frigid winter lake to save a drowning child Dr Fields is an internationally recognized neurobiologist and authority on the brain and the cellular mechanisms of memory He has spent years trying to understand the biological basis of rage and anomalous violence and he has concluded that our culture s understanding of the problem is based on an erroneous assumption that rage attacks are the product of morally or mentally defective individuals rather than a capacity that we all possess Fields shows that violent behavior is the result of the clash between our evolutionary hardwiring and triggers in our contemporary world Our personal space is more crowded than ever we get less sleep and we just aren t as fit as our ancestors We need to understand how the hardwiring works and how to recognize the nine triggers With a totally new perspective engaging narrative and practical advice Why We Snap uncovers the biological roots of the rage response and how we can protect ourselves and others Tree Climbers' Guide Sharon J.
