Bader, A. Bode, H.-J. Bungartz, 2014-03-31 Parallel computing has been the enabling technology of high end machines for many years Now it has finally become the ubiquitous key to the efficient use of any kind of multi processor computer architecture from smart phones tablets embedded systems and cloud computing up to exascale computers _x000D_ This book presents the proceedings of ParCo2013 the latest edition of the biennial International Conference on Parallel Computing held from 10 to 13 September 2013 in Garching Germany The conference focused on several key parallel computing areas Themes included parallel programming models for multi and manycore CPUs GPUs FPGAs and heterogeneous platforms the performance engineering processes that must be adapted to efficiently use these new and innovative platforms novel numerical algorithms and approaches to large scale simulations of problems in science and engineering _x000D_ The conference programme also included twelve mini symposia including an industry session and a special PhD Symposium which comprehensively represented and intensified the discussion of current hot topics in high performance and parallel computing These special sessions covered large scale supercomputing novel challenges arising from parallel architectures multi manycore heterogeneous platforms FPGAs multi level algorithms as well as multi scale multi physics and multi dimensional problems _x000D_ It is clear that parallel computing including the processing of large data sets Big Data will remain a persistent driver of research in all fields of innovative computing which makes this book relevant to all those with an interest in this field Mathematics of Program Construction Dexter Kozen, Carron Shankland, 2004-06-24 This book constitutes the refereed proceedings of the 7th International Conference on the Mathematics of Program Construction MPC 2004 held in Stirling Scotland UK in July 2004 The 19 revised full papers presented were carefully reviewed and selected from 37 submissions Among the topics addressed are programming theory programming methodology program specification program transformation programming paradigms programming calculi and programming language semantics **Automata, Languages and Programming** Lars Arge, 2007-06-29 This book constitutes the refereed proceedings of the 34th International Colloquium on Automata Languages and Programming ICALP 2007 held in Wroclaw Poland in July 2007 The 76 revised full papers presented together with 4 invited lectures were carefully reviewed and selected from 242 submissions The papers are grouped in three major tracks on algorithms automata complexity and games on logic semantics and theory of programming and on security and cryptography foundations

Proceedings of the ... International ACM SIGPLAN Conference on Principles and Practice of Declarative Programming ,2009 **New Trends in Software Methodologies, Tools, and Techniques** Hamido Fujita,Volker Gruhn,2004 Software is the essential enabler for the new economy and science It creates new markets and new directions for a more reliable flexible and robust society It empowers the exploration of our world in ever more depth However software often falls short behind our expectations Current software methodologies tools and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market Many approaches have been proven only as case by case oriented methods This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow s information society This book is an attempt to capture the essence of a new state of art in software science and its supporting technology The book also aims at identifying the challenges such a technology has to master and Conceptual Software Models Declarative Representation for Software Development Requirement Representation and Formalization Formal Specification and Language Interpretation Legacy Systems and Language Conversions Software Quality and Development Measurement and Software Development Practices Models examples Each of these chapters contains well reviewed and selected papers so the reader can enjoy the state of the art on the need on such new emerged technology *Advances in Computing and Network Communications* Sabu M. Thampi,Erol Gelenbe,Mohammed Atiquzzaman,Vipin Chaudhary,Kuan-Ching Li,2021-06-12 This book constitutes the thoroughly refereed post conference proceedings of the 4th International Conference on Computing and Network Communications CoCoNet 20 October 14 17 2020 Chennai India The papers presented were carefully reviewed and selected from several initial submissions The papers are organized in topical sections on Signal Image and Speech Processing Wireless and Mobile Communication Internet of Things Cloud and Edge Computing Distributed Systems Machine Intelligence Data Analytics Cybersecurity Artificial Intelligence and Cognitive Computing and Circuits and Systems The book is directed to the researchers and scientists engaged in various fields of computing and network communication domains *Trend in Engineering at the University of Washington Newsletter* ,1969 Database and Expert Systems Applications A Min Tjoa,Isidro Ramos,2012-12-06 The Database and Expert Systems Application DEXA conferences are mainly oriented to establish a state of the art forum on Database and Expert System applications But Practice without Theory has no sense as Leonardo said five centuries ago In this Conference we try a compromise between these two complementary aspects A total of 5 sessions are application oriented ranging from classical applications to more unusual ones in Software Engineering Recent research aspects in Databases such as activity deductivity and or Object Orientation are also present in DEXA 92 as well as the implication of the new data models such as OO Model Deductive Model etc included in the Modelling sessions Other areas of interest such as Hyper Text and Multimedia application together with the classical field of Information Retrieval are also considered Finally Implementation Aspects are reflected in very concrete fields A total of of nearly 200

papers submitted from all over the world were sent to DEXA 92 Only 90 could be accepted A Poster session has also been established DEXA 90 was held in Vienna Austria DEXA 91 in Berlin Germany and DEXA 92 will take place in Valencia Spain where we are celebrating the discovery of the New World just five centuries ago in Leonardo's age Both the quality of the Conference and the compromise between Practice and Theory are due to the credit of all the DEXA 92 authors
