New Frontiers in Mining Complex Patterns Annalisa Appice,Michelangelo Ceci,Corrado Loglisci,Elio Masciari,Zbigniew W. Raś,2017-07-01 This book features a collection of revised and significantly extended versions of the papers accepted for presentation at the 5th International Workshop on New Frontiers in Mining Complex Patterns NFMCP 2016 held in conjunction with ECML PKDD 2016 in Riva del Garda Italy in September 2016 The book is composed of five parts feature selection and induction classification prediction

clustering pattern discovery applications **Autocar** ,2006 Fracture Andrés Neuman,2020-05-05 Critically acclaimed prize winning author Andr s Neuman s *Fracture* is an ambitious literary novel set against Japan s 2011 nuclear accident in a cross cultural story about how every society remembers and forgets its catastrophes Mr Yoshie Watanabe a former electronics company executive and a survivor of the atomic bomb has always lived like a fugitive from his own memories He s spent decades traveling the world making a life in different languages only to find himself home again living in Tokyo in his old age On the afternoon of March 11 2011 Watanabe like millions of others is stunned by powerful tremors A massive earthquake has struck to the north triggering the Fukushima nuclear disaster and a stirring of the collective past As the catastrophe unfolds Watanabe s mind too undergoes a tectonic shift With his native land yet again under nuclear threat he braces himself to make the most surprising decision of his nomadic life Meanwhile four women who have known him intimately at various points in time narrate their stories to a strangely obsessive Argentinian journalist Their memories colored by their respective cultures and describing different ways of loving trace sociopolitical maps of Paris New York Buenos Aires and Madrid over the course of the twentieth century The result is a metalingual border defying constellation of fractures in life and nature proof that nothing happens in only one place that every human event reverberates to the ends of the earth With unwavering empathy and bittersweet humor and facing some of the most urgent environmental concerns of our time Andr s Neuman s *Fracture* is a powerful novel about the resilience of humankind and the beauty that can emerge from broken things **Autonomous Vehicles for Public Transportation** Călin Iclodean,Bogdan Ovidiu Varga,Nicolae Cordoș,2022-11-26 This book presents an interdisciplinary approach to autonomous driving technology design and development It discusses a methodology of simulation that allows specialists to evaluate autonomous vehicle sensors functionality and integration energy flow efficiency range and service under public transport The design calibration and physical model behind each autonomous vehicle sensor and component is explained For each specific vehicle the powertrain is analyzed and output results are presented through the use of specific automotive industrial software IPG CarMaker The book gives the reader a clear perspective of the key factors influencing the global functionality of autonomous shuttle buses with respect to both their inner components the variable exterior factors and an exhaustive legal perspective in relation of their presence on public roads *Build To Order* Glenn Parry,Andrew Peter Graves,2008-07-23 Over the past 100 years the European Automotive Industry has been repeatedly challenged by best practice First by the United States through the development of mass production pioneered by Henry Ford and more recently by lean production techniques as practised by the leading Japanese producers particularly Toyota It has consistently risen to these challenges and has shown it can compete and even outperform its competitors with world class products However the European dustry is now faced with growing competition and growth from new emerging low cost countries and needs to re define its competitive advantage to remain at the forefront of the sector Automotive growth is driven by two factors new m kets and new technologies Global

competition is increasing with technology and product differentiation becoming the most important sales factors but with continued cost pressure Within the market the winners will be more profitable and the losers will disappear The Automotive Industry makes a significant contribution to the socio economic fabric of the European Union Manufacturing output represents 700 billion and research and development spending 24 billion European automotive suppliers number 5000 member companies and represent 5 million employees and generate 500 billion in revenues These are significant figures that generate wealth and high value employment within the EU European firms must consistently improve their competitive position to ensure that the industry does not migrate to growing new markets *Pragmatic Strategy* Ikujiro

Nonaka,Zhichang Zhu,2012-05-24 Pragmatism is enjoying a renaissance in management studies and the social sciences Once written off as amoral relativist and opposed to the ideals of Truth Reason and Progress it is now regaining influence in public policy international relations and business strategy But what can pragmatism teach us about strategy How can pragmatic strategies help businesses to succeed This innovative book presents a pragmatic framework for shaping and solving strategic problems in a practical creative ethical and finely balanced manner To achieve this the authors draw from Confucian teaching American pragmatism and Aristotelian practical wisdom as well as business cases across industries and nations particularly from emerging economies With significant theoretical depth direct practical implication and profound cultural sensitivity the book is useful for executive managers public administrators strategy researchers and advanced students in the search for pragmatic strategies in an interconnected fast moving world **New Frontiers in Mining Complex Patterns**

Michelangelo Ceci,Corrado Loglisci,Giuseppe Manco,Elio Masciari,Zbigniew Ras,2020-05-13 This book constitutes the refereed post conference proceedings of the 8th International Workshop on New Frontiers in Mining Complex Patterns NFMCP 2019 held in conjunction with ECML PKDD 2019 in W rzburg Germany in September 2019 The workshop focused on the latest developments in the analysis of complex and massive data sources such as blogs event or log data medical data spatio temporal data social networks mobility data sensor data and streams **Globalization and a Shrunken World** Dr.

Subhrendu Bhattacharya,2011-12-13 The book deals with pros and cons of Globalization and its focus extends both to the home and host countries While Globalization has been beneficial it has not been without challenges for both home and host countries There are many areas where the host countries tend to benefit significantly from Globalization The interface with the global economy unleashes a lot of positive energy in the economic systems of the affected countries particularly in the host country s economy The book deals with the challenge of immigration which the developed countries are facing as an offshoot of inclusiveness that comes with Globalization Increased debt intensity in some of the developed economies have resulted from their integration with the World economy which many countries have witnessed since early 1990s The book also delves into how the phenomenon of Globalization has been leveraged by some countries more than others While US has been the leader in unleashing Globalization India an effervescent democracy have gained substantially from this trend having
