alexander J. M. Wedderburn,2014-04-08 Although it might seem natural that Jesus beliefs about God should shape Christian theology this has often not been the case Jesus beliefs about God including such aspects as omnipotence and personality were largely shaped by contemporary Judaism His view of God s character exercising impartiality and mercy in this world but at times retribution in the next was often distinctive though not always The questions about the divine nature that had exercised earlier philosophers and theologians and would continue to puzzle later ones were not his concern and later discoveries and theories about the nature of the cosmos still often so mysterious to us were naturally not part of his thought world Similarly the role that later theologians found for him within the divine Trinity was also alien to him On the other hand alternative attempts to argue about the existence and the nature of God on the basis of cosmology or human religious experience have led to no conclusive results The man Jesus himself however offered moral teaching and a way of life that he believed rightly or wrongly reflected the nature and will of his God and this is his lasting contribution regardless of whatever divine reality does or does not lie behind it
