English c. 1400-1600 Elisabeth Salter,2017-10-03 This book is about reading practice and experience in late medieval and
early modern England It focuses on the kinds of literatures that were more readily available to the widest spectrum of the
population Four case studies from many possibilities have been selected each examining a particular type of popular
literature under the headings religious moral practical and fictional A key concern of the book is how we might use particular
types of evidence in order to understand more about reading practice and experience so issues of method and approach are
discussed fully in the opening chapter One distinctive element of this book is that it attempts to uncover evidence for the
reading practices and experiences of real rather than ideal readers using evidence that is found within the material of a book
or manuscript itself or within the structure of a specific genre of literature Salter attempts to negotiate a path through a set
of methodological and interpretive issues in order to arrive at a better understanding of how people may have read and what
they may have read This in turn leads on to how we may interpret the evidence that manuscripts and early printed books
provide for the ways that medieval and early modern people engaged with reading This book will be of interest to academics
and research students who study the history of reading popular culture literacy manuscript and print culture as well as to
those interested more generally in medieval and early modern society and culture *Princeton Alumni Weekly* ,1948
