Making It Up Together Leslie A. Tilley, 2020-04-03 Most studies of musical improvisation focus on individual musicians But that is not the whole story From jazz to flamenco Shona mbira to Javanese gamelan improvised practices thrive on group creativity relying on the close interaction of multiple simultaneously improvising performers In *Making It Up Together* Leslie A Tilley explores the practice of collective musical improvisation cross culturally making a case for placing collectivity at the center of improvisation discourse and advocating ethnographically informed music analysis as a powerful tool for investigating improvisational processes Through two contrasting Balinese case studies of the reyong gong chime s melodic norot practice and the interlocking drumming tradition

kendang arja Tilley proposes and tests analytical frameworks for examining collectively improvised performance At the micro level Tilley s analyses offer insight into the note by note decisions of improvising performers at the macro level they illuminate larger musical discursive structural and cultural factors shaping those decisions This multi tiered inquiry reveals that unpacking how performers play and imagine as a collective is crucial to understanding improvisation and demonstrates how music analysis can elucidate these complex musical and interactional relationships Highlighting connections with diverse genres from various music cultures Tilley s examinations of collective improvisation also suggest rich potential for cross genre exploration The surrounding discussions point to larger theories of communication and interaction creativity and cognition that will be of interest to a range of readers from ethnomusicologists and music theorists to cognitive psychologists jazz studies scholars and improvising performers Setting new parameters for the study of improvisation Making It Up

Together opens up fresh possibilities for understanding the creative process in music and beyond **Russia-EU Relations and the Common Neighborhood** Irina Busygina,2017-07-20 Examining Russia EU relations in terms of the forms and types of power tools they use this book argues that the deteriorating relations between Russia and the EU lie in the deep differences in their preferences for the international status quo These different approaches combined with economic interdependence and geographic proximity means both parties experience significant difficulties in shaping strategy and formulating agendas with regards to each other The Russian leadership is well aware of the EU s authority orientation but fails to reliably predict foreign policy at the EU level whilst the EU realizes Russia s coercive orientation in general but cannot predict when and where coercive tools will be used next Russia is gradually realizing the importance of authority while the EU sees the necessity of coercion tools for coping with certain challenges The learning process is ongoing but the basic distinction remains unchanged and so their approaches cannot be reconciled as long as both actors exist in their current form Using a theoretical framework and case studies including Belarus Georgia and Ukraine Busygina examines the possibilities and constraints that arise when the power of authority and the power of coercion interact with each other and how this interaction affects third parties **Cyber Operations and International Law** François Delerue,2020-03-19 This book offers a comprehensive overview of the international law applicable to cyber operations It is grounded in international law but is also of interest for non legal researchers notably in political science and computer science Outside academia it will appeal to legal advisors policymakers and military organisations
