Masculinities, Sexualities and Child Sexual Abuse Anne Cossins,2021-08-04 Why is child sexual abuse committed primarily by men and male adolescents unlike other forms of child abuse Is child sex offending rather than being a deviant masculine sexual practice related to normative masculine practices that is practices structured on dynamic and changing relations of power Using a practice based sociological approach the relationship between masculinities sexualities and child sexual abuse is analysed and the power powerlessness theory is developed to explain the predominantly male problem of child sex offending The theory postulates that because the social construction of masculinities involves the construction of dynamic and changing relations of power between men men s lives are characterised by a combination of power and powerlessness The book argues that an offender s experiences of powerlessness as a result of his relationships with other men is the key to understanding child sex offending since sexuality is a key social practice for the alleviation of experiences of powerlessness and for establishing relations of power with other men In particular the theory argues that a man s particular attachment to the link between sexuality and experiences of masculinity and power will be a key factor for determining how he does sex and whom he chooses as a sexual partner In the final chapter the theory is tested through a re analysis of offender interviews **The Sexual Abuse of Children** William T.
