Governance in the Digital Age Mira Burri,Thomas Cottier,2015-07-09 The development of new digital technologies has resulted in significant transformations in daily life from the arrival of online shopping to more fundamental changes in the ways we work and communicate Many of these changes raise questions that transcend market access and liberalisation and demand cooperation and coherent regulatory design International trade regulation has hitherto not reacted in a forward looking manner to the digital revolution and particularly at the multilateral level legal engineering has yielded few tangible results This book examines whether WTO laws possess the necessary flexibility and resilience to accommodate the changes brought about by burgeoning digital trade By revealing both the potential and the limitations of the WTO framework it provides a broad picture of the interaction between digital technologies and trade regulation links the often disconnected discourses of international trade law intellectual property and cyberlaw and explores discrete problems in different domains
