insufficiently studied to this day This volume aims to show how it remains challenging to study Tutankhamun's objects gathering a collection of studies authored by leading scholars on conservation materials funerary beliefs as well as the reception of motifs and the impact of the discovery Through these studies it becomes clear how ancient objects can help us reconstruct the complex fabric of the ancient Egyptian society and how they keep interacting with modern audiences *The Knowledge Triangle* Dirk Meissner, Leonid Gokhberg, Yaroslav Kuzminov, Mario Cervantes, Sylvia Schwaag Serger, 2021-12-02 This book helps readers understand how universities position themselves in the innovation landscape and the implications for national policies It provides a scholarly discussion and best practice based insights to help answer questions like To what extent do funding and governance policies support activities within the knowledge triangle How should policies for universities be designed in countries with different industrial and higher education structures Are there ways to effectively link universities with regional enterprises and social actors And finally what are the new institutional models and best practices for overcoming obstacles to interaction collaboration and co creation Rethinking Higher Education in Post-Apartheid South Africa Emnet Tadesse Woldegiorgis, Logan Govender, Dennis Zami Atibuni, 2025-07-25 This book explores the opportunities and epistemological and structural challenges facing higher education in postcolonial South Africa and argues for a fundamental transformation to meet the needs of the 21st century Taking the concept of transformation as a unifying thread this book discusses the evolving trajectories of higher education in South Africa with particular emphasis on the decolonial initiatives that have emerged in the post Apartheid era During this time there have been persistent calls for South Africa to move beyond Eurocentric education programmes and curricula in favour of a system that reflects the continent's culture and identities of all South Africans The book argues that incremental reforms of existing structures are insufficient and that instead a deeper more fundamental shift in higher education structures values and systems is needed Overall the book calls for a comprehensive transformation to expand access for historically disadvantaged communities enhance quality and competitiveness address past injustices and improve the quality and capacity to act together for a more sustainable and just future Also exploring the digital transformations which have accelerated in the wake of the COVID 19 pandemic this book will be an essential read for researchers and policymakers working on higher education in South Africa

The Authoritarian International Stephen G. F. Hall, 2023-05-25 Stephen Hall argues that democracies can preserve their norms and values from increasing attacks and backsliding by better understanding how authoritarian regimes learn He focuses on the post Soviet region investigating two established authoritarian regimes Belarus and Russia and two hybrid regimes Moldova and Ukraine with the aim of explaining the concept of authoritarian learning and revealing the practices that are developed and the sources of that learning Hall finds clear signs of collaboration between countries in developing best survival practices between authoritarian minded elites and demonstrates that learning does not just occur between states rather it can happen at the intra state level with elites learning lessons from previous regimes in their own countries He highlights the horizontal nature of this learning with authoritarian minded elites developing methods from a range of sources to ascertain the best practices for survival Post Soviet regional organisations are crucial for the development and sharing of these survival practices as they provide learning rooms and training exercises

Treasured Christina Riggs, 2022-02-01 A bold new history of the discovery of King Tut and the seismic impact it left on modern society When it was discovered in 1922 in an Egypt newly independent of the British Empire the 3 300 year old tomb of Tutankhamun sent shockwaves around the world The boy king became a household name overnight and kickstarted an international obsession that continues to this day From pop culture and politics to tourism and the heritage industry it s impossible to imagine the past century without the discovery of Tutankhamun yet so much of the

story remains untold In Treasured Christina Riggs weaves compelling historical analysis with tales of lives touched or changed forever by an encounter with the boy king Who remembers that Jacqueline Kennedy first welcomed the young pharaoh to America That a Tutankhamun revival in the 1960s helped save the ancient temples of Egyptian Nubia Or that the British Museum s landmark Tutankhamun exhibition in 1972 remains its most successful ever But not everything about King Tut glitters tours of his treasures in the 1970s were linked to Big Oil his mummified remains have been exploited in the name of science and accounts of his tomb s discovery exclude Egyptian archaeologists Treasured offers a bold new history of the young pharaoh who has as much to tell us about our world as his own

Self-Assembled Organic-Inorganic Nanostructures Christian von Borczyskowski, Eduard Zenkevich, 2017-03-27 The current state and perspectives in natural and life sciences are strongly linked to the development of novel complex organic inorganic materials at various levels of organization including semiconductor quantum dots QDs and QD based nanostructures with unique optical and physico chemical properties This book provides a comprehensive description of the morphology and main physico chemical properties of self assembled inorganic dye nanostructures as well as some applications in the field of nanotechnology It crosses disciplines to examine essential nanoassembly principles of QD interaction with organic molecules excited state dynamics in nanoobjects theoretical models and methodologies Based on ensemble and single nanoobject detection the book quantitatively shows for the first time on a series of nanoassemblies that surface mediated processes formation of trap states dictate the probability of several of the most interesting and potentially useful photophysical phenomena FRET or non FRET induced quenching of QD photoluminescence observed for colloidal QDs and QD dye nanoassemblies Further nanostructures can be generated by nanolithography and thereafter selectively decorated with dye molecules A similar approach applies to natural nanosized surface heterogeneities

Oromo Indigenous Religion and Oromo Christianity Ujulu Tesso Benti, 2018-05-31 The early non Oromo writers have distorted the history of the Oromo Without scientific research they were speaking of the so called Oromo migration of the 16th century Against the unscientific thesis of the early scholars this work confirmed the Oromo to be not only the indigenous African peoples but also belong to the Cushitic Africans who invented the first world civilization Their egalitarian and holistic culture the gadaa system is part of the ancient Cushitic civilization It is the base for modern democratic system of governance The root word of gadaa is originated from Ka the creator God of the ancient religion of the Cushitic Africans From this very name Ka originated the Oromo word Waaqa which also means creator of everything This shows that the Oromo are among the first nations who came up with the idea of monotheism Therefore this work disqualifies the missionary assumptions describing the Oromo Indigenous Religion OIR as Satanism and its religious experts the Qaalluus as witchdoctors or sorcerers This dissertation discovered many identical similar partial similar and few differing elements between the Oromo Indigenous Religion OIR and Oromo Christianity OC Also the study identified many Oromo cultural elements that are compatible to Christianity therefore must be adopted by the Oromo Christianity

According modern scholarship God revealed himself in every human culture and religion is part of human culture Therefore no religion can claim to be the only true religion Based on this principle this dissertation calls all leaders of religious institutions in Oromia to change their attitude develop culture of tolerance conduct constructive religious dialogue create the atmosphere of peaceful coexistence of all religions and establish sustainable peace that serves humanity *Green Finance and Investment Inventory of Energy Subsidies in the EU's Eastern Partnership Countries* OECD,2018-06-04 This publication aims to provide the first comprehensive and consistent record of energy subsidies in the EaP region with a view to improving transparency and establishing a solid analytical basis that can help build the case for further reforms in these countries
