GAME Teaching and Learning in the Digital Age Louise Starkey, 2012-07-26 Teaching and Learning in the Digital Age is for all those interested in considering the impact of emerging digital technologies on teaching and learning. It explores the concept of a digital age and perspectives of knowledge pedagogy and practice within a digital context. By examining teaching with digital technologies through new learning theories cognisant of the digital age, it aims to both advance thinking and offer strategies for teaching technology savvy students that will enable meaningful learning experiences. Illustrated throughout with case studies from across the subjects and the age range, key issues considered include how young people create and share knowledge both in and beyond the classroom and how current and new pedagogies can support this level of achievement. The use of complexity theory as a framework to explore teaching in the digital age, the way learning occurs, one way exchanges online and face to face interactions, learning within a framework of constructivism and in communities, what we mean by critical thinking, why it is important in a digital age and how this can occur in the context of learning, how students can create knowledge through a variety of teaching and learning activities and how the knowledge being created can be shared, critiqued and evaluated. With an emphasis throughout on what it means for practice, this book aims to improve understanding of how learning theories currently work and can evolve in the future to promote truly effective learning in the digital age. It is essential reading for all teachers, student teachers, school leaders, those engaged in Masters Level work as well as students on Education Studies courses.

Hormesis in Health and Disease Suresh I. S. Rattan, Éric Le Bourg, 2014-05-16 Some mild stresses have positive effects on survival and aging as shown in animal models. There is also a large body of research that demonstrates these hormetic effects on aging, health and resistance to severe stresses and diseases in human beings. However, the data are dispersed in the literature and are not always interpreted as hormetic effects.

KNOW WHY: Systems Thinking and Modeling Kai Neumann, 2015-07-03 The complexity of the challenges we are faced with is steadily growing. Our gut feeling cannot predict the future and best practices used in the past do not necessarily work for our individual situations in the present. These facts cause many of us to simply give up. In order to be successful, however, we must understand the interconnections and dynamics at work in these individual situations. With KNOW WHY Thinking and the KNOW WHY Method, Kai Neumann offers two extremely practical approaches with which to handle the complex challenges we encounter in business, in politics and in our personal lives. KNOW WHY Thinking simply asks that we consider the evolutionary pattern of success. The KNOW WHY Method then applies this when we engage in qualitative modeling using what is arguably the most important software in the world, the iMODELER. This book shows you what KNOW WHY is all about and provides you with modeling tips so that you can easily model the following:

1. Personal life: What are the

drivers for human happiness How can we consciously plan to do the things that unconsciously make us feel great What role do e g partners money sex sports work nutrition religion hormones products and consciousness play 2 Management Why is a product a company or enterprise a team a project or an employee successful Why do customers buy certain products Modeling explains systemic strategy development project management marketing change management organizational development and much more 3 Politics and society Why aren t we changing although it is quite clear what needs to change Wars poverty pollution financial crises climate change etc are easily explained with the help of KNOW WHY The solutions to our challenges may ultimately not be all that easy but we can begin to get a handle on them with KNOW WHY Thinking and by modeling
