Transformative Arts Gary A. Berg, 2024-03-02 Traditional fine arts are often regarded as rarefied something accessed by the uniquely talented and displayed in impressive museums or on lavish stages Art thusly conceived is something that most people never practice in their lives Yet in day to day life we all experience creative satisfaction through interaction with the physical and social environment that is a form of artistic practice In Transformative Arts Biological Digital and Everyday Aesthetics Gary A Berg explores what we gain through understanding ways to live imaginative lives and considers the increasingly important collaborative role of computers and interaction with nature **Candor and Perversion** Roger Shattuck, 1999 he is an expert at intellectual and moral triage sorting patiently through the tangle of mixed motives that make for art admiring the candor admonishing the perversion **Art and Art-Attempts** Christy Mag Uidhir, 2013-06-27 Although few philosophers agree about what it is for something to be art most if not all agree on one thing art must be in some sense intention dependent Art and Art Attempts is about what follows from taking intention dependence seriously as a substantive necessary condition for something's being art Christy Mag Uidhir argues that from the assumption that art must be the product of intentional action along with basic action theoretic account of attempts goal oriented intention directed activity follows a host of sweeping implications for philosophical enquiry into the nature of art and its principal relations such as authorship art forms and art ontology e.g An informative distinction between art non art and failed art that any viable theory of art must capture A far more productive minimal framework for authorship not only capable of systematically addressing issues of collective authorship appropriation etc but also one according to which artists just are authors A coherent and structurally precise account of art forms based upon the relation between artists artworks and the sortal properties thereof A unified and far less metaphysically suspect ontology of art according to which if there are such things as artworks then

artworks must be concrete things Ultimately Mag Uidhir aims neither to propose nor to defend any particular precise answer to the question What is art Instead he shows the ways in which taking intention dependence seriously as a substantive necessary condition for being art can be profoundly revelatory and perhaps even radically revisionary as to the scope and limits of what any particular precise answer to such a question could viably be

Survival of the Beautiful David Rothenberg,2012-02-02 A brilliant investigation of why nature is beautiful and how art has influenced science Rothenberg's passionate optimism a belief in the beauty of nature and vice versa together with his elegant prose turns *Survival of the Beautiful* into an exhilarating and thought provoking trip Sunday Telegraph The peacock's tail makes me sick Charles Darwin once said not aesthetically but because the theory of evolution as adaptation can't explain why nature is so beautiful It took the concept of sexual selection for Darwin to explain the emergence of beauty a process that has more to do with aesthetic taste than adaptive fitness *Survival of the Beautiful* is a revolutionary new examination of the interplay of beauty art and culture in evolution Taking inspiration from Darwin's observation that animals have a natural aesthetic sense philosopher and musician David Rothenberg probes why animals humans included have an innate appreciation for beauty and why nature is indeed beautiful
