US Nuclear Submarines Jim Christley, 2012-01-20 The adoption of nuclear power revolutionized submarine design Vessels can stay underwater for months trailing the enemy or training weapons on land targets from secret positions always there never seen Jim Christley a former submariner explores here the influence of Admiral Hyman Rickover in cautiously introducing these stealthy machines of war and frankly discusses the power and perils of using nuclear reactors at sea Using unique and detailed artwork he outlines the many evolving aspects of design within the submarine classes from the very first nuclear submarine USS Nautilus to the classes under construction even now

US Nuclear Submarines Jim Christley, 2012-01-20 The adoption of nuclear power revolutionized submarine design and means that vessels can stay underwater for months trailing the enemy or training weapons on land targets from secret positions always there never seen Jim Christley a former submariner explores here the influence of Admiral Hyman Rickover in cautiously introducing these stealthy machines of war and frankly discusses the power and perils of using nuclear reactors at sea Using unique and detailed artwork he outlines the many evolving aspects of design within the submarine classes from the very first nuclear submarine USS Nautilus to the classes under construction even now

US Submarines 1941-45 Jim Christley, 2012-02-20 Naval warfare in the Pacific changed completely with the Japanese attack on Pearl Harbor in 1941 The strategic emphasis shifted from battleships to much more lethal far ranging weapons systems one of these was the submarine This book details the design and development classes weapons and equipment tactics and operational history of the US submarine in World War II Detailed tables photographs and superb color plates depict the force that had an effect far beyond its size the submarine accounted for 55% of all Japanese shipping losses despite suffering the highest percentage loss of any unit of the United State Armed Forces in World War II

War Elephants Konstantin Nossov, 2012-04-20 Elephants have been deployed as weapons for centuries particularly in South and South East Asia where war elephants constituted the bulk of most armies in the region from antiquity right up to the 19th century This book offers an insight into the incredible history of these living tanks focusing on the design of the equipment and armament that made them so terrifying The author Konstantin S Nossov traces the history of war elephants from their deployment against Alexander the Great s army at the battle of Gaugamela through to their use in the 19th century by the armies of South East Asia analyzing the battle formation and tactics of war elephants in action and how these tactics developed

Zeppelins Charles Stephenson, 2012-03-20 On 2 July 1900 the people of Friedrichshafen Germany witnessed a momentous occasion the first flight of LZ 1 Count Ferdinand von Zeppelin s first airship Although deemed a failure a succession of better craft LZ2 to 10 enabled the Zeppelin to expand into the consumer market of airship travel whilst also providing military craft for the German Army and Navy The years of the Great War saw the Zeppelins undertake strategic bombing missions against Great Britain This engaging illustrated study covers the post war fate of the Zeppelins including the crash of the Hindenburg and their use by the Luftwaffe at the beginning of World

War II *Sherman Crab Flail Tank* David Fletcher, 2012-05-20 The Sherman Crab Flail tank was the powerful culmination of a series of mine clearing flail tanks developed during World War II Here David Fletcher recounts how the Sherman Crabs were among the first tanks ashore on D Day and as the war progressed they were in constant demand both for formal attacks and more incidental operations Following the development of the tank and its use in the war he details the US Army's initial lack of interest in the flail but how after cooperative actions with the British they too decided to adopt the type themselves In addition to its special mine clearing role the Sherman Crab was also capable of fighting in tank duels and this book includes dramatic accounts of its use by the famous 79th Armoured Division and the US Army The author explores the beginnings of the design in the Matilda Scorpion and Baron flails developed for the Valentine and M3 Grant tanks through to the Sherman and particularly the Crab version This detailed account of one of the most interesting tanks in the Funnies series is a delight for any modeller or tank enthusiast

German Battleships 1939-45 Gordon Williamson, 2012-04-20 In this the first of a five volume series covering the capital ships of the German Navy of World War II Gordon Williamson examines the design development and operational use of the battleships used by the Kriegsmarine The Schlesien and Schleswig Holstein were used mostly as training ships until the end of the war when they took part in bombardment of Soviet troop movements in East Prussia The Scharnhorst had a successful career until her sinking at the battle of the North Cape and the Gneisenau with her ignominious end as a block ship Bismarck's short but glorious career and Tirpitz's lonely vigil in Norway's distant Fjords until sunk by RAF bombers using the massive Tallboy bombs are also covered

British Heavy Cruisers 1939-45 Angus Konstam, 2012-05-20 The idea of a heavy cruiser emerged in the aftermath of World War I and was closely linked to the limits set by the inter war Washington Naval Treaty The pre World War I concept of armoured cruisers had been abandoned but in their stead the Admiralty saw a place for powerful cruisers able to patrol the sea lanes of the British Empire and which were well armed enough that they could destroy enemy commerce cruisers The result was a group of British warships known as the Washington Treaty Cruisers that did everything the Admiralty wanted but which conformed to the limits imposed by the treaty These impressive cruisers were high sided spacious and stately perfect peacetime ambassadors for British power In war they also packed a considerable punch During World War II the Royal Navy's thirteen heavy cruisers saw service in every theatre of the war whether facing the Bismarck in the North Atlantic or enduring kamikaze attacks in the Pacific

Imperial Japanese Navy Battleships 1941-45 Mark Stille, 2012-05-20 The Imperial Japanese Navy of World War II surpassed the Allied and Axis fleets in innovation and technology This title covers the 12 Japanese battleships that saw service between 1941 and 1945 including the mighty Yamato Each class is considered in light of its design and construction its armament and wartime modifications The author Mark Stille uses primary sources and dramatic photographs to tell the story of these mighty battleships at war including their major engagements during the raid at Pearl Harbor and the battle of Midway The first English language book to include photographs from the prestigious Fukui Collection this investigation will

fascinate any naval enthusiast **Fighting Ships of the Far East (2)** Stephen Turnbull, 2012-06-20 Over the centuries naval relations between Japan and Korea appear to have alternated between peaceful trade and outright hostility However this impression can be misleading as much of what passed for mercantile activity was in fact conducted by Japanese pirate fleets who pillaged the coasts of Korea and China in a long lasting tradition that culminated in the greatest pirate raid of all Hideyoshi's invasion of Korea in 1592 This was the conflict that involved Ming China and almost dragged in Siam It also led to Korea developing East Asia's most famous warship the legendary turtle ship which is described for the first time in full technical detail in this book Italian Light Tanks Filippo Cappellano, Pier Paolo Battistelli, 2012-06-20 The Italian army unlike those of the British and French did not use tanks in combat during World War I and by November 1918 only one training unit equipped with French Schneider and Renault tanks had been formed Consequently during the 1920s the Italian army had just one single tank type in its armoured inventory the Fiat 3000 Only in 1927 was the first tank unit formed as a branch of the infantry and not as an independent organization while the cavalry rejected the idea of both tanks and armoured cars and decided to stand by the use of horses for its mounted units Between 1933 and March 1939 a further 2 724 CV 33 L 3 tanks were built 1 216 of which were exported all over the world By the time Italy entered the war in June 1940 the army had 1 284 light tanks 855 of which were in combat units including three armoured divisions Variants of the CV 33 L 3 tanks included flame throwers bridge layers recovery vehicles and a radio command tank Some L 3 tanks were still in use in 1945 by both the Germans and the German allied Italian units of the Repubblica Sociale *Crusader and Covenanter Cruiser Tanks 1939-45* David Fletcher, 2012-05-20 The Covenanter which never saw active service and Crusader Cruiser tanks were developed between 1939 and 1940 The Crusader first saw action in the North African desert in June 1941 its speed and sleek design made it a hard target to hit and the tank was well respected by the Afrikakorps for its velocity in combat But its hurried development prior to World War II also made it prone to mechanical failure This book examines the Covenanter and the many variants of the Crusader tank detailing the designs developments and disappointments of these infamous World War II tanks Ships of the American Revolutionary Navy Mark Lardas, 2012-01-20 Mark Lardas explores the origins of American warships primarily light and medium frigates built for the Continental Navy during the years 1776-1783 This was the first navy of the United States and much of the fleet was comprised of ships that had been modified from existing vessels converted into warships to provide a crucial service during the American Revolutionary War Despite having no real funding this unique fleet had a surprising amount of success against the might of the Royal Navy and this title discusses the strengths and weaknesses of each design and the differences between European and American warships of the time With a close look at how these ships performed in key battles as well as the exploits of John Paul Jones the founding father of the United States Navy this is a complete illustrated overview of the ships service and development until France's entry into the war and the subsequent decline in importance of the Continental Navy **British Destroyers 1892-1918** Jim Crossley, 2012-02-20 This

book recounts the history of the first destroyers of the Royal Navy which revolutionized the way war was fought at sea with new armaments and a great improvement on earlier designs Moreover between 1892 when the first destroyers were laid down and 1918 destroyers evolved radically from 27 knot 250 ton ships into 35 knot 1 530 ton ships All these ships were involved in some form during World War I the smaller original destroyers in an auxiliary support role and the newer larger destroyers at some of the greatest sea battles of the war This account highlights the role the destroyers played in the North Sea during the crucial battles to control the Heligoland Bight as well as the major fleet action at the battle of Jutland in 1916 Complete with a detailed description of the technical evolution of each class of destroyer from the 27 knotters to the Tribal and Marksman classes Jim Crossley offers a complete overview of the vessels that helped to maintain Britain's naval supremacy

Kriegsmarine U-boats 1939-45 (2) Gordon Williamson, 2012-04-20 This title follows from New Vanguard 51 Kriegsmarine U boats 1939 45 1 and charts the continuing development of the U boat in German service including the evolution of the Type IX as a long range cruiser intended for solo operations in distant waters Also covered is the revolutionary Type XXI conceived of in 1942 and launched in April 1944 the first true submarine rather than submersible whose arrival was just too late to influence the war Other vessels covered are the Type XXIII a small vessel armed with only two torpedoes but technically highly advanced and the Type X minelayers which were rarely used in their intended role and more often used as supply boats

German E-boats 1939-45 Gordon Williamson, 2012-04-20 By the outbreak of World War II Germany had done much to replace the Kaiser's High Seas Fleet which was scuttled following their surrender at the end of World War I Forced to build anew the Kriegsmarine possessed some of the most technically advanced warships in existence Although the heavy units of the fleet were too small in number to pose much of a threat Germany was particularly well served by her Navy's smaller vessels in particular the U Boats and the S Boats Known to the allies as the E Boats Enemy they performed sterling duties in the Black Sea and English Channel where they became a particular scourge

Churchill Crocodile Flamethrower David Fletcher, 2012-05-20 A fire breathing monster on the battlefield the Churchill Crocodile was one of the most awe inspiring weapons of World War II Tank expert David Fletcher chronicles the development of the flamethrower tank examining the dramatic effect of these tanks in battle from use in France to the terrifying attack on the Senio River in Italy as well as investigating the post war use of Crocodiles to burn down and sterilise the site of Belsen concentration camp and their mobilisation for the Korean War Researched using the papers of Reginald Fraser the genius behind the flamethrowers and dramatically illustrated with detailed artwork and previously unpublished photographs this book brings to life the true terror of these tanks

Modern Israeli Tanks and Infantry Carriers 1985-2004 Marsh Gelbart, 2012-05-20 Over the last two decades of the 20th century the Israel Defence Force IDF introduced a variety of new AFVs Old models such as the M48 and M60 were improved beyond recognition in the form of the Magach 7 The performance of Israel's indigenous Merkava tank was similarly enhanced with new variants and the new Merkava 4 MBT entered service

Israeli infantry also received machines such as the Achzarit assault carrier the Puma combat engineer vehicle and the Nagmachon and Nakpadon tank based carriers intended for low intensity conflicts Featuring illustrations this book examines the design modification and combat history of these formidable fighting machines *German Battleships 1914-18 (2)* Gary Staff,2012-01-20 Supported by official documents personal accounts official drawings and specially commissioned artwork this volume is an informative history of the key classes Kaiser K nig and Bayern that formed the backbone of the German Imperial Navy throughout World War I detailing the technological revolution that had taken place to enable the building of these large dreadnought classes **German Destroyers 1939-45** Gordon Williamson,2012-04-20 The German destroyer fleet of World War II consisted of nine classes the Diether Von Roeder Class the Leberecht Maas Class and the wartime classes Z23 Z35 Z37 Z40 Z43 Z46 and Z52 These vessels though fewer in number than the British destroyer fleet tended to be much bigger and more powerful than their allied counterparts They served their country well in operations in the Channel North Sea the Far North and in the rescue of civilians from East Prussia during the final days of the war This title describes their design development and operational use from the fjords of Narvik to the final days of the war
