Clinical Handbook of Internal Medicine Will Maclean,2002 *World Century Compendium to Tcm (a 7-Volume Set)* Hong-Zhou Wu,Zhao-Qin Fang,Pan-Ji Cheng,2013 Traditional Chinese medicine TCM with a history of thousands of years is the crystallization of the ancient Chinese people s experiences in their struggle against diseases It is also an integral part of their splendid culture Under the influence and direction of classic Chinese philosophies it has undergone long term medical practice and infiltrated into as well as absorbed from other subjects in that point in time thus gradually evolving into a unique medical theoretical system that contributed and is still contributing significantly to the healthcare of the Chinese and the prosperity of the Chinese nation This is the first of a 7 volume set encompassing all essential elements of TCM ranging from Basic Theory Diagnosis and Prescription to Chinese Materia Medica Tui Na and Acupuncture The basic theories of TCM are the theoretical foundations for guiding traditional Chinese preventive medicine and clinical medicine and encompass aspects such as the philosophical foundation for TCM understanding the effects of TCM on the physiology and pathology of the human body and the principles in TCM for life cultivation rehabilitation diagnostics and therapeutics In this sense the basic theories are regarded not only as an important part of TCM but also as a compulsory course fundamental to the study and research of TCM This book is compiled to allow the majority of readers to understand the theory of TCM and its methods of diagnosing and treating diseases in a relatively short period of time It provides a brief introduction to the basic

characteristics and theory of TCM and a detailed schedule of learning commonly occurring diseases and patterns and their estimated 60 corresponding prescriptions This is a great attempt in initiating more people to understand and apply the theory of TCM to diagnose and treat common diseases and provide corresponding formulas This is the second of a 7 volume set encompassing all essential elements of TCM ranging from Basic Theory Diagnosis and Prescription to Chinese Materia Medica Tui Na and Acupuncture The 21st century is the start of an era where people are beginning to look at health and medical care from a different perspective Understanding the conventional pattern of medical treatment alone has ceased to meet the ever growing demands of social development and hence the trend of exploiting natural therapies has gradually emerged Besides turning to Chinese medicine as an option for treatment increasingly the principles and practices used in this field have been garnering more interest This is exactly the reason why this book is compiled It is our hope that the contents can be of help to the readers to not only understand but suitably apply Chinese medicine in practice and thus benefit their health This is the third of a 7 volume set encompassing all essential elements of TCM ranging from Basic Theory Diagnosis and Prescription to Chinese Materia Medica Tui Na and Acupuncture This book aims to provide readers with adequate knowledge for clinical application of Chinese medicine which is in line with the fundamental principle of correspondence of Chinese medicinals and patterns It contains a brief introduction to relative theories divides these medicinals by actions into categories such as exterior releasing heat clearing purgative dampness dispelling fluid retention disinhibiting interior warming qi regulating blood invigorating blood stanching food accumulation relieving phlegm cough and wheezing arresting mind tranquilizing liver calming orifices opening tonifying astringing and worm dispelling and elaborates each herb in terms of its actions quality indications usage and dosage Furthermore mnemonics and simple and effective formulas are included to help readers effectively grasp the concepts behind practical applications and precautions and daily practices are specifically designed to support readers in easily understanding and retaining the information This is the fourth of a 7 volume set encompassing all essential elements of TCM ranging from Basic Theory Diagnosis and Prescription to Chinese Materia Medica Tui Na and Acupuncture Chinese internal medicine is a clinical subject which explains using traditional Chinese theories the etiology pathology and therapeutic rules of the diseases or syndromes belonging to internal medicine It is also the foundation for learning and research in other clinical branches of Chinese medicine thus playing a vital role in traditional Chinese medicine TCM Chinese internal medicine has had a long history Its origins can be traced back several thousand years Through long term diagnostic and therapeutic practices a rich collection of experiences and theories in Chinese internal medicine has been accumulated and this has gradually evolved into a complete distinctive and effective clinical branch In recent decades Chinese internal medicine has also undergone more significant developments especially in the treatment of cardiac or cerebral vascular diseases digestive tract diseases renal diseases and autoimmune diseases In order to popularize Chinese internal medicine and allow readers to grasp its basic theories as well

as diagnostic and therapeutic methods we wrote this book in a language easily comprehensible by the layman For ease of learning by modern doctors we proceeded from the current clinical practice and outlined the contents with Western disease names There are more than 80 diseases discussed in this book For each disease the Chinese syndrome differentiation and treatment as well as modern diagnostic key points are provided to make it more convenient for the readers to study and understand The study of each disease should begin from its etiology pathology and diagnostic key points followed by the differentiated patterns and corresponding treatments The respective points of caution for each disease should also be well noted Finally the questions forming the Daily Exercises are useful for readers to check their comprehension and recall of the material Given the chance the theoretical knowledge should also be applied in clinical practice so that past knowledge is tested and new clinical knowledge and skills can be learned Indices to the prescriptions are supplemented at the end so as to facilitate study and consultation This book is suitable for those who are enthusiastic about TCM and with basic medical knowledge as well as clinical TCM doctors nursing personnel and TCM students This is the fifth of a 7 volume set encompassing all essential elements of TCM ranging from Basic Theory Diagnosis and Prescription to Chinese Materia Medica Tui Na and Acupuncture With increased demands on medical health care due to societal developments the sole dependence on modern medicine or Western medicine is clearly insufficient Traditional Chinese medicine once derided by many in the west is now firmly in the global limelight due to its numerous advantages in preventing and treating diseases Chinese medicine achieves its curative effects by making use of natural therapies such as animal and plant parts which are of interest to many doctors and patients who are in favor of rectifying the entire state of the body For over two thousand years Chinese medicinal formulas have been extensively used in China as the main technique to prevent and treat The accordance of formula and disease pattern is the most specific objective stable and recurrently effective aspect of treatment based on pattern differentiation which will be introduced in this book as a reliable analytical method In this book the fundamental concepts of Chinese medicine methods of conducting pattern differentiation and composing principles of formulas and integration of indispensable courses of Chinese medicine such as basic theories diagnostic methods Chinese medicinals formulas treatment principles internal medicine and warm diseases will be discussed opening a door for novices who are interested to learn more about Chinese medicine Through self study of this book in a relatively short duration it is our hope that the reader will be familiar with and preliminarily apply the basic theories of Chinese medicine and formulas in practice This not only serves to prevent and treat diseases but more importantly contributes to the spread of traditional Chinese medicine This is the sixth of a 7 volume set encompassing all essential elements of TCM ranging from Basic Theory Diagnosis and Prescription to Chinese Materia Medica Tui Na and Acupuncture Acupuncture and moxibustion are one of the most important contributions our ancestors have made to humankind In the narrow sense acupuncture and moxibustion refer to medical therapy whilst broadly they are an integral science consisting of four subdisciplines the subject of meridians and

acupoints the subject of acupuncture and moxibustion techniques the subject of acupuncture and moxibustion therapy and the subject of experimental acupuncture and moxibustion This is the final of a 7 volume set encompassing all essential elements of TCM ranging from Basic Theory Diagnosis and Prescription to Chinese Materia Medica Tui Na and Acupuncture Traditional Chinese tui na one of the earliest medical treatment methods with a long history tracing back to ancient times is an important component of traditional Chinese medicine TCM This book is compiled with the aim of popularizing tui na modality along with allowing readers to understand and master the fundamental theories basic techniques commonly used acupoints and parts and diagnosis and treatment methods of diseases in a relatively short period of time The book is a summary of clinical experiences of tui na with practical contents and detailed illustrations which can be easily appreciated and serve both purposes of the popularization of tui na and adva9789086862290 This book provides a better understanding of the changing roles of non governmental organizations NGOs in promoting sustainability of small and medium sized enterprises SMEs in Peru The book focuses on the domains of organic production business social responsibility and sustainable production The innovative study uses a combination of network and discourse analyses to identify the main patterns and shifts in the roles of NGOs in order to deal with sustainability and the market Two major contemporary sociological theories ecological modernization theory and network society theory are applied to frame the analysis
