Stanton, E. Willis, S. Young, 2005-08-10 This book focuses on the relationship between health sector and industrial relations reforms and the impact these have had on employment relations in Australia since 1990 The book adds to the international literature on New Public Management with a distinctively Australian focus and synthesizes the impact of health sector and industrial relations reforms on health care management and work practices It illustrates that New Public Management practices have been implemented creatively at both macro and micro levels The book provides context to the changing work practices in the health care sector The Australian Health Jigsaw National Health Strategy (Australia), 1991 **The Routledge Handbook of the Political Economy of Health and Healthcare** David Primrose, Rodney D. Loepky, Robin Chang, 2024-02-28 This handbook provides a comprehensive and critical overview of the gamut of contemporary issues around health and healthcare from a political economy perspective Its contributions present a unique challenge to prevailing economic accounts of health and healthcare which narrowly focus on individual behaviour and market processes Instead the capacity of the human body to reach its full potential and the ability of society to prevent disease and cure illness are demonstrated to be shaped by a broader array of political economic processes The material conditions in which societies produce distribute exchange consume and reproduce and the operation of power relations therein influence all elements of human health from food consumption and workplace safety to inequality healthcare and housing and even the biophysical conditions in which humans live This volume explores these concerns across five sections First it introduces and critically engages with a variety of established and cutting edge

theoretical perspectives in political economy to conceptualise health and healthcare from neoclassical and behavioural economics to Marxist and feminist approaches The next two sections extend these insights to evaluate the neoliberalisation of health and healthcare over the past 40 years highlighting their individualisation and commodification by the capitalist state and powerful corporations The fourth section examines the diverse manifestation of these dynamics across a range of geographical contexts The volume concludes with a section devoted to outlining more progressive health and healthcare arrangements which transcend the limitations of both neoliberalism and capitalism This volume will be an indispensable reference work for students and scholars of political economy health policy and politics health economics health geography the sociology of health and other health related disciplines Chapters 1-8 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons CC BY-NC-ND 4.0 license
