Tradition And Innovation Reflections On Politics:

The Political Theory of Liberation Theology John R. Pottenger, 1989-09-14 This is the first in depth look at the political theoretical structure of liberation theology Pottenger shows how liberation theologians writing from the perspective of the poor and oppressed denounce modernity and especially capitalism for having caused poverty and military dictatorships He evaluates the liberation theologians methodological approach to political theory and the crucial role of Marxism He also analyzes liberation theologians assessment of Latin American political economy and their moral arguments for political activism in response to these assessments Pottenger addresses the general question of to what extent liberation theology has achieved its ultimate objective of a just society of the convergence of traditional social values and modern political science

Transcendence and Understanding Zdenko S. Sirka, 2020-03-04 This book brings into conversation Western and Orthodox hermeneutical schools one represented by Hans Georg Gadamer and his followers while the other school is less focused around one person and yet displays common distinct features The main question of the book is how we can mediate not only the content of understanding of who we are in relation to each other to the world in which we live and to God but also comprehend the process of understanding across various historical periods The strengths and weaknesses of both positions are presented and it is shown how these two hermeneutical approaches can enrich each other The book argues that preserving both positions and indicating how they complement each other helps show the limits of encountering the transcendent reality that can be testified to by human language without being reduced to it as such [Crisis and Renewal in the History of European Political Thought](#), 2021-08-30 Listen to the podcast here Read Crisis as a trigger for new ways of thinking about politics here This volume explores the complex theme of crisis in European political thought from antiquity to the twenty first century It investigates the innovations in political thought that sprang from crisis as well as the conceptual challenges thinkers faced when dealing with the devastation wrought by spiritual economic and political crises In so doing Crisis and Renewal also examines the ways in which crisis often became the site of renewal As an object of theoretical reflection and as a pivotal element of our vocabulary the notion of crisis is often applied indiscriminately and without clarity to a huge variety of domains This volume provides a historically informed analysis of what it means to reflect on and theorise about crisis Contributors are Erica Benner Niall Bond Nathaniel Boyd Andrea Catanzaro Patricia Chiantera Stutte Alberto Clerici Cesare Cuttica Annalisa Furia George Gallwey Kai Gr f Ferenc H rcher Paschalis M Kitromilides L szl Kontler Adriana Luna Fabritius Clara Maier Janine Murphy Adrian O Connor and Mark Somos *The modern theories of international relations - old thoughts or innovative ideas? Investigation of Constructivism and Critical Theory by the three Traditions of Martin Wight*, 2006-02-09 Seminar paper from the year 2005 in the subject Politics Political Theory and the History of Ideas Journal grade 2 0 [http://www.uni-jena.de/Politikwissenschaft/course/Politische Philosophie der internationalen Beziehungen](http://www.uni-jena.de/Politikwissenschaft/course/Politische%20Philosophie%20der%20internationalen%20Beziehungen) language English abstract Martin Wight a lecturer of international business relations member of the British Committee as

well as founder of the English School first mentioned in his lectures the three traditions of the international theories which have been edited in a book with the title Martin Wright International theory the three traditions by his former students after his death In his reflections about the international politics and the leading theories he tries to classify the three leading schools and to show the continuity of those In this connection the two basic facts of the international relations are formulated Firstly that there is no body in the international theory but the individual schools of theory influence and cross each other and secondly that the new theoreticians learn from the old ideas so that the new theories are simply shift of the stress in the old kind of thinking but do not represent a new and independent theory or to say it with Wights words the leading premiss is that political ideas do not change much and the range of ideas is limited Based on this assumption I will analyse in the following the Constructivism of Alexander Wendt und the Critical Theory according to Andrew Linklater which belong to the post positivistic group of the international theories In this connection I will use Wight s traditions to check whether his claims will be acknowledged or whether these modern theories establish a new and independent line Starting with a short introduction in the main characteristics and main statements of the several schools I will assign the modern theoreticians to the corresponding traditions of Martin Wight using the statements concerning the human nature the international society the national state as well as the foreign policy and the international law Furthermore I will check whether and where they are similar in order to discuss an conclusion where there are differences and similarities between the ancient and the new thinkers and to what extent the statement of Wight is justified or not
