Kalic, 2012-05-02 In the clash of ideologies represented by the Cold War even the heavens were not immune to militarization Satellites and space programs became critical elements among the national security objectives of both the United States and the Soviet Union According to *US Presidents and the Militarization of Space 1946-1967* three American presidents in succession shared a fundamental objective of preserving space as a weapons free frontier for the benefit of all humanity Between 1953 and 1967 Presidents Eisenhower Kennedy and Johnson all saw nonaggressive military satellite development as well as the civilian space program as means to favorably shape the international community's opinion of the scientific technological and military capabilities of the United States Sean N Kalic's reinterpretation of the development of US space

policy based on documents declassified in the past decade demonstrates that a single vision for the appropriate uses of space characterized American strategies across parties and administrations during this period. Significantly, Kalic's findings contradict the popular opinion that the United States sought to weaponize space and calls into question the traditional interpretation of the space race as a simple action reaction paradigm. Indeed, beyond serving as a symbol and ambassador of US technological capability, its satellite program provided the United States with advanced nonaggressive military intelligence gathering platforms that proved critical in assessing the strategic nuclear balance between the United States and the Soviet Union. It also aided the three administrations in countering the Soviet Union's increasing international prestige after its series of space firsts beginning with the launch of Sputnik in 1957.

U.S. Presidents and Latin American Interventions
 Michael Grow, 2008-06-10 Lyndon Johnson invaded the Dominican Republic. Richard Nixon sponsored a coup attempt in Chile. Ronald Reagan waged covert warfare in Nicaragua. Nearly a dozen times during the Cold War, American presidents turned their attention from standoffs with the Soviet Union to intervene in Latin American affairs. In each instance, it was declared that the security of the United States was at stake, but as Michael Grow demonstrates, these actions had more to do with flexing presidential muscle than responding to imminent danger. From Eisenhower's toppling of Arbenz in Guatemala in 1954 to Bush's overthrow of Noriega in Panama in 1989, Grow casts a close eye on eight major cases of U.S. intervention in the Western Hemisphere, offering fresh interpretations of why they occurred and what they signified. The case studies also include the Bay of Pigs fiasco, Reagan's invasion of Grenada in 1983, and JFK's little-known 1963 intervention against the government of Cheddi Jagan in British Guiana. Grow argues that it was not threats to U.S. national security or endangered economic interests that were decisive in prompting presidents to launch these interventions. Rather, each intervention was part of a symbolic geopolitical chess match in which the White House sought to project an image of overpowering strength to audiences at home and abroad in order to preserve both national and presidential credibility. As Grow also reveals, that impulse was routinely reinforced by local Latin American elites such as Chilean businessmen or opposition Panamanian politicians who actively promoted intervention in their own self-interest. LBJ's loud lament, "What can we do in Vietnam if we

can't clean up the Dominican Republic reflected just how preoccupied our presidents were with proving that the U.S. was no paper tiger and that they themselves were fearless and forceful leaders. Meticulously argued and provocative Grogan's bold reinterpretation of Cold War history shows that this special preoccupation with credibility was at the very core of our presidents' approach to foreign relations, especially those involving our Latin American neighbors. *I Wish I Knew That: U.S. Presidents* Editors of Reader's Digest, 2012-02-14 Here is a look at the fascinating profiles of each of the 43 presidents including the names of their pets. Sidebars are filled with fun and unusual information about our leaders such as who appears on stamps and money and At a Glance boxes provide birth date, political party and other vital information including that Thomas Jefferson, our third president, spoke six languages, invented many things, the swivel chair and the pedometer, to name two, and designed and built not only Monticello, his rural home, but also the University of Virginia. Theodore Roosevelt was one of the nation's great hunters and the Smithsonian is filled with hundreds of specimens from his safari in Africa. He was also our first environmentalist president, setting aside nearly 200 million acres for national parks and wildlife refuges. You'll also find a section on The First Ladies, short takes on all the presidents' wives. The book ends with a special feature that's just in time for the 2012 election: how a president gets elected. From the first presidential election to recent recounts, this chapter clearly explains to a young audience how we choose the next leader of our country. Includes over 100 whimsical illustrations.
