What Johnny Shouldnt Read:

What Johnny Shouldn't Read Joan DelFattore,1992-01-01 Offers a behind the scenes view of the ways in which special interest groups influence the content of textbooks used in public and private schools throughout America This book describes six cases resulting from attempts to suppress information on evolution gun control and pacifism Visions of Schooling Rosemary C. Salomone,2000-01-01 At no time in the past century have there been fiercer battles over our public schools than there are now Parents and educational reformers are challenging not only the mission content and structure of mass compulsory schooling but also its underlying premise that the values promoted through public education are neutral and therefore acceptable to any reasonable person In this important book Rosemary Salomone sets aside the ideological and inflammatory rhetoric that surrounds today s debates over educational values and family choice She offers instead a fair minded examination of education for democratic citizenship in a society that values freedom of conscience and religious pluralism And she proposes a balanced course of action that redefines but does not sever the relationship between education and the state Salomone demonstrates how contemporary conflicts are the product of past educational and social movements She lays bare some of the myths that support the current government monopoly over education and reveals how it privileges those of economic means Through a detailed case study of recent controversy in a suburban New York school district the author explores the legal and policy issues that arise when widely disparate world views stand in the way of political compromise on educational materials techniques and programs Salomone builds a case for educational governance that places the developmental needs of the child at the center of family autonomy She advances a plan that respects diverse values and visions of schooling while preserving the core commitments that bind our nation **Cultural Politics and Education** Michael W. Apple,1996-06-15 Michael Apple offers a powerful analysis of current debates and a compelling indictment of rightist proposals for change Apple presents the causes and effects of further integrating schools into the corporate agenda as well as current calls for a national curriculum and national testing privatization and voucher plans and fundamentalist religious pressures to censor textbooks He demonstrates who will be the winners and losers culturally and economically as the conservative restoration gains in strength bringing with it an even greater restratification of knowledge and students in terms of race class and gender Studied Ignorance Herbert N. Foerstel,2013-05-23 Despite concerted efforts from our educators administrators and government American education continues to struggle The author of this work argues that the decline can be traced to censored curricula inaccurate textbooks test driven evaluations and increasing poverty among the student population Under the definition of failure specified in the No Child Left Behind Act more than 80 percent of American schools could currently be labeled as failing while the quality of American education overall and our students performance continue to rank unfavorably against international competition This book examines the crisis in American education and identifies how weaknesses in textbooks teaching and testing have created the crisis facing American

education a topic that dramatically affects students teachers and parents Author Herbert N Foerstel exposes the textbook wars that began a century ago and rage on with even more venom today His book traces the legal basis for curricular censorship that dates back 75 years identifies the bizarre process by which shoddy textbooks have been written published and come to be widely accepted and documents the disastrous effect that reliance on these materials has had on the curriculum Foerstel also supplies a careful assessment of the current political debate over education reform and of the proposed solutions to these problems
