Tropes Properties Objects And Mental Causation:

Tropes Douglas Ehring, 2011-08-25 Properties and objects are everywhere but remain a philosophical mystery Douglas Ehring argues that the idea of tropes properties and relations understood as particulars provides the best foundation for a metaphysical account of properties and objects He develops and defends a new theory of trope nominalism **The Routledge Handbook of Properties** A.R.J. Fisher, Anna-Sofia Maurin, 2023-12-22 Philosophical questions regarding both the existence and nature of properties are ubiquitous in ordinary life the sciences and philosophical theorising In philosophy it is one of the oldest topics discussed in various intellectual traditions East and West reaching back to Plato and Aristotle Today in the analytic tradition properties continue to be a core area of study and research The Routledge Handbook of Properties is an outstanding reference source to this perennial topic and is the first major volume of its kind It contains forty specially commissioned chapters written by an international team of expert contributors and is divided into nine clear parts Methodology and Metaontology Distinctions Realism about Universals Nominalism Trope Theory Properties in Causation Time and Modality Properties in Science Properties in Language and Mind Properties in the Normative Realm the Social World and Aesthetics The Routledge Handbook of Properties is essential reading for anyone studying and researching metaphysics metametaphysics and ontology and will also be of interest to those in closely related areas such as philosophy of science philosophy of language philosophy of mind ethics and aesthetics **Nominalism about Properties** Ghislain Guigon, Gonzalo Rodriguez-Pereyra, 2015-02-11 Nominalism which has its origins in the Middle Ages and continues into the Twenty First Century is the doctrine that there are no universals This book is unique in bringing together essays on the history of nominalism and essays that present a systematic discussion of nominalism It introduces the reader to the distinction between particulars and universals to the difficulties posed by this distinction and to the main motivations for the rejection of universals It also describes the main varieties of nominalism about properties and provides tools to understand how they developed in the history of Western Philosophy All essays are new and are written by experts on the topic and they advance the discussion about nominalism to a new level **Physicalism and Mental Causation** Sven Walter, Heinz-Dieter Heckmann, 2003 This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency **Causal Relevance and Mental Properties** Brendan Michael O'Sullivan, 2002 *The Philosopher's Index*, 2008 Vols for 1969 include a section of abstracts *Metaphysics* Michael J. Tropes, Universals and the Philosophy of Mind Simone Gozzano, Francesco Orilia, 2013-05-02 The ontological debate on the nature of properties is alive as ever Mainly they are viewed either as universals or tropes abstract particulars an alternative with an immediate impact on what events are taken to be Although much inquiry in philosophy of mind is done without a full awareness of it some recent works suggest that the choice may have far reaching consequences on central

topics of this discipline e.g. token physicalism, multiple realizability, mental causation, perception, introspection, self-awareness. This book explores the extent to which this is true with novel contributions by philosophers who have played a major role in bringing to the fore this interplay of foundational metaphysics and philosophical psychology and by other experts in these fields. **Mind**, 1986. Issues for 1896-1900 contain papers of the Aristotelian Society. **Mental Causation and Ontology** S. C. Gibb, E. J. Lowe, R. D. Ingthorsson, 2013-03-21. This book demonstrates the importance of ontology for a central debate in philosophy of mind. Mental causation seems an obvious aspect of the world. But it is hard to understand how it can happen unless we get clear about what the entities involved in the process are. An international team of contributors presents new work on this problem. **Ruch filozoficzny**, 2007. Mental Causation Jens Harbecke, 2013-05-02. This work is a systematic investigation of a range of solutions offered today for the philosophical problem of mental causation. The premises constituting the problem are analyzed before a survey is developed of the most popular theories on mental causation. It is demonstrated in detail why most of these canonical solutions must be considered deficient. In a third part the new compatibilist's approach to mental causation is explored which is characterized by assertion of a non-identity but non-distinctness principle. The last part aims to offer an alternative solution to the problem. On the basis of a certain set of counterfactual conditionals which are jointly taken to provide a definition of causal proportionality that improves the existing definitions it is shown that a specific and hitherto widely neglected version of causal overdeterminationism must be considered the most successful solution to the problem of mental causation. Dependencies, Connections, and Other Relations Wim de Muijnck, 2013-03-09. The text before you is a study of the problematic issue of mental causation. On hearing the expression mental causation you may at first think of something like bending spoons by psychic powers. But no, we are dealing here with something much more puzzling: doing things for reasons, i.e. what we call agency. Psychic spoon bending would be a fairly straightforward issue. You just exert some psychic force and bend a spoon just like you might bend it by hand, i.e. by physical force. The only trouble here is that psychic forces may not be in fact available. But now you fetch an umbrella because you expect that it will rain. How does that work? Somehow it seems you let an expectation move your limbs. But aren't your limbs already moved by nerve impulses and muscle contractions? And are expectations the proper kind of items to move things around? Mental causation is an issue that is at the heart of the mind-body problem, the problem of making it clear how minded creatures such as we are possible and what our mindedness consists in. Unlike psychic spoon bending, mental causation happens every day. At least pretty much of what we take for granted about ourselves can only be right when mental causation really happens. Philosophical and Scientific Perspectives on Downward Causation Michele Paolini Paoletti, Francesco Orilia, 2017-02-17. Downward causation plays a fundamental role in many theories of metaphysics and philosophy of mind. It is strictly connected with many topics in philosophy including but not limited to emergence, mental causation, the nature of causation, the nature of causal powers and dispositions, laws of nature and the possibility of

ontological and epistemic reductions Philosophical and Scientific Perspectives on Downward Causation brings together experts from different fields including William Bechtel Stewart Clark and Tom Lancaster Carl Gillett John Heil Robin F Hendry Max Kistler Stephen Mumford and Rani Lill Anjum who delve into classic and unexplored lines of philosophical inquiry related to downward causation It critically assesses the possibility of downward causation given different ontological assumptions and explores the connection between downward causation and the metaphysics of causation and dispositions Finally it presents different cases of downward causation in empirical fields such as physics chemistry biology and the neurosciences This volume is both a useful introduction and a collection of original contributions on this fascinating and hotly debated philosophical topic

Mental Causation Anthony Dardis, 2008 Two thousand years ago Lucretius said that everything is atoms in the void it's physics all the way down Contemporary physicalism agrees But if that's so how can we how can our thoughts emotions our values make anything happen in the physical world This conceptual knot the mental causation problem is the core of the mind body problem closely connected to the problems of free will consciousness and intentionality Anthony Dardis shows how to unravel the knot He traces its early appearance in the history of philosophical inquiry specifically in the work of Plato Aristotle Descartes and T H Huxley He then develops a metaphysical framework for a theory of causation laws of nature and the causal relevance of properties Using this framework Dardis explains how macro or higher level properties can be causally relevant in the same way that microphysical properties are causally relevant by their relationship with the laws of nature Smelling an orange choosing the orange rather than the cheesecake reaching for the one on the left instead of the one on the right mental properties such as these take their place alongside the physical motor of the world in making things happen

Causation and Persistence Douglas Ehring, 1997-02-06 Ehring shows the inadequacy of received theories of causation and introducing conceptual devices of his own provides a wholly new account of causation as the persistence over time of individual properties or tropes

Understanding Mental Causation Andrea White, 2024-12-17 Understanding Mental Causation proposes a new non relational theory of mental causation Andrea White believes that contemporary philosophy of mind labours under a misapprehension of what mental causation is supposed to be This volume explains where the leading theories go astray and how the new theory proposed solves critical problems for philosophers of mind and action Ordinary experience suggests that what we do with our bodies causally depends somehow on what is going on in our minds However the problem of how to understand the causal relationship between mind and body remains Contemporary philosophy of mind is shaped by the question how is it possible for the mental to causally interact with the physical Mental causation is often presented as a cause effect relation between mental and physical entities This understanding of mental causation is widely endorsed because it seems like a straightforward explanation of what is going on when people act intentionally Desires and beliefs are seen as causes of the actions they explain entailing the existence of causal relations between mental items and physical events White calls this the causalist view of intentional action This view

is not universally accepted The non causalist view denies that intentional action entails the existence of causal relations between mental items and physical events However non causalists reach this conclusion by arguing that explanations of intentional actions which cite beliefs or desires are not usually causal explanations at all White presents a theory of intentional action that falls between the causalist and non causalist views She rejects the idea that as a cause is how we should understand the place of mentality in intentional action Concepts like belief desire and intention do not refer to items which can stand in causal relations to actions or physical events However like causalists she holds that explanations of intentional actions which cite the agent s thoughts do give causal information This intermediary view demands a new theory about the causation that is on display when human beings act intentionally one that does not reduce mental causation to a relation between mental items and physical events Orthodox theories of causation inspired by David Hume assume that causation is always a relation between events Therefore the causation demonstrated in intentional action must be a relation because all causation is and will count as mental causation if and only if at least one of the terms of that relation is a mental entity White challenges this orthodoxy by presenting her own non relational theory of causation Denying causation is always a relation she holds instead that causation is a general type of process in which substances engage and that exercising a causal power is to engage in a process White shows how this novel theory can be used to provide a better understanding of intentional action and the mental causation associated with it She suggests that to act intentionally is to engage in a process and as such to exercise a power but a power of a special sort The power to act intentionally is a power to structure one s own activities so that they demonstrate a pattern a pattern which is only revealed by attributing mental states to the agent So when an agent acts intentionally they engage in the process of mental causation because the agent is manifesting a special power to organise their activities into a pattern that can be made sense of by appeal to mental concepts Broadening our understanding of causation and more specifically incorporating the concepts power and process opens up new ways of understanding intentional action and mental causation In *Understanding Mental Causation* White presents a compelling new account in this key area of philosophy of mind
