Space and Muslim Urban Life Simon O'Meara, 2007-08-09 This book develops academic understanding of Muslim urban space by pursuing the structural logic of the premodern Arab Muslim city or medina With particular reference to *The Book of Walls* an historical discourse of Islamic law whose primary subject is the wall the book determines the meaning of a wall and then uses it to analyze the space of Fez One of a growing number of studies to address space as a category of critical analysis the book makes the following contributions to scholarship Methodologically it breaks with the tradition of viewing Islamic architecture as a well defined object observed by a specialist at an aesthetically directed distance rather it inhabits the logic of this architecture by rethinking it discursively from within the culture that produced it Hermeneutically it sheds new light on one

of North Africa's oldest medinas and thereby illuminates a type of environment still common to much of the Arab Muslim world. Empirically it brings to the attention of mainstream scholarship a legal discourse and aesthetic that contributed to the form and longevity of this type of environment and it exposes a preoccupation with walls and other limits in premodern urban Arab Muslim culture and a mythical paradigm informing the foundation narratives of a number of historic medinas. Presenting a fresh perspective for the understanding of Muslim urban society and thought, this innovative study will be of interest to students and researchers of Islamic studies, architecture and sociology.

Thermal Comfort in Hot Dry Climates Ahmadreza Foruzanmehr, 2017-09-14 With increases in global temperatures the risk of overheating is expected to rise around the world. This results in a much higher dependency upon energy intensive cooling systems and air conditioners to provide thermal comfort, but how sustainable is this in a world where problems with the production of electricity are predicted? Vernacular houses in hot and dry central Iran have been adapted to the climate through passive cooling techniques and this book provides a valuable assessment of the thermal performance of such housing. Shedding new light on the ability of traditional housing forms to provide thermal comfort, *Thermal Comfort in Hot Dry Climates* identifies the main cooling systems and methods in traditional houses in central Iran and examines how architectural elements such as central courtyards, distinct seasonal rooms, loggias, basements and wind catchers can contribute to the provision of thermal comfort in vernacular houses.
