Ecohydrological Interfaces Comprehensive overview of the process dynamics and interactions governing ecohydrological
interfaces Summarizing the interdisciplinary investigation of ecohydrological interface functioning Ecohydrological
Interfaces advances the understanding of their dynamics across traditional subject boundaries It offers a detailed explanation
of the underlying mechanisms and process interactions governing ecohydrological interface functioning from the micro scale
to the ecosystem and regional scale The multidisciplinary team of authors integrates and synthesises the current
understanding of process dynamics at different ecohydrological interfaces to develop a unifying concept of their ecosystem
functions The work introduces novel experimental and model based methods for characterizing and quantifying
ecohydrological interface processes taking account of innovative sensing and tracing technologies as well as microbial and
molecular biology approaches Key questions addressed in the book include Which conditions stimulate the transformative
nature of ecohydrological interfaces How are ecohydrological interfaces organized in space and time How does interface
activity propagate from small to large scales How do ecohydrological interfaces react to environmental change and what is
their role in processes of significant societal value As a research level text on the functionality and performance of
ecohydrological interfaces Ecohydrological Interfaces is primarily aimed at academics and postgraduate researchers It is also
appropriate for university libraries as further reading on a range of geographical environmental biological and engineering
