Trafficking The Good Life:

Trafficking the Good Life (Large Print 16pt) Jennifer Myers, 2013-08-19 An all American midwestern farm girl Jennifer Myers had worked hard toward a successful career as a dancer in Chicago But just as her star was rising she fell for the kingpin of a drug trafficking operation Drawn to his life of excitement she soon acquiesced to driving marijuana across the country making easy money she stacked in shoeboxes and spent like an heiress Steeped inside moral ambiguity she sought to cleanse her soul with the guidance of spiritual gurus and New Age prophets to no avail Only time in a federal prison made her face up to and understand her choices It was there at rock bottom that she discovered that her real prison was the one she had unwittingly made inside herself and where she could start rebuilding a life of purpose and ethical pursuit

[Naming Our Sins](#) Jana Bennett, David Cloutier, 2019-05-24 What would it take to renew our ability to name our sins in a meaningful and pertinent way Naming sins is a particularly important task for Catholic moral theology but it is one that often falls back into a paradigm of simple violations of rules While laws and commandments are essential Vatican II's universal call to holiness and the revival of virtue ethics require moving further Yet in part because moral theologians today tend to be lay people not priests there has been a de emphasis on

the confession of sins Contemporary questions like poverty racism and abortion are usually connected to questions about sin in some way but they are disconnected from the idea of naming specific sins in the sacrament of penance Lay moral theologians raise these issues in a way that makes clear their implications for a parish social justice committee or the voting booth but not their implications for the naming of sins in the sacrament of reconciliation Naming Our Sins proposes to re make that connection the moral theologian s task of helping people name individual sins needs to be restored though in ways distinctive from dominant pre Vatican II notions In this volume editors Jana Bennett and David Cloutier gather some of the best of the current generation of moral theologians in order to reflect on the classic tradition of the vices It is crucial to the Christian understanding of sin that we recognize a we bear at least some responsibilities for injuries and b God wants us to participate in the process of healing and conversion Neither the sin itself nor the healing simply come from somewhere else the task of naming sins enlists us as mature growing disciples Each chapter takes on a different classical vice describing the vice exploring its dimensions in contemporary experience and moving the reader toward naming specific sins that arise from the vice The concluding chapters from Catholic priests explore two basic dimensions of the sacrament of penance liturgical and communal

Potentials of disorder Jan Koehler, Christoph Zuercher, 2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license This book deals with the institutional framework in post socialist after empire spaces It consists of nine case studies and two contributions of a more theoretical nature Each of these analytical narratives sheds some light on the micro politics of organised violence After 1990 Serbs and Croats were competing over access to the resources needed for institution building and state building Fear in turn triggered ethnic mobilisation An unprofessional riot of Serbs in the Krajina region developed into a professional war between Serbs and Croats in Croatia in which several thousand died and several hundred thousand people were forcefully expelled from their homes The Herceg Bosnian style of resistance can be

surprisingly effective It is known that most of the heroin transported along the Balkans route passes through the hands of Albanian mafia groups that this traffic has taken off since summer 1999 The concept of Staatnation is based on the doctrine according to which each nation must have its own territorial State and each State must consist of one nation only The slow decline and eventual collapse of the Soviet and the Yugoslav empires was partly triggered partly accompanied by the quest for national sovereignty Dagestan is notable for its ethnic diversity and even by post Soviet standards its dramatic economic deprivation The integrative potential of cooperative movements at the republican the regional and the inter state level for the Caucasus is analyzed The book also offers insights into the economics of ending violence Finally it addresses the question of reconciliation after ethnic cleansing Globalization in Practice N. J. Thrift,Adam Tickell,Steve Woolgar,William H. Rupp,2014 The concept of globalization has become ubiquitous in social science and in the public consciousness and is often invoked as an explanation for a diverse range of changes to economies societies politics and cultures both as a positive liberating force and as a wholly negative one While our understanding of the politics economics and social resonance of the phenomenon has become increasingly sophisticated at the macro level this book argues that globalization too often continues to be depicted as a set of extra terrestrial forces with no real physical manifestation except as effects The essays challenge this dominant understanding of globalization from above through explorations of the mundane means by which globalization has been achieved Instead of a focus on the meta political economy of global capitalism the book concentrates on the everyday life of capitalism the not so little things that keep the large forces of globalization ticking over With its eye on the mundane the book demonstrates that a series of everyday and consequently all but invisible formations critically facilitate and create the conditions under which globalization has flourished The emphasis is on concrete moments in the history of capitalism when these new means of regular reproduction were invented and deployed Only by understanding these infrastructures can we understand the dynamics of globalization In short punchy essays by distinguished researchers from across a range of disciplines this book provides a new way of understanding globalization moving away from the standard accounts of global forces economic flows and capitalist dynamics to show how ordinary practices and artefacts are crucial elements and symbols of globalization **Discovering the World Through Debate** William J. Driscoll,Joseph P. Zompetti,2003 This book provides a guide to Karl Popper Debate a format of educational debate It discusses the nature of political debate and presents a series of practical rules and guidelines for debaters outlining steps for preparing for a debate and creating a strong case and examining one debate in detail **Decoding Albanian Organized Crime** Jana Arsovska,2015-02-06 The expansion of organized crime across national borders has become a key security concern for the international community In this theoretically and empirically vibrant portrait of a global phenomenon Jana Arsovska examines some of the most widespread myths about the so called Albanian Mafia Based on more than a decade of research including interviews with victims offenders and law enforcement across ten countries as well as court files and confidential

intelligence reports *Decoding Albanian Organized Crime* presents a comprehensive overview of the causes codes of conduct activities migration and structure of Albanian organized crime groups in the Balkans Western Europe and the United States Paying particular attention to the dynamic relationships among culture politics and organized crime the book develops a framework for understanding the global growth of the criminal underworld and provides a model for future comparative research
