Plant Adaptations to Phosphate Deficiency Alex Joseph Valentine,Alejandra Zúñiga-Feest,Aleysia Kleinert,Pablo Cornejo,Vagner A. Benedito,2021-05-18 Phosphate is an essential mineral to all plants and its availability in soils is an increasing challenge for agriculture Phosphate is abundant in soils but its biological availability is often low due to the complexes that it forms with soil minerals and compounds The biological availability of Phosphate is further reduced in acidic soils which represent approximately 40% of earth s arable agricultural lands Agricultural systems compensate Phosphate deficiency with fertilizers coming from the mining of rock phosphate which is estimated to exhaust within the next 50 years For these reasons Phosphate limitations in natural and agricultural ecosystems is going to become a global problem and we urgently need to better understand how plants respond to Phosphate deficiency

Eurasia 2.0 Mark Bassin,Mikhail Suslov,2016-03-17 This book discusses the return of geopolitical ideas and doctrines to the post Soviet space with special focus on the new phenomenon of digital geopolitics which is an overarching term for different political practices including dissemination of geopolitical ideas online using the internet by political figures and diplomats for legitimation and outreach activity and viral spread of geopolitical memes Different chapters explore the new possibilities and threats associated with this digitalization of geopolitical knowledge and practice Our authors consider new spatial sensibilities and new identities of global as well as local Selves the emergence of which is facilitated by the

internet They explore recent reconfigurations of the traditional imperial conundrum of center versus periphery Developing Manuel Castells argument that social activism in the digital era is organized around cultural values the essays discuss new geopolitical ideologies which aim to reinforce Russia s spiritual sovereignty as a unique civilization while at the same time seeking to rebrand Russia as a greater soft power by utilizing the Russian speaking diaspora or employing traditionalist rhetoric Great Power imagery enemy making and visual mappings of Russia s future territorial expansion are traditional means for the manipulation of imperial pleasures and geopolitical fears In the age of new media however this is being done with greater subtlety by mobilizing the grassroots contracting private information channels and de politicizing geopolitics Given the political events of recent years it is logical that the Ukrainian crisis should provide the thematic backdrop for most of the authors

Rocha, Eufemia Tarantino, Carmelo Maria Torre, 2021-09-10 The ten volume set LNCS 12949 12958 constitutes the proceedings of the 21st International Conference on Computational Science and Its Applications ICCSA 2021 which was held in Cagliari Italy during September 13 16 2021 The event was organized in a hybrid mode due to the Covid 19 pandemic The 466 full and 18 short papers presented in these proceedings were carefully reviewed and selected from 1588 submissions The books cover such topics as multicore architectures mobile and wireless security sensor networks open source software collaborative and social computing systems and tools cryptography human computer interaction software design engineering and others Part III of the set includes papers on Information Systems and Technologies and the proceeding of the following workshops International Workshop on Automatic landform classification spatial methods and applications ALCSMA 2021 International Workshop on Application of Numerical Analysis to Imaging Science ANAIS 2021 International Workshop on Advances in information Systems and Technologies for Emergency management risk assessment and

mitigation based on the Resilience concepts ASTER 2021 International Workshop on Advances in Web Based Learning AWBL 2021 Machine Learning and Cognitive Computing for Mobile Communications and Wireless Networks Krishna Kant Singh, Akansha Singh, Korhan Cengiz, Dac-Nhuong Le, 2020-07-08 Communication and network technology has witnessed recent rapid development and numerous information services and applications have been developed globally These technologies have high impact on society and the way people are leading their lives The advancement in technology has undoubtedly improved the quality of service and user experience yet a lot needs to be still done Some areas that still need improvement include seamless wide area coverage high capacity hot spots low power massive connections low latency and high reliability and so on Thus it is highly desirable to develop smart technologies for communication to improve the overall services and management of wireless communication Machine learning and cognitive computing have converged to give some groundbreaking solutions for smart machines With these two technologies coming together the machines can acquire the ability to reason similar to the human brain The research area of machine learning and cognitive computing cover many fields like psychology biology signal processing physics information theory mathematics and statistics that can be used effectively for topology management Therefore the utilization of machine learning techniques like data analytics and cognitive power will lead to better performance of communication and wireless systems Simulation and Modeling Methodologies, Technologies and Applications Mohammad S. Obaidat, Tuncer Ören, Floriano De Rango, 2018-11-20 This book highlights a set of selected revised and extended papers from the 7th International Conference on Simulation and Modeling Methodologies Technologies and Applications SIMULTECH 2017 held in Madrid Spain on July 26 to 28 2017 The conference brought together researchers engineers and practitioners whose work involves methodologies in and applications of modeling and simulation The papers showcased here represent the very best papers from the Conference and report on a broad range of new and innovative solutions **The Knowledge Triangle** Dirk Meissner, Leonid Gokhberg, Yaroslav Kuzminov, Mario Cervantes, Sylvia Schwaag Serger, 2021-12-02 This book helps readers understand how universities position themselves in the innovation landscape and the implications for national policies It provides a scholarly discussion and best practice based insights to help answer questions like To what extent do funding and governance policies support activities within the knowledge triangle How should policies for universities be designed in countries with different industrial and higher education structures Are there ways to effectively link universities with regional enterprises and social actors And finally what are the new institutional models and best practices for overcoming obstacles to interaction collaboration and co creation *Computer Communication, Networking and Internet Security* Suresh Chandra Satapathy, Vikrant Bhateja, K. Srujan Raju, B. Janakiramaiah, 2017-05-02 The book is a compilation of high quality scientific papers presented at the 3rd International Conference on Computer Communication Technologies IC3T 2016 The individual papers address cutting edge technologies and applications of soft computing artificial intelligence and communication In addition a variety of further

topics are discussed which include data mining machine intelligence fuzzy computing sensor networks signal and image processing human computer interaction web intelligence etc As such it offers readers a valuable and unique resource

Rethinking Higher Education in Post-Apartheid South Africa Emnet Tadesse Woldegiorgis, Logan Govender, Dennis Zami Atibuni, 2025-07-25 This book explores the opportunities and epistemological and structural challenges facing higher education in postcolonial South Africa and argues for a fundamental transformation to meet the needs of the 21st century Taking the concept of transformation as a unifying thread this book discusses the evolving trajectories of higher education in South Africa with particular emphasis on the decolonial initiatives that have emerged in the post Apartheid era During this time there have been persistent calls for South Africa to move beyond Eurocentric education programmes and curricula in favour of a system that reflects the continent s culture and identities of all South Africans The book argues that incremental reforms of existing structures are insufficient and that instead a deeper more fundamental shift in higher education structures values and systems is needed Overall the book calls for a comprehensive transformation to expand access for historically disadvantaged communities enhance quality and competitiveness address past injustices and improve the quality and capacity to act together for a more sustainable and just future Also exploring the digital transformations which have accelerated in the wake of the COVID 19 pandemic this book will be an essential read for researchers and policymakers working on higher education in South Africa

The Exhibition and Experience Design Handbook Timothy J.

McNeil, 2023-04-04 Today s multi modal participatory exhibitions and attractions are bound by a desire to convey information excite the viewer and create social and narrative experiences Without design at the helm and employed effectively these experiential moments would not become lasting memories that inform and inspire an increasingly sophisticated audience This full color illustrated handbook based on the author s research and expertise as an exhibition designer educator and critic is the first title to simultaneously explain how to design exhibitions and attractions successfully contextualize contemporary exhibition design practice through its historical and theoretical underpinnings elevate understanding of one of the most rapidly evolving and trans disciplinary creative disciplines illuminate exhibition design s contributions to the expanding global market for civic cultural commercial and entertainment experiences and reframe the exhibition design process using a set of recurring tropes and the methods they employ making this book distinct from other practice based museological or commercially driven titles This full color book with over 250 photographs and drawings uses real world examples museum and exhibition design studio profiles historical and contemporary voices and draw on the author s own creative practice and exhibition making experience as well as contributions from his extensive network of international museum attraction and design professionals The author introduces a new methodology for understanding exhibition and experience design One that elevates understanding of one of the most rapidly evolving and trans disciplinary creative disciplines Twelve easy to follow illustrated chapters introduce a set of reoccurring exhibition design conventions or tropes
