Learning for Work Connie Goddard, 2024-09-24 Founded in 1883 the Chicago Manual Training School CMTS was a short lived but influential institution dedicated to teaching a balanced combination of practical and academic skills Connie Goddard uses the CMTS as a door into America's early era of industrial education and the transformative idea of learning to do Rooting her account in John Dewey's ideas Goddard moves from early nineteenth century supporters of the union of learning and labor to the interconnected histories of CMTS New Jersey's Manual Training and Industrial School for Colored Youth North Dakota's Normal and Industrial School and related programs elsewhere Goddard analyzes the work of movement figures like abolitionist Theodore Weld educators Calvin Woodward and Booker T. Washington social critic W. E. B. Du Bois Dewey himself and his influential Chicago colleague Ella Flagg Young The book contrasts ideas about manual training held by advocate Nicholas Murray Butler with those of opponent William Torrey Harris and considers overlooked connections between industrial education and the Arts and Crafts Movement An absorbing

merger of history and storytelling Learning for Work looks at the people who shaped industrial education while offering a provocative vision of realizing its potential today **Trail Planning, Design, and Development Guidelines** ,2006 **Art of Mountain Biking** Robert Hurst,2011-11-08 An unprecedented new look at mountain biking and trail riding techniques from the author of The Art of Cycling Riding obstacle strewn singletrack trails on a two wheeled machine is one of those seductive challenges that can never be fully mastered even by the most talented and experienced In The Art of Mountain Biking Robert Hurst deliberately avoids discussion of equipment training and other subjects that have already been beaten to death in mountain bike books and magazines to focus on the deeply complex art of riding trails From page to page and switchback to switchback he chases the complex mysteries that make trail riding so difficult and so rewarding from the application of soft power and the biomechanics of balance and vision to the philosophy of line choice and the Riccatti equations that describe the path of the bike s rear wheel to the nature of dirt itself Built on the author s own quarter century of experience and the tried and true wisdom of many other veteran mountain bikers this environmentalist and darkly humorous manual provides a collection of unexpected knowledge that will be indispensable to both novices and experts Throughout Hurst explains with clarity revelation and a healthy dash of wit the ins and outs of riding a mountain bike
