Effective Fund-Raising Management Kathleen S. Kelly, 2012-12-06 In a ground breaking departure from existing works almost all of which are how to manuals based on anecdotal evidence this is the first academic textbook on fund raising. By integrating practical knowledge with social science theory and research it presents a comprehensive approach to the function from its legal and ethical principles to the managerial process by which gifts are raised. Territory previously uncharted in the literature is explored such as the historical and organizational contexts of contemporary practice. Explanations of programs techniques and public introductions introduce a new system for understanding fund raising's major concepts. Unlike efforts in established fields most of the material represents original scholarship undertaken to produce a first time text. The book's main purpose is to teach students about fund raising a high demand high paying occupation that will continue to expand into the 21st century as the need for trained practitioners exceeds the supply. During the last decade fund raising education moved into the formal classroom and away from an apprenticeship tradition of senior practitioners mentoring newcomers. Yet until now there has not been a textbook to support this evolving professionalism. Faculty have been reluctant to define fund raising as an academic subject in the absence of a theory based teaching resource and courses usually have been assigned to part time instructors hired from the practice. This textbook addresses the void. It is designed for graduate and upper level undergraduate courses dealing with fund raising as a primary or secondary subject. Among its features each chapter points out research gaps and opportunities such as problems and theories for master's theses and doctoral dissertations and ends with a list of suggested readings. The text is appropriate for the diverse academic areas in which fund raising nonprofit management and philanthropy are taught including public administration management arts and humanities education social work economics and sociology. Because of its public relations orientation it is particularly suited for courses offered in that discipline. Additional audiences are practitioners enrolled in professional development programs CEOs trustees and others interested in self study and scholars who need serious literature on the subject.

Rethinking Health Promotion Theodore Harney MacDonald, 1998 In today's world health means far more than merely the absence of illness. In *Rethinking Health Promotion* Theodore H. MacDonald sweeps away the confusion surrounding the function and position of health promotion. He argues that far from being a modern innovation health promotion has existed as a distinct and separate enterprise for as long as biomedicine and cautions against health promotion becoming organized merely an offshoot of medical care. Drawing on the author's experience as a World Health Organisation consultant the book also tackles the question of whether health promotion has relevance on an international scale or whether it is purely a eurocentric phenomenon. Against this background individual chapters explore universal factors such as sexual health diet unemployment alcohol and tobacco use. With its critical and historical approach this book breaks new ground in assessing health promotion.

and will be stimulating reading for the wide variety of students and professionals studying health promotion *Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education* Dailey-Hebert, Amber, Mandernach, B. Jean, Donnelly-Sallee, Emily, 2020-10-16 As the number of adjunct faculty teaching online courses remotely for their institutions continues to increase so do the unique challenges they face including issues of distance and isolation as well as problems pertaining to motivation time and compensation Not only are these higher education faculty geographically isolated from each other and their colleagues at flagship campuses but they also lack adequate institutional support and resources necessary to perform their roles As institutions continue to rely heavily on this group of under supported and undertrained instructors who teach the majority of online courses offered across the country institutions need models and strategies to tap the expertise and perspectives of this group not only to improve teaching and learning in online programs but also to retain this critical talent pool More consideration is needed to create institutional affinity and organizational commitment build community and create opportunities for remote adjunct faculty to be included as an integral component to their academic departments The Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education is a comprehensive reference work that presents research theoretical frameworks instructor perspectives and program models that highlight effective strategies innovative approaches and unique considerations for creating professional development opportunities for remote adjunct faculty teaching online This book provides concrete practices that foster inclusivity among contingent faculty teaching online as well as tangible practices that have been successfully implemented from faculty developers and academic leaders at institutions who have a large population of and heavy reliance on remote adjunct instructors While addressing topics that include faculty engagement mentoring programs and instructor resources this book intends to support remote instructors in the post pandemic world It is also beneficial for faculty development professionals academic administrative leaders higher education stakeholders and higher education faculty researchers and students
