**Flickers of Film** Jason Sperb,2015-12-15 Whether paying tribute to silent films in Hugo and The Artist or celebrating arcade games in Tron Legacy and Wreck It Ralph Hollywood suddenly seems to be experiencing a wave of intense nostalgia for outmoded technologies To what extent is that a sincere lament for modes of artistic production that have nearly vanished in an all digital era And to what extent is it simply a cynical marketing ploy built on the notion that nostalgia has always been one of Hollywood s top selling products In Flickers of Film Jason Sperb offers nuanced and unexpected answers to these questions examining the benefits of certain types of film nostalgia while also critiquing how Hollywood s nostalgic representations of old technologies obscure important aspects of their histories He interprets this affection for the prehistory and infancy of digital technologies in relation to an industry wide anxiety about how the digital has grown to dominate Hollywood pushing it into an uncertain creative and economic future Yet he also suggests that Hollywood s nostalgia for old technologies ignores the professionals who once employed them as well as the labor opportunities that have been lost through the computerization and outsourcing of film industry jobs Though it deals with nostalgia Flickers of Film is strikingly cutting edge one of the first studies to critically examine Pixar s role in the film industry cinematic representations of videogames and the economic effects of participatory culture As he takes in everything from Terminator Salvation to The Lego Movie Sperb helps us see what s distinct about this recent wave of self aware nostalgic films how Hollywood nostalgia today isn t what it used to be *Disney's Live-Action Movie Bombs, 1979-2019* Tyler Mattis,2024-12-23 This book explores

the history of Disney's biggest live action movie failures from the late 1970s to the late 2010s. That stretch of time was a transformative period in which the company made many financial gains but gradually lost its identity which had largely been synonymous with founder Walt Disney. The chapters explain why each movie was made, the casting process, production details, and why each movie failed financially. Covered here are cult classics like *Tron* and *Hocus Pocus* alongside more well-known bombs like *John Carter* and *The Lone Ranger*. **The Disney Book New Edition** Jim Fanning, Tracey

Boillat, 2022-08-09 This essay examines the primacy of worldbuilding in the age of CGI, transmedia practices, and high concept fiction by studying the principles that govern the creation of a multiverse in a wide range of film and TV productions. Emphasis is placed on Hollywood sci-fi movies and their on-screen representation of imaginary machines that mirror the film medium, following in the tradition of Philip K. Dick's writings and the cyberpunk culture. A typology of worlds is established as well as a number of analytical tools for assessing the impact of the coexistence of two or more worlds on the narrative structure. The style uses color editing practices, the generic affiliation or hybridity, the seriality, and the discourse produced by a given film, particularly in fictions linked to post-9/11 fantasies. Among the various titles examined, the reader is offered a detailed analysis of the *Resident Evil* film series, *Total Recall* and its remake *Dark City*, the *Matrix* trilogy, *Avatar*, *Source Code*, and other time loop films, *TRON* and its sequel, Christopher Nolan's *Tenet*, and several TV shows, most notably HBO's *Westworld* but also *Sliders*, *Lost*, *Fringe*, and *Counterpart*. **The Digitization of Cinematic Visual Effects** Rama

Venkatasawmy, 2013 *The Digitization of Cinematic Visual Effects: Hollywood's Coming of Age* by Rama Venkatasawmy analyzes how the Hollywood cinema industry's visual effects applications have not only motivated the expansion of filmmaking praxis, they have also influenced the evolution of viewing pleasures and spectatorship experiences. Following the digitization of their associated technologies, VFX have been responsible for multiplying the strategies of representation and storytelling, as well as extending the range of stories that can potentially be told onscreen. By the same token, the visual standards of the Hollywood film's production and exhibition have been growing in sophistication. On the basis of displaying

groundbreaking VFX immaculately realized through the application of cutting edge technologies and craftsmanship and of projecting such a significant degree of visual innovation and originality certain Hollywood movies have established techno visual trends and industrial standards for subsequent filmmaking practice Hollywood cinema's entry into the digital realm is intertwined with the intensification of conglomeratic practices within the movie business the domain of techno scientific R D in filmmaking and the unification of corporate media information technology and entertainment Hence the standardization of and convergence toward the digital medium is emblematic of Hollywood cinema's techno industrial evolution in the late twentieth century Accordingly this volume identifies various synergies and partnerships between VFX providers movie studios graphic designers and more that have emerged from a progressive growth of awareness in Hollywood of the digital medium's potential

*Daft Punk: A Trip Inside the Pyramid* Dina Santorelli, 2014-06-30

Engineering the Environment David P. D. Munns, 2017-07-19 Promising an end to global hunger and political instability huge climate controlled laboratories known as phytotrons spread around the world to thirty countries after the Second World War The United States built nearly a dozen including the first at Caltech in 1949 Made possible by computers and other novel greenhouse technologies of the early Cold War phytotrons enabled plant scientists to experiment on the environmental causes of growth and development of living organisms Subsequently they turned biologists into technologists who in their pursuit of knowledge about plants also set out to master the machines that controlled their environment Engineering the Environment tells the forgotten story of a research program that revealed the shape of the environment the limits of growth and development and the limits of human control over complex technological systems As support and funding for basic science dwindled in the mid 1960s phytotrons declined and ultimately disappeared until nearly thirty years later the British built the Ecotron to study the impact of climate change on biological communities By revisiting this history of phytotrons David Munns reminds us of the vital role they can play in helping researchers unravel the complexities of natural ecosystems in the Anthropocene

**Studies on Cinematography and Narrative in Film: Sequels, Serials, and Trilogies** Seçmen, Emre Ahmet, 2024-07-18 Visual continuity in sequels poses a daunting challenge for filmmakers as they strive to maintain coherence while expanding upon established narratives and visual aesthetics With cinema's evolution audiences expectations have grown more sophisticated demanding seamless transitions and immersive experiences across film series However achieving this continuity requires a delicate balance between honoring the original work and introducing innovative elements to captivate viewers Addressing this complication is the book Studies on Cinematography and Narrative in Film Sequels Serials and Trilogies which emerges with a comprehensive approach By delving into the interplay between cinematography and narrative structure this book offers invaluable insights for filmmakers

**The Digital Image and Reality** Daniel Strutt, 2025-10-01 The media technologies that surround and suffuse our everyday life profoundly affect our relation to reality Philosophers since Plato and Aristotle have sought to understand the complex influence of apparently simple tools of expression on our understanding and experience of the world time space materiality and energy The Digital Image and Reality takes up this crucial philosophical task for our digital era This rich yet accessible work argues that when new visual technologies arrive to represent and simulate reality they give rise to nothing less than a radically different sensual image of the world Through engaging with post cinematic content and the new digital formats in which it appears Strutt uncovers and explores how digital image making is integral to emergent modes of metaphysical reflection to speculative futurism optimistic nihilism and ethical plasticity Ultimately he prompts the reader to ask whether the impact of digital image processes might go even beyond our subjective consciousness of reality towards the synthesis of objective actuality itself

**The Glocalization of Shanghai Disneyland** Ni-Chen Sung, 2021-04-11 Focusing on Disney's production of Shanghai Disneyland this book examines how the Chinese state and the local market influence Disney's ownership and production of the identities and the representations of Shanghai Disneyland Qualitative methods are here applied to combine both primary and secondary data including document analysis participant observation and in depth interviews Shanghai Disneyland is purposely created to be different from the other Disneylands under the authentically Disney and distinctly Chinese mandate In order to survive and thrive in China Disney carefully constructs Shanghai Disneyland as Disneyland with Chinese characteristics Previous studies tend to link Disney with cultural imperialism however this book argues that it is not imperialism but glocalization that promotes a global company's interests in China In particular the findings suggest state capital led glocalization glocalization led by economic capital of the state direct investment and economic capital with the state market potential Furthermore the four categories of glocalization with different conditions considerations and consequences illustrate various global local dynamics in the process of a global formation of locality The Glocalization of Shanghai Disneyland will appeal to students and scholars of sociology communication studies business studies and Asian studies more broadly

**Digital Space and Embodiment in Contemporary Cinema** Jennifer Kirby, 2022-09-30 Digital Space and Embodiment in Contemporary Cinema examines how contemporary cinema has represented and engaged with the experience of simultaneously inhabiting digital and material spaces i.e. composite spaces in the context of the growing ubiquitousness of digital media and culture Bringing together a range of key cinematic texts the book examines how these films represent composite space by depicting often subtly and without explicit reference to technology what it feels like to live in a world of ubiquitous digital media The book explores composite spaces through the striking use of elements like colour symbolic graphics and music and covers topics like music as mediator between levels of

experience perception in visionary films such as Sucker Punch 2011 and Spring Breakers 2012 digital colour as an interface in films including Under the Skin 2013 the integration of digital graphical elements drawn from game spaces into material spaces in films such as Scott Pilgrim vs The World 2010 and Nerve 2016 and films that take place on a computer screen including 2020 s widely discussed Zoom produced pandemic horror film Host Through the close analysis of these films the book offers fresh perspectives on conceptual issues of embodiment digital agency and subjectivity This book is a valuable resource for advanced undergraduates postgraduates and scholars in the fields of film studies digital aesthetics and film theory digital culture and digital media

**The Buddha in the Machine** R. John Williams, 2014-06-24 The writers and artists described in this book are joined by a desire to embrace Eastern aesthetics as a means of redeeming Western technoculture The assumption they all share is that at the core of modern Western culture there lies an originary and all encompassing philosophical error and that Asian art offers a way out of that awful matrix That desire this book attempts to demonstrate has informed Anglo and even Asian American debates about technology and art since the late nineteenth century and continues to skew our responses to our own technocultural environment
