

The background of the cover is a close-up photograph of several ginkgo leaves. The leaves are a vibrant yellow-green color, showing the characteristic fan shape and the fine, parallel veins that radiate from the base. They are set against a dark, almost black background, which makes the leaves stand out. The lighting is soft, highlighting the texture and edges of the leaves.

What Will Influence The Future Of Alternative Medicine? A World Perspective Daniel Eskinazi, 2001-06-04 This book provides an overview of

factors that have influenced and will continue to influence the development of alternative traditional medicine in the world. Traditionally the lack of relevant good quality scientific research is often the reason why a large number of healthcare practices are labeled alternative. However, nonscientific factors may be at least as important as the scientific ones. Among such factors are cultural, political, administrative, and economic considerations. The articles in this volume provide an international perspective on how such pervasive factors impact on the development, research, and practice of alternative medicine in the world.

Traditional Medicines Around the World Matthew N. O. Sadiku, Janet O. Sadiku, Sarhan M. Musa, 2022-05-18 Our health is our most important asset. Health and the provision of healthcare is fundamental to the welfare of any nation. The desire to have and sustain good health cuts across national, cultural, geographic, and political boundaries. Every region of the world has had one form of traditional medicine at some stage in its history. Traditional medicines have been a part of human history all over the world, with knowledge being transferred from generation to generation. It refers to diverse health practices, knowledge, and skills based on ancient indigenous experience that are used to maintain health as well as to cure, diagnose, or prevent illness. This book focuses on ten most popular traditional medicines around the world. It is a valuable source of guidance and direction for organizations and individuals interested in traditional medicine. It provides an introduction to traditional medicine so that beginners can understand it, its increasing importance, and its developments in contemporary time. It is a must-read book for anyone who cares about traditional medicine.

African Traditional Medicine: Autonomy and Informed Consent Peter Ikechukwu Osuji, 2014-07-18 This book focuses on informed consent in African Traditional Medicine. ATM forms a large portion of the healthcare systems in Africa. WHO statistics show that as much as 80% of the population in Africa uses traditional medicine for primary health care. With such a large constituency, it follows that ATM and its practices should receive more attention in bioethics. By comparing the ethics of care approach with the ATM approach to Relational Autonomy In Consent (RAIC), the authors argue that the ATM focus on consent based on consensus constitutes a legitimate informed consent. This book is distinctive insofar as it employs the ethics of care as a hermeneutic to interpret ATM. The analysis examines the ethics of care movement in Western bioethics to explore its relational approach to informed consent. Additionally, this is the first known study that discusses healthcare ethics committees in ATM.

Global Perspectives on Palliative Care Karen Bullock, 2025-06-04 Global Perspectives on Palliative Care is a compilation of twelve chapters consisting of research reports, integrative literature reviews, case studies, and expert perspectives that explore palliative care through the lens of a global scope of practice across healthcare disciplines, including social work, nursing, psychology, and medicine. All chapters are written by global researchers and edited by a leading expert in the field of serious illness care. Each chapter is an original work that is transferable across various health settings, patient populations, and levels of professional specialties, intended to promote culturally inclusive and equitable care across illness/disease conditions aimed at relieving serious health-related suffering, whether physical, psychological, social, or spiritual.

Global Perspectives on

Science and Christianity Mike Brownutt, Keith R. Fox, 2024-09-30 The discussion of how science and Christianity relate to each other is a truly global one Christianity around the world encompasses diverse sets of perspectives ideas and challenges Similarly the practice and perception of science can vary significantly from one region to another When brought together in their global contexts we find a richness in the engagement between science and Christianity that leads to diverse questions and distinctive answers *Global Perspectives on Science and Christianity* brings together scholars from six continents hailing from disciplines of natural and social sciences theology history and philosophy to provide a unique collection of perspectives on how science and Christianity relate around the world Tackling some issues that are seldom addressed as well as providing fresh perspectives on perennial topics this is an important relevant and genuinely global contribution to the discussion

Clarke, 2013-11-05 Since the 1960s virtually every part of the world has seen the arrival and establishment of Japanese new religious movements a process that has followed quickly on the heels of the most active period of Japanese economic expansion overseas This book examines the nature and extent of this religious expansion outside Japan

Global Epistemologies and Philosophies of Science David Ludwig, Inkeri Koskinen, Zinhle Mncube, Luana Poliseli, Luis Reyes-Galindo, 2021-07-29 In bringing together a global community of philosophers *Global Epistemologies and Philosophies of Science* develops novel perspectives on epistemology and philosophy of science by demonstrating how frameworks from academic philosophy e.g. standpoint theory social epistemology feminist philosophy of science and related fields e.g. decolonial studies transdisciplinarity global history of science can contribute to critical engagement with global dimensions of knowledge and science Global challenges such as climate change food production and infectious diseases raise complex questions about scientific knowledge production and its interactions with local knowledge systems and social realities As academic philosophy provides relatively little reflection on global negotiations of knowledge many pressing scientific and societal issues remain disconnected from core debates in epistemology and philosophy of science This book is an invitation to broaden agendas of academic philosophy by presenting epistemology and philosophy of science as globally engaged fields that address heterogeneous forms of knowledge production and their interactions with

local livelihoods practices and worldviews This integrative ambition makes the book equally relevant for philosophers and interdisciplinary scholars who are concerned with methodological and political challenges at the intersection of science and society

Global Aging Suzanne R. Kunkel, J. Scott Brown, PhD, Frank J. Whittington, PhD, Jasleen Chahal, 2014-02-03 This book is

exemplary in amassing demographic policy and sociopsychological data from around the world to refute both premises that countries aging is not occurring in developing nations and that aging of the population presents intractable predicaments. The content of the book is rich with current information seldom accumulated into one source. For a scholar of aging studies the topics are comprehensive including demographics, political systems, health and long term care provision, employment, retirement and formal and informal support systems. Structurally the book adds value with the inclusion of Web resources and a robust index. The design is conducive for a classroom setting by incorporating discussion questions and key words at the end of each chapter.

Dr. Carol A. Gosselink, *PsycCritiques*: Using a comparative cross national perspective, *Global Aging: Comparative Perspectives on Aging and the Life Course* explores the major topics in social gerontology worldwide and the demands that the aging population places on a society. This comprehensive and timely guide includes contributions from international gerontology scholars and illustrates both universal and socioculturally unique aspects of aging across nations. It is organized thematically for ease of use and includes an abundance of photographs and illustrations to highlight key points.

Key features: Discussions on various nations' policies and programs designed to meet the unique needs of an older population. An essay on pension and income maintenance policies and programs. An analysis of the role of local and national governments as well as non governmental organizations in serving older adults. Case studies on specific aspects of aging, family life, caregiving policies and politics, health and long term care and work and retirement.

The most current demographic data on aging around the world.
