Saving the Environment Vic Parker, Victoria Parker, 2012-07 Real life stories of how young people are working to protect the environment

Unorthodox Life Rudy Rosenberg, 2013-04 UNORTHODOX LIFE In the 1930 s Germany the most powerful and ruthless nation in the world decreed that our family was to be exterminated Rudy Rosenberg born in Belgium in 1930 found himself and his immediate family locked in Belgium Rudy his sister Ruth Hillel his Poland born father and Frieda his German born mother Jewish and Stateless were unable to break out of Europe The family watched the growth of Hitler and his Nazi anti Semitic policies with increased concern hoping that unlike in the Great War 1914 1918 Belgium s neutrality would be respected by Germany 1935 Anti Jewish laws began in Germany Frieda s family would be murdered and wiped out during 1942 1943 1938 Hitler marched into Czechoslovakia Hitler marched into Austria 1939 Hitler invaded Poland Hillel s family would be murdered and wiped out 1941 1942 we heard of Jews being hunted and killed by the German invaders 1940 In April Hitler invaded Denmark and Norway 1940 in May Hitler invaded Belgium Holland and France Rudy and his family watched and remembered the anti Jewish vitriol that seeped into occupied Europe and even in previously benign Belgium Starting in 1941 the first arrests of thousands of Belgian Jews came about These were released through the personal intervention of Belgium s Queen Elizabeth These Belgian Jews would later be arrested and deported again in 1943 In 1942 Rudy Ruth and countless Jewish students were forbidden to continue their schooling The family was left with limited choices We had to either try to flee to unoccupied Switzerland or hide in convents or Christian camps or private homes A last alternative was to await the German troops for the deadly arrest and deportation to concentration camps mostly in Poland or Germany where swift death would be certain In June 1942 we purchased fake identity papers so we could flee to Switzerland Unfortunately we soon learned that this escape route was too dangerous and not practical Our parents found a safe hiding place in the Ardennes for Ruth and Rudy For a fee Frieda found a basement to hide in Ixelles a suburb of Brussels in a private home Hillel for a much larger fee found a hiding place in a private house in Uccle another suburb of Brussels For safety reasons after about three months Ruth and Rudy left the hotel in the Ardennes Ruth and Rudy went to hide and joined with father in Uccle Six months later in March 1943 Rudy went to hide with Frieda in her Ixelles basement where they remained in hiding until they were finally liberated on the 3rd of September 1944 after hiding in the basement for 17 months The family spent over two years 27 months 823 days in hiding We then tried to resume our educations live again and become normal people again Eventually Rudy left Europe for the USA joined the US Army during the Korean conflict Frieda and Ruth joined Rudy three years later In 1991 Rudy wrote and published *And Somehow We Survive* an account of the struggle of his family to survive Now Rudy Rosenberg expands his life and the attempts to sort out the early life survival and his arrival in the USA There he details his bewildering coming to terms with his ethnic background a faith he never knew and the religion he ran away from AN UNORTHODOX LIFE

Electric Light Sandy Isenstadt, 2018-09-25 How electric light created new

spaces that transformed the built environment and the perception of modern architecture In this book Sandy Isenstadt examines electric light as a form of architecture as a new uniquely modern kind of building material Electric light was more than just a novel way of brightening a room or illuminating a streetscape it brought with it new ways of perceiving and experiencing space itself If modernity can be characterized by rapid incessant change and modernism as the creative response to such change Isenstadt argues then electricity instantaneous malleable ubiquitous evanescent is modernity's medium Isenstadt shows how the introduction of electric lighting at the end of the nineteenth century created new architectural spaces that altered and sometimes eclipsed previously existing spaces He constructs an architectural history of these new spaces through five examples ranging from the tangible miracle of the light switch to the immaterial and borderless gloom of the wartime blackout He describes what it means when an ordinary person can play God by flipping a switch when the roving cone of automobile headlights places driver and passenger at the vertex of a luminous cavity when lighting in factories is seen to enhance productivity when Times Square became an emblem of illuminated commercial speech and when the absence of electric light in a blackout produced a new type of space In this book the first sustained examination of the spatial effects of electric lighting Isenstadt reconceives modernism in architecture to account for the new perceptual conditions and visual habits that followed widespread electrification
