## **Ukraine At The Crossroads Economic Reforms In International Perspective:**

*Ukraine at the Crossroads* Axel Siedenberg, Lutz Hoffmann, 1999-01-21 Axel Siedenberg Lutz Hoffmann 1 The specificity of transformation in Ukraine When the Soviet empire collapsed in the very early 1990s the new era that dawned was commonly given the name transformation implying the systemic change from socialism towards some form of market economy Almost ten years later the transformation process does not exist any more instead a whole variety of transformations are taking place in Eastern Europe and the CIS Whereas some countries are heading towards EU membership e g Poland others are still pondering on what economic system to adopt e g Russia and yet others have rejected a market oriented transformation outright e g Belarus Within this variety of transformations Ukraine clearly stands out as a specific case Whilst initially considered to be one of the stronger post Soviet Republics it descended into economic depression in 1992 and has hardly recovered since on the other hand once considered to be a potential centre of ethnic unrest and political instability it has turned into a democratic peaceful civil society that is firmly establishing itself within the new European and world order This book takes a critical look at economic reform in Ukraine as compared to other East European and CIS countries Our hypothesis is that Ukraine is going through a transformation process peculiar to itself which can be traced at both macroeconomic and microeconomic level

*Ukraine on the Road to Europe* Lutz Hoffmann, Felicitas Möllers, 2012-12-06 by Viktor A Yushchenko Prime Minister of Ukraine The intensification of the integration processes on our continent entirely coincides with the national interests of Ukraine a country which is undoubtedly European both geographically and politically What kind of Europe do we now have and what should it be in the future What should the role of Ukrainian society be in the economic social and cultural integration of the countries on the European continent These questions are the subject of research and scientific analysis by the well known economists whose work is contained in this book Let there be no doubt the strategic goal of Ukraine's foreign policy is the active participation of our country in the European integration process Thus the move toward co operation and gradual integration with the European Union was defined as one of the main priorities of the Ukrainian Government's programme Reforms for Well being which is based on President Leonid Kuchma's speech Ukraine Steps into XXI century and was approved by the Ukrainian Parliament This move is not a hasty response to a new trend but rather a pragmatic decision since the EU will define the face of Europe for the next century

*Ukraine at the Crossroads* Axel Siedenberg, Lutz Hoffmann, 2012-12-06 Axel Siedenberg Lutz Hoffmann 1 The specificity of transformation in Ukraine When the Soviet empire collapsed in the very early 1990s the new era that dawned was commonly given the name transformation implying the systemic change from socialism towards some form of market economy Almost ten years later the transformation process does not exist any more instead a whole variety of transformations are taking place in Eastern Europe and the CIS Whereas some countries are heading towards EU membership e g Poland others are still pondering on what economic system to adopt e g Russia and yet others have rejected

a market oriented transformation outright e g Belarus Within this variety of transformations Ukraine clearly stands out as a specific case Whilst initially considered to be one of the stronger post Soviet Republics it descended into economic depression in 1992 and has hardly recovered since on the other hand once considered to be a potential centre of ethnic unrest and political instability it has turned into a democratic peaceful civil society that is firmly establishing itself within the new European and world order This book takes a critical look at economic reform in Ukraine as compared to other East European and CIS countries Our hypothesis is that Ukraine is going through a transformation process peculiar to itself which can be traced at both macroeconomic and microeconomic level

### **Economic Reform in Ukraine: The Unfinished**

**Agenda** Anders Aslund, Georges De Menil, 2019-08-07 Ukraine may have taken a gradualist approach to economic reform but the results have been no better than in Russia The editors have assembled the leading specialists on the Ukrainian economy including officials from major Ukrainian and international economic institutions to outline the major problems of the economy analyze the initial phases of economic reform in Ukraine assess their outcomes and chart the way forward

How Ukraine Became a Market Economy and Democracy Anders Åslund, 2009-03-01 One of Europe's old nations steeped in history Ukraine is today an undisputed independent state It is a democracy and has transformed into a market economy with predominant private ownership Ukraine's postcommunist transition has been one of the most protracted and socially costly but it has taken the country to a desirable destination slund's vivid account of Ukraine's journey begins with a brief background where he discusses the implications of Ukraine's history the awakening of society because of Mikhail Gorbachev's reforms the early democratization and the impact of the ill fated Soviet economic reforms He then turns to the reign of President Leonid Kravchuk from 1991 to 1994 the only salient achievement of which was nation building while the economy collapsed in the midst of hyperinflation The first two years of Leonid Kuchma's presidency from 1994 to 1996 were characterized by substantial achievements notably financial stabilization and mass privatization The period 1996-99 was a miserable period of policy stagnation rent seeking and continued economic decline In 2000 hope returned to Ukraine Viktor Yushchenko became prime minister and launched vigorous reforms to cleanse the economy from corruption and economic growth returned The ensuing period 2001-04 amounted to a competitive oligarchy It was quite pluralist although repression increased Economic growth was high The year 2004 witnessed the most joyful period in Ukraine the Orange Revolution which represented Ukraine's democratic breakthrough with Yushchenko as its hero The postrevolution period however has been characterized by great domestic political instability a renewed explicit Russian threat to Ukraine's sovereignty and a severe financial crisis The answers to these challenges lie in how soon the European Union fully recognizes Ukraine's long expressed identity as a European state how swiftly Ukraine improves its malfunctioning constitutional order and how promptly it addresses corruption

**The Political Economy of Independent Ukraine** Oleh Havrylyshyn, 2016-12-26 Marking the 25th anniversary of Ukraine as a sovereign nation this book traces its economic transformation since 1991 Post communist

transition has been a highlight of recent history and Ukraine stands out as one of its most interesting and puzzling cases Havrylyshyn offers the first comprehensive treatise on the entire period providing a thorough description of the slow evolution of economic reforms exploring how and why performance in this regard fell far behind the leaders in transition Testing several conventional hypotheses the author argues that while Russian imperialism may form part of the explanation the self serving interests of domestic elites and new oligarchs may be even more important Radically revising the traditional argument that reforms were delayed to allow nation building this book contends that it was due more to the interests of the non lustrated elite who needed time to become the new capitalists

**Modernizing Infrastructure in Transformation Economies** Christian von Hirschhausen,2002-01-01 The design of infrastructure policies is a controversial issue in the transition economies of Eastern Europe where the dismal state of infrastructure was widely regarded to be one of the major obstacles to economic recovery and sustained growth With the imminent enlargement of the EU Christian von Hirschhausen provides a detailed reflective analysis of the state of infrastructure development in Eastern Europe

**Re-Constructing the Post-Soviet Industrial Region** Adam Swain,2007-04-11 This book examines the political economy of attempts to restructure the Donbass one of the Soviet Union s most important old economy rustbelt industrial regions It shows how local interest groups have successfully frustrated the central government s and the World Bank s proposed market oriented restructuring and how a manufacturing based regional economy is surviving partially with restructuring postponed

*Distortions to Agricultural Incentives in Europe's Transition Economies* Kym Anderson,Johan Swinnen,2008-06-05 The vast majority of the world s poorest households depend on farming for their livelihood During the 1960s and 1970s most developing countries imposed pro urban and anti agricultural policies while many high income countries restricted agricultural imports and subsidized their farmers Both sets of policies inhibited economic growth and poverty alleviation in developing countries Although progress has been made over the past two decades to reduce those policy biases many trade and welfare reducing price distortions remain between agriculture and other sectors as well as within the agricultural sector of both rich and poor countries Comprehensive empirical studies of the disarray in world agricultural markets first appeared approximately 20 years ago Since then the OECD has provided estimates each year of market distortions in high income countries but there has been no comparable estimates for the world s developing countries This volume is the first in a series other volumes cover Africa Asia and Latin America that not only fill that void for recent years but extend the estimates in a consistent and comparable way back in time and provide analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half century *Distortions to Agricultural Incentives in Europe s Transition Economies* provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the economies of Eastern Europe and Central Asia that are transitioning away from central planning The book includes country and subregional studies of the ten transition economies of Central and Eastern Europe that joined the

European Union in 2004 or 2007 of seven other large member countries of the Commonwealth of Independent States and of Turkey Together these countries comprise over 90 percent of the Europe and Central Asia region s population and GDP Sectoral trade and exchange rate policies in the region have changed greatly since the dissolution of the Soviet Union in 1991 but price distortions remain The new empirical indicators in these country studies provide a strong evidence based foundation for evaluating policy options in the years ahead     Rethinking the Post Soviet Experience J. Hass,2011-11-25 In this unique contribution to economic sociology Jeffrey Hass examines the impact of culture norms and political authority on Russia s post socialist transition The interactions and contradictions of moral economies and market relations are examined exploring the often overlooked social dimension to market building in Russia
