Traumatic Stress Diagnosis Prevention Treatment:

Strom Thurmond National Defense Authorization Act for Fiscal Year ... United States. Congress. House, 2008

Risk Management of Terrorism Induced Stress Iryna Frankova, Lior Carmi, Oleg Chaban, Joseph Zohar, 2020-02-15

Terrorism is a psychological weapon by definition its purpose is to spread terror or fear in order to achieve goals unattainable by more conventional means It is a weapon of asymmetric warfare whose success or failure is entirely dependent on the psychological reactions of its targets Despite this interest in the effects of terrorism from a behavioral and psychological perspective is relatively recent dating initially from the 1990s and boosted by the events of September 11th 2001 This book presents papers delivered at the NATO Advanced Research Workshop ARW Risk Management of Terrorism Induced Stress Guidelines for the Golden Hours Who What and When held in Odesa Ukraine from 16 19 September 2018 The aim of the workshop was to bring together experts from the military science and policy to revisit old guidelines and inform new research into novel approaches The focus of the workshop was the so called Golden Hours the period immediately following a traumatic event in which therapeutic interventions are thought to have the most impact What needs to be done in the immediate aftermath of terror who is vulnerable and who is resilient and when is intervention appropriate The book is divided into sections covering the areas of biology interventions special populations additional perspectives policy d j vu and future directions Providing a comprehensive overview of the management of terror related stress the book will be of interest to planners and policy makers as well as mental health professionals working with PTSD and other consequences of terror events

Treatment for Posttraumatic Stress Disorder in Military and Veteran Populations Institute of Medicine, Board on the Health of Select Populations, Committee on the Assessment of Ongoing Efforts in the Treatment of Posttraumatic Stress Disorder, 2012-07-22 Prior to the military conflicts in Iraq and Afghanistan wars and conflicts have been characterized by such injuries as infectious diseases and catastrophic gunshot wounds However the signature injuries sustained by United States military personnel in these most recent conflicts are blast wounds and the psychiatric consequences to combat particularly posttraumatic stress disorder PTSD which affects an estimated 13 to 20 percent of U S service members who have fought in Iraq or Afghanistan since 2001 PTSD is triggered by a specific traumatic event including combat which leads to symptoms such as persistent re experiencing of the event emotional numbing or avoidance of thoughts feelings conversations or places associated with the trauma and hyperarousal such as exaggerated startle responses or difficulty concentrating As the U S reduces its military involvement in the Middle East the Departments of Defense DoD and Veterans Affairs VA anticipate that increasing numbers of returning veterans will need PTSD services As a result Congress asked the DoD in consultation with the VA to sponsor an IOM study to assess both departments PTSD treatment programs and services

Treatment for Posttraumatic Stress Disorder in Military and Veteran Populations Initial Assessment is the first of two mandated reports examines some of the available programs to prevent diagnose treat and rehabilitate those who have PTSD

and encourages further research that can help to improve PTSD care
