The Return of Sacred Architecture Herbert Bangs, 2006-11-14 An inspirational call for a return to the tenets of traditional architecture as a remedy for the dehumanizing standards of modern architecture Explains how modern architecture is emblematic of our current estrangement from the spiritual principles that shaped humanity's greatest civilizations Reveals how the ancient laws of sacred proportion and harmony can be restored The ugly buildings that characterize the modern landscape are inferior not only to the great cathedrals of medieval Europe and the temples of ancient Egypt and Greece but even to lesser buildings of the more recent past The great masterworks of our ancestors spoke to humanity's higher nature Architect Herbert Bangs reveals how today's dysfunctional buildings bring out the worst in humanity reinforcing that which is most base within us He shows how through the ancient laws of proportion and number architecture once expressed the harmonious relationship between man and the cosmos In early times the architect worked within a sacred and esoteric tradition of creating structures through which human beings could gain insight into the nature of the divine reality Today that tradition has been abandoned in favor of narrowly defined utilitarian principles of efficiency and economy In The Return of Sacred Architecture Bangs provides the key to freeing architecture from the crude functionality of the twentieth century the architects of the modern human landscape must find the deep felt connection to the cosmos that guided the inner lives of those who built the temples of the past The form of their buildings will then reflect the sacred patterns of geometry and proportion and bring forth greater harmony in the world **The Big Book of**

recall previous lives The chapter concludes with an examination of xenoglossy the ability to speak languages one has not learned previously and chapter 4 examines the particular case of Dhammaruwan a Sri Lankan boy who chants Pali texts that he does not appear to have learned in his present life Rebirth in Early Buddhism and Current Research brings together the many strands of the debate on rebirth in one place making it both comprehensive and compact It is not a polemic but an interrogation of the evidence and it leaves readers to come to their own conclusions

Irreducible Mind Edward F. Kelly, Emily Williams Kelly, Adam Crabtree, Alan Gauld, Michael Grosso, Bruce Greyson, 2006-12-07 Current mainstream opinion in psychology neuroscience and philosophy of mind holds that all aspects of human mind and consciousness are generated by physical processes occurring in brains Views of this sort have dominated recent scholarly publication The present volume however demonstrates_ empirically_ that this reductive materialism is not only incomplete but false The authors systematically marshal evidence for a variety of psychological phenomena that are extremely difficult and in some cases clearly impossible to account for in conventional physicalist terms Topics addressed include phenomena of extreme psychophysical influence memory psychological automatism and secondary personality near death experiences and allied phenomena genius level creativity and mystical states of consciousness both spontaneous and drug induced The authors further show that these rogue phenomena are more readily accommodated by an alternative transmission or filter theory of mind brain relations advanced over a century ago by a largely forgotten genius F W H Myers and developed further by his friend and colleague William James This theory moreover ratifies the commonsense conception of human beings as causally effective conscious agents and is fully compatible with leading edge physics and neuroscience The book should command the attention of all open minded persons concerned with the still unsolved mysteries of the mind

Our Quantum World and Reincarnation Milton E. Brenner, 2015-05-22 This book sets forth a thoroughly researched and tightly reasoned original thesis It is a convincing argument that one scientifically proven fact is quite possibly explained by another though on the surface one may appear to have nothing to do with the other One fact is the solid evidence scientifically adduced by Dr Jan Stevenson and others that memories and other mental aspects of the human brain do indeed survive death The other fact accepted by almost all physicists is a certain aspects of quantum mechanics known as entanglement Entanglement is the relationship that develops between atoms usually between those close in space whereby certain characteristics of one atom complement the corresponding characteristics of the other Atoms of course is what we and everything else are made of Thereupon the distances between atoms does not matter A change in one means a change in the other simultaneously though they may be millions of miles or of light years distant Further the projected life of atoms is over a billion times the projected life of our solar system This book weaves flawlessly based on the present state of scientific knowledge the possible relationship between the two disciplines

Nagarjuna N?g?rjuna, David J. Kalupahana, 1986-01-01 This is a completely new

translation of Nagarjuna's major work the *Mulamadhyamakakarika* accompanied by a detailed annotation of each of the verses. The annotation identifies the metaphysical theories of the scholastics criticized by Nagarjuna and traces the source material and the arguments utilized in his refutation back to the early discourses of the Buddha. The Introduction presents a completely new hypothesis of the nature of the treatise. The work is a grand commentary on the Buddha's Discourse to Katayana Kaccayanaqotta sutta. The concluding part of the Introduction compares the teachings of the Buddha and Nagarjuna in regard to epistemology, ontology, ethics, and philosophy of language, indicating how the latter was making a determined attempt to reconstruct the Buddha's teachings in a very faithful manner, avoiding the substantialist metaphysics of the scholastics. The book shows that Nagarjuna's ideas are neither original nor are they an advancement from the early Buddhist period. Nagarjuna is not a Mahayanist.
