Why Is Sex Fun The Evolution Of Human Sexuality Science Masters:

Why Is Sex Fun? Jared M Diamond, 1998-09-25 From the New York Times bestselling author of *Upheaval* a fun and wide ranging exploration of why human sexuality is so different from other animals and how it made us who we are To us humans the sex lives of animals seem weird But it s our own sex lives that are truly bizarre We are the only social species to insist on carrying out sex privately Stranger yet we have sex at any time even during periods of infertility such as pregnancy or post menopause A human female doesn t know her precise time of fertility and certainly doesn t advertise it to human males by the striking color changes smells and sounds used by other female mammals Why do we differ so radically in these and other important aspects of our sexuality from our closest ancestor the apes Why does the human female virtually alone among mammals go through menopause Why does the human male stand out as one of the few mammals to stay with the female he impregnates to help raise the children that he sired Why is the human penis so unnecessarily large There is no one better qualified than Jared Diamond to explain the evolutionary forces that operated on our ancestors to make us so different sexually With wit and a wealth of fascinating examples *Why Is Sex Fun* shows how our sexuality as much as our large brains or upright posture led to human rise in the animal kingdom

Sex Is Not A Natural Act & Other Essays Leonore Tiefer, 2004-02-13 A revised collection of provocative essays on sex and its many meanings in our culture by one of the most original and highly regarded sexologists working in the field today

Evolution and Human Sexual Behavior Peter B. Gray, Justin R. Garcia, 2013-04-15 A comprehensive survey of the evolutionary science of human sexual behavior *Evolution and Human Sexual Behavior* invites us to imagine human sex from the vantage point of our primate cousins in order to underscore the role of evolution in shaping all that happens biologically and behaviorally when romantic passions are aroused

Beyond Choice Alexander

Sanger, 2005-07-06 Thirty years after Roe v Wade the argument between pro choicers and pro lifers has reached stalemate Pro choice arguments haven't persuaded a comfortable majority that legal abortion is vital to our society nor addressed our moral qualms Younger people are less and less supportive of reproductive rights Since 1996 state legislatures have enacted nearly 300 pieces of anti choice legislation With Roe in jeopardy International Planned Parenthood Council Chair Alexander Sanger asks a simple but heretical question How many more pieces of anti choice legislation will it take to get the pro choice movement to rethink its approach to the issue In *Beyond Choice* Sanger explores the history of the reproductive rights movement to discover how it got stuck in its thinking and then provides a convincing new argument for the moral rightness of its cause He shows why it is vital to the health and survival of the human race that couples be able to have children or not when they choose why reproductive rights are just as important to men as to women and why in an era of new reproductive technologies completely unfettered choice is not morally defensible *Beyond Choice* is inspiring and important reading for women's rights advocates opinion leaders medical ethicists and anyone concerned to preserve our freedom to reproduce or not without government intervention

The Mind of the Market Michael Shermer, 2007-12-26 Bestselling author Michael Shermer explains how evolution shaped the modern economy and why people are so irrational about money How did we make the leap from ancient hunter gatherers to modern consumers and traders Why do people get so emotional and irrational about bottom line financial and business decisions Is the capitalist marketplace a sort of Darwinian organism evolved through natural selection as the fittest way to satisfy our needs In this eye opening exploration author and psychologist Michael Shermer uncovers the evolutionary roots of our economic behavior Drawing on the new field of neuroeconomics Shermer investigates what brain scans reveal about bargaining snap purchases and establishing trust in business He scrutinizes experiments in behavioral economics to understand why people hang on to losing stocks why negotiations disintegrate into tit for tat disputes and why money does not make us happy He brings together astonishing findings from psychology biology and other sciences to describe how our tribal ancestry makes us suckers for brands why researchers believe cooperation unleashes biochemicals similar to those released during sex why free trade promises to build alliances between nations and how even capuchin monkeys get indignant if they don't get a fair reward for their work

Sexual Paradox: Complementarity, Reproductive Conflict and Human Emergence Christine Fielder, Chris King, 2006 Unlocks the keys to the paradox of how sexual selection fertilized the explosion of culture and the resulting fallout in sexual dominion of man over woman and nature How sexuality generates the universe through symmetry broken complementarity The implicit conflict of interests of sexual intrigue in the prisoners dilemma and its ecstatic resolution in the cosmology of love Sexual dominance as a koan for planetary crises 560 pages containing 270 illustrations **Sexual Difference Between Psychoanalysis and Vitalism** Arun Saldanha, Hoon Song, 2015-03-24 Throughout the twentieth century psychoanalysis and feminism were the practico intellectual fields most systematic and subversive in demonstrating

that humanity is sexually fissured More recently further advances in the philosophy of difference and renewed emphases on embodiment materiality and life offer possibilities for attending to dimensions of gender and sexuality that were previously underdeveloped This collection examines these possibilities insofar as they can either deepen or displace the traditional centrality of psychoanalysis in matters sexual The authors come from a wide range of backgrounds and defend their approaches to the problem of sexual difference in a variety of idioms drawing on key thinkers such as Lacan Irigaray Deleuze Foucault and Badiou It is rare to come across these thinkers together but sex is too crucial a site for critical thought not to mobilize every conceptual power available This book was originally published as a special issue of the journal *Angelaki* The Journal of the Theoretical Humanities

Human

Evolution beyond Biology and Culture Jeroen C. J. M. van den Bergh, 2018-10-18 Both natural and cultural selection played an important role in shaping human evolution Since cultural change can itself be regarded as evolutionary a process of gene culture coevolution is operative The study of human evolution in past present and future is therefore not restricted to biology An inclusive comprehension of human evolution relies on integrating insights about cultural economic and technological evolution with relevant elements of evolutionary biology In addition proximate causes and effects of cultures need to be added to the picture issues which are at the forefront of social sciences like anthropology economics geography and innovation studies This book highlights discussions on the many topics to which such generalised evolutionary thought has been applied the arts the brain climate change cooking criminality environmental problems futurism gender issues group processes humour industrial dynamics institutions languages medicine music psychology public policy religion sex sociality and sports

The Evolutionary Neuroethology of Paul MacLean Gerald A. Cory Jr., Russell Gardner Jr., 2002-12-30 In the mid 20th century integrative efforts began concerning the brain and its social and humanistic functions These efforts were led by Paul D MacLean s integrative research and thought As the century ended however such efforts were lost in the surge of new effort in brain and genome research Nobel Prizes were awarded on biochemical and cellular findings relevant to psychiatry Findings on these levels seemed to provide ultimate answers By contrast Cory Gardner and their contributors provide a more comprehensive view by extending MacLean s findings and integrative theory Supported by new findings and extended by critical analyses of current work the collection provides foundations for more integrative efforts that the editors and contributors believe will prevail increasingly in coming decades Looked at from another vantage point therapeutic social economic and political sciences have proceeded without operating theories congruent with or based on brain functions Across species perspectives have been lacking This collection redresses this problem and leads the way toward more comprehensive 21st century research on the one hand and practical applications on the other Multiple approaches extend from modeling efforts to across species comparisons to the basic science of psychiatry to theoretical explanations of political and economic systems But most important these essays abolish the Berlin wall that currently separates the brain from its social functions A major guide for scholars students and researchers involved in the neurobehavioral sciences for psychologists psychiatrists and others involved with human clinical sciences and for social scientists concerned with the impact of the nervous system

and its function **The Emancipation of the Soul** Philipp Kneis,2010 This book analyzes the mythological content of five television franchises within the genre of science fiction fantasy and horror The X Files Millennium Babylon 5 Crusade Buffy the Vampire Slayer Angel Stargate and Star Trek The central themes are errand into the wilderness emancipation from larger powers individual responsibility prophecy apocalyptic scenarios fundamentalism artificial intelligence as well as hybridity gender roles psychotic narration and others The theoretical basis for this work are both a conventional cultural studies perspective as well as memetics an evolutionary perspective of culture and literature that is utilized in this volume as an approach to studying genre at the example of the five case studies **The Caveman Mystique** Martha

McCaughey,2012-09-10 Has evolution made men promiscuous skirt chasers Pop Darwinian claims about men s irrepressible heterosexuality have become increasingly common and increasingly common excuses for men s sexual aggression The Caveman Mystique traces such claims about the hairier sex through evolutionary science and popular culture After outlining the social and historical context of the rise of pop Darwinism s assertions about male sexuality and their appeal to many men Martha McCaughey shows how evolutionary discourse can get lived out as the biological truth of male sexuality Although evolutionary scientists want to use their theories to solve social problems evolutionary narratives get invoked by men looking for a Darwinian defense of bad boy behaviors McCaughey argues that evolution has nearly replaced religion as a moral guide for understanding who we are and what we must overcome to be good people Bringing together insights from the fields of science studies body studies feminist theory and queer theory The Caveman Mystique offers a fresh understanding of science science popularization and the impact of science on men s identities making a convincing case for deconstructing rather than defending the caveman *Encyclopedia of Anthropology* H. James Birx,2006 Focuses on physical social and applied

athropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories The Maleness of Jesus Neil H. Williams,2011-01-01 At the center of Christianity is Jesus of Nazareth whose maleness is used by many to justify the subordination of women and to emphasize that men rather than women better represent Jesus This raises a number of questions that are the subject of this book What is the significance of Jesus maleness Does it reveal the character of God Is it foundational for the gospel Is Jesus maleness associated with an ongoing created order of male priority Our answers will affect Christianity s task of love justice and reconciliation in a world that is characterized by the global marginalization oppression and abuse of women

Scientific and Religious Habits of Mind Ron Good,2005 The open inquiring nature of science is fundamentally incompatible with the closed authoritarian nature of most religious training Reasons for rejection of personal god concepts by Charles Darwin Albert Einstein and Bertrand Russell are used by this author to underline this incompatibility and to show how each of these important scientists came to reject organized religion Conflicts between scientific and religious habits of mind are described and ideas for education are offered Common assumptions about our natural environment and human

nature are shown to be obstacles to scientific literacy and to a sound liberal education Research on the nature of the relationship between scientific and religious habits of mind is proposed recognizing the potential incompatibilities between these important influences in society
