Who Are The European What Is Europe Exploring Europes Future:

The European Union and its eastern neighbourhood Mike Mannin, Paul Flenley, 2018-01-17 This volume is timely in that it explores key issues which are currently at the forefront of the EU's relations with its eastern neighbours. It considers the impact of a more assertive Russia, the significance of Turkey, the limitations of the Eastern Partnership with Belarus and Moldova, the position of a Ukraine in crisis and pulled between Russia and the EU, security and democracy in the South Caucasus. It looks at the contested nature of European identity in areas such as the Balkans. In addition, it looks at ways in which the EU's interests and values can be tested in sectors such as trade and migration. The interplay between values, identity and interests and their effect on the interpretation of Europeanisation between the EU and its neighbours is a core theme of the volume.

E-government in Europe Paul G. Nixon, Vassiliki N. Koutrakou, 2006-12-05 This book traces the development of e-government and its applications across Europe, exploring the effects of information and communication technology (ICTs) upon political action and processes. It explores a range of concepts and topics underpinning e-government in Europe: the degree to which e-government translates into genuine reform of government and public administration; the dual role of the EU as both a provider of e-government through its own internal activities and also as a facilitator or aggregator in the way it seeks to engender change and promote its ethos in member states; across the EU, cyberterrorism and its use both by terrorists and governments to pursue political agendas. Featuring in-depth case studies on the progress of e-government in the UK, France, Germany, Denmark, The Netherlands, Portugal, Greece, Slovenia, Hungary and Estonia. These case studies address the above issues whilst at the same time highlighting commonality and diversity in practice and the paradox between top-down strategies and the effort to engage wider civil participation via e-government. E-Government in Europe will be of interest to students and scholars of public policy, politics, media and communication studies, computing and information and communications technologies and European studies.

European Futures Chad Damro, Elke Heins, Drew Scott, 2021-03-30 This edited volume explores the opportunities and challenges facing the European Union in the future from different disciplines and assesses the EU's prospects across various policy areas. Using the European Commission's 2017 White Paper presenting five different scenarios for the future of Europe to 2050 as an organising framework for analysis and debate, the volume reflects upon the drivers of the EU's future, including its changing place in an evolving world, a transformed economy and society, heightened threats and concerns about security and borders, and questions of trust and legitimacy. The concluding chapter summarises and compares the findings to determine which of the scenarios is the most instructive to understand and plan European Futures to 2050 and beyond. This book will be of key interest to scholars and students of European integration, EU politics, studies and more broadly international relations as well as European policy makers.
