

Treating Dementia: Do We Have a Pill for It?

Treatments for age-related dementia and the growing reliance on pharmaceuticals to alleviate its worst symptoms raise a number of questions about attitudes toward aging and cognition, the relationship between growing older and getting sick, and the conflicting interests of patients, caregivers, physicians, scientists, and business. This volume aims to foster a constructive debate about the future of dementia treatment by providing multiple perspectives on these tangled issues. The first section examines how the concepts of dementia have expanded to encompass a broad range of symptoms and the implications of this evolution on the development of pharmaceutical treatments. The second section explores the use and effectiveness of drug treatments for dementia through the perspectives of a clinician, a researcher, and a layperson. In the third section, the contributors probe how culture, language, and values affect the overlapping worlds of pharmacology, drug marketing, and dementia treatment. A final section elucidates the thorny ethical and policy concerns surrounding the often-conflicting hopes for dementia medications. Featuring contributions from noted clinicians, researchers, and scholars from a broad range of disciplines, this multidisciplinary dialogue addresses central questions about the history and future of drug treatment for dementia and makes clear why there are no simple answers. Professionals and students involved in gerontology, psychiatry, and bioethics will find the discussion both enlightening and practical.

Treating Dementia Do We Have A Pill For It:

Doing Human Service Ethnography Katarina Jacobsson, Jaber F Gubrium, 2021-07-22 This book shows researchers how ethnography can be carried out within human service settings providing an invaluable guide on how to apply ethnographic creativeness and offering a more humanistic and context sensitive approach to generating valid knowledge about today's service work

Get Through MRCPsych CASC Melvyn Zhang Weibin, Cyrus Ho Su Hui, Roger Ho, Basant K. Puri, 2016-08-19 This book is intended for psychiatric trainees sitting the CASC component of the MRCPsych exam Written by authors with recent exam experience and long term expertise in the field the text provides 175 stations closely matched to the subjects that appear in the actual exam along with concise synopses and guidelines for how to target your revision to enable recall of the most relevant information

Geriatric Home-Based Medical Care Jessica L. Colburn, Bruce Leff, Mariah L. Robertson, Mattan Schuchman, 2024-11-25 Older adults are living longer with more chronic disease and functional impairment than at any other time in history Office based practice is inadequate to meet the needs of patients who have difficulty leaving their homes for routine or urgent visits and health care clinicians must choose between trying to manage their problems via telehealth or sending them to the emergency room via ambulance Indeed many clinicians receive little or no training in home based medical care and are unable to consider a home visit that might avert a health crisis or an emergency room visit Other clinicians know that house calls are possible but may not know how to work them into day to day practice In recent years a growing number of clinicians have focused their practice on home based medical care to meet the rising need In fact there has been a substantial increase in house calls provided to Medicare beneficiaries In 2023 over 750 000 traditional Medicare beneficiaries and in 2022 over 680 000 Medicare Advantage beneficiaries received longitudinal home based medical care While the number of house calls has increased rapidly the number of clinicians providing those visits has markedly decreased suggesting that clinicians who are providing such care are making it the sole focus of their practice This book is intended to be a practical reference for any clinician who has struggled to care for an older adult who has difficulty getting to the office By describing fundamental principles of geriatric house call medicine and application to specific diseases and conditions we hope to provide clinicians with the tools they need to provide timely compassionate and high quality care for their older adult patients The second edition has been updated to reflect changes in the healthcare system and approaches to care since the publication of the first edition
