Twelve Upon Time Bakers Dozen:

Twelve Stories for Summer Linda Mansfield, 2017-06-08 *Twelve Stories for Summer* offers a baker's dozen of fictional but realistic short stories set in summer. It's for teenagers through senior citizens who could use a few minutes of relaxation. Some of the stories take place at typical summer destinations like a state park, an amusement park, a baseball stadium, a public auction, a Fourth of July parade, an outdoor concert, a riding stable, and an auto race. Others show people volunteering during a church mission trip and tornado relief efforts. One story features two college friends reminiscing over dinner. A bored boy at the beach is another subject. It can stand alone but it is the third of four books in the *Two Good Feet* series. **Once Upon a Prime** Sarah Hart, 2023-04-11 A New York Times Book Review Editors' Choice. Wide ranging and thoroughly winning.

Jordan Ellenberg *The New York Times Book Review*. An absolute joy to read. Steven Levitt *New York Times* bestselling author of *Freakonomics*. For fans of *Seven Brief Lessons in Physics*, an exploration of the many ways mathematics can transform our understanding of literature and vice versa by the first woman to hold England's oldest mathematical chair. We often think of mathematics and literature as polar opposites. But what if instead they were fundamentally linked? In her clear, insightful, laugh-out-loud funny debut *Once Upon a Prime*, Professor Sarah Hart shows us the myriad connections between math and literature and how understanding those connections can enhance our enjoyment of both. Did you know, for instance, that *Moby Dick* is full of sophisticated geometry? That James Joyce's stream of consciousness novels are deliberately checkered with mathematical references? That George Eliot was obsessed with statistics? That *Jurassic Park* is undergirded by fractal patterns? That Sir Arthur Conan Doyle and Chimamanda Ngozi Adichie wrote mathematician characters? From sonnets to fairytales to experimental French literature, Professor Hart shows how math and literature are complementary parts of the same quest to understand human life and our place in the universe. As the first woman to hold England's oldest mathematical chair, Professor Hart is the ideal tour guide taking us on an unforgettable journey through the books we thought we knew, revealing new layers of beauty and wonder. As she promises, you're going to need a bigger bookcase. **K'oria Misyön P'ildü**, 1925
