

RICHARD C. FRANCIS

The book cover features a landscape illustration. At the top, a light blue sky is visible. Below it, a range of blue mountains stretches across the horizon. In the middle ground, a two-lane asphalt road with a yellow center line recedes into the distance. The road is flanked by golden-yellow fields. On the right side of the road, a utility pole with cross-arms stands. The overall scene is a perspective view looking down the road towards the horizon.

Why Men Dont Ask Directions:

Why Men Won't Ask for Directions Richard C. Francis, 2013-12-03 Much of the evolutionary biology that has grabbed headlines in recent years has sprung from the efforts of sociobiologists and evolutionary psychologists to explain sexual features and behavior even differences between how men and women think as evolutionary adaptations They have looked to the forces of natural selection to explain everything from the mimicry of male mockingbirds to female orgasms among humans In this controversial book Richard Francis argues that the utility of this approach is greatly exaggerated He proposes instead a powerful alternative rooted in the latest findings in evolutionary biology as well as research on the workings of our brains genes and hormones Exploring various sexual phenomena Francis exposes fundamental defects in sociobiology and evolutionary psychology which he traces to their misguided emphasis on why questions at the expense of how questions Francis contends that this preoccupation with why questions such as Why won t men ask for directions results in a paranoiac mindset and distorted evolutionary explanations His alternative framework entails a broader conception of what constitutes an evolutionary explanation one in which both evolutionary history as embodied in the tree of life and developmental processes are brought to the foreground This alternative framework is also better grounded in basic biology Deeply learned consistently persuasive and always engaging this book is a welcome antidote to simplistic sociobiological exegeses of animal and human behavior

Don't Look Behind You! Peter Allison, 2009-09-01 Incredible true tales from a world renowned safari guide and celebrated author Romantic notions aside being a safari guide isn't always particularly enjoyable or glamorous Quite often it is beset with challenges like having to spend a night in a thorn tree with marauding hyenas below But safari guide Peter Allison lives for such moments Here the author of the widely praised *Whatever You Do Don't Run* details his time spent in safari camps not only in Botswana but also in South Africa Mozambique and Namibia places he loves despite how much it feels like they might just be trying to kill him In *Don't Look Behind You* Allison recounts adventures few would live to tell Like the time he and a group of bored guides launched a makeshift raft into a foaming flooded river teeming with hippos and crocodiles Or the afternoon he heard monkeys telling him that a leopard was walking around the camp and then realized the leopard was in his tent with him in it In addition to relating his encounters with animals Allison shares the stories of those tourists who have long been pushing him toward early retirement Normally respectful of all his fellow creatures no matter how many feet they have Allison fantasizes about leaving one in particular behind on the Skeleton Coast a place that receives less than half an inch of rain a year and is patrolled by lions and hyenas Join Peter Allison for another riveting rollicking behind the scenes dose of everyone's dream experience going on safari and come through amazed but thankfully without a scratch

His Brain, Her Brain Scientific American Editors, 2014-12-01 Boy or girl Even before a person is born that s the first thing everyone wants to know underscoring just how much value human societies of all types place on gender In this eBook His Brain Her Brain we take a closer look at the anatomical chemical and functional differences in the brains of men and women as well as some surprising similarities For instance studies of infants such as those described in Big Answers from Little People by David Dobbs find few differences in cognitive skills between boys and girls but there is no denying that boys love trucks whereas girls prefer dolls While some gender differences are evident even on the first day of a baby s life most of these discrepancies start out small but get amplified by our gender obsessed culture As neuroscientist Lise Eliot explains in The Truth about Boys and Girls tea parties and wrestling matches leave their stamp on growing brains but the gap that separates boys and girls would be less noticeable if parents encouraged activities such as reading for boys and video games for girls By adulthood males and females not only have nonidentical brain architectures but also divergent ways of speaking parenting and responding to both tragedy and comedy The Humor Gap by Christie Nicholson and Different Shades of Blue by Erica Westly explore these divides She wants someone who can make her laugh he wants someone who will laugh at his jokes And when she s depressed she gets sad he gets mad But men and women aren t from different planets Few sex disparities are as hardwired as popular accounts make them out to be A better understanding of the real and imagined differences between his brain and her brain can help us overcome cultural biases improve communication and strengthen relationships
