Why We Get Sick The New Science Of Darwinian Medicine:

Why We Get Sick Randolph M. Nesse, MD, George C. Williams, 2012-02-08 The next time you get sick consider this before picking up the aspirin your body may be doing exactly what it is supposed to In this ground breaking book two pioneers of the science of Darwinian medicine argue that illness as well as the factors that predispose us toward it are subject to the same laws of natural selection that otherwise make our bodies such miracles of design Among the concerns they raise When may a fever be beneficial Why do pregnant women get morning sickness How do certain viruses manipulate their hosts into infecting others What evolutionary factors may be responsible for depression and panic disorder Deftly summarizing research on disorders ranging from allergies to Alzheimer's and from cancer to Huntington's chorea *Why We Get Sick* answers these questions and more The result is a book that will revolutionize our attitudes toward illness and will intrigue and instruct lay person and medical practitioners alike

Why We Get Sick Randolph M. Nesse, 1995 *The Routledge Companion to Philosophy of Medicine* Miriam Solomon, Jeremy R. Simon, Harold Kincaid, 2016-10-04 The Routledge Companion to Philosophy of Medicine is a comprehensive guide to topics in the fields of epistemology and metaphysics of medicine It examines traditional topics such as the concept of disease causality in medicine the epistemology of the randomized controlled trial the biopsychosocial model explanation clinical judgment and phenomenology of medicine and emerging topics such as philosophy of epidemiology measuring harms the concept of disability nursing perspectives race and gender the metaphysics of Chinese medicine and narrative medicine Each of the 48 chapters is written especially for this volume and with a student audience in mind For pedagogy and clarity each chapter contains an extended example illustrating the ideas discussed This text is intended for use as a reference for students in courses in philosophy of medicine and philosophy of science and pairs well with The Routledge Companion to Bioethics for use in medical humanities and social science courses

Why Black People Die Sooner Joseph L. Graves, Jr., 2025-11-11 There is a persistent gap in life expectancy between Black people and their white counterparts in the United States It is a direct result of structural racism within American society and has nothing to do with genetic differences In past eras scientific racism sought to shift the blame to the supposed physical inferiority of people of African descent Even today medicine labors under false beliefs derived from nineteenth century racial thinking harming patients who are not of European descent *Why Black People Die Sooner* is a powerful and rigorous examination of the ways racism shapes health and disease Joseph L Graves Jr demonstrates that the medical profession still fails to grasp basic facts about race tracing how deep rooted falsehoods have perpetuated the disparity between Black and white lifespans He equips readers with the tools to dispel the fallacies and errors of racialized medicine including an understanding of evolutionary biology and human biological variation Graves also debunks common misconceptions about race and health on topics such as high blood pressure sickle cell disease the microbiome infectious diseases and cancer *Why Black People Die Sooner* closes by offering a sweeping vision for dismantling medical racism from

professional training to clinical practice through biomedical research Timely and bracing this book reveals why medicine keeps misunderstanding race and how we can make it change **Evolution** Michael Ruse, Joseph Travis, 2009-02-28

Spanning evolutionary science from its inception to its latest findings from discoveries and data to philosophy and history this book is the most complete authoritative and inviting one volume introduction to evolutionary biology available Clear informative and comprehensive in scope Evolution opens with a series of major essays dealing with the history and philosophy of evolutionary biology with major empirical and theoretical questions in the science from speciation to adaptation from paleontology to evolutionary development evo devo and concluding with essays on the social and political significance of evolutionary biology today A second encyclopedic section travels the spectrum of topics in evolution with concise informative and accessible entries on individuals from Aristotle and Linnaeus to Louis Leakey and Jean Lamarck from T H Huxley and E O Wilson to Joseph Felsenstein and Motoo Kimura and on subjects from altruism and amphibians to evolutionary psychology and Piltdown Man to the Scopes trial and social Darwinism Readers will find the latest word on the history and philosophy of evolution the nuances of the science itself and the intricate interplay among evolutionary study religion philosophy and society Appearing at the beginning of the Darwin Year of 2009 the 200th anniversary of the birth of Charles Darwin and the 150th anniversary of the publication of the Origin of Species this volume is a fitting tribute to the science Darwin set in motion Handbook of the Philosophy of Medicine Thomas Schramme, Mary Jean Walker, 2025-09-30
