Vie Charlemagne Eginhard:

The Muslim Conception of International Law and the Western Approach Mohammad Talaat

Ghunaimi,2012-12-06 The traditional doctrine of Islamic law in regard to international relations is well known The Shari'a includes many excellent provisions about declarations of war treaties of peace armistices diplomatic envoys negotiations and guarantees of safe conduct But the fact remains that it divides the world broadly speaking into the Abode of Islam and the Abode of War and that it envisages the continuance of intermittent war between them until the latter is absorbed in the former In the course of such fighting and in the intervals in between many civilities were to be meticulously observed but prisoners of war could be killed sold or enslaved at the discretion of the Muslim authorities and the women of those who resisted the advance of Islam could be taken as slave concubines regardless of whether they were single or married The Abode of Islam did not indeed consist exclusively of Muslims for those whose religion was based on a book accepted by Islam as originally inspired and in practice indeed those other religions too were not forced to embrace Islam but only to accept Muslim rule They were granted the status of dhimmis were protected in their persons and their property were allowed to follow their own religion in an unobtrusive fashion and were accorded the position of essentially second class citizens They were also of course perfectly free to embrace Islam but for a Muslim to be converted to another faith involved the death penalty

Stuart Airlie,2018-02-06 A key theme in this collection of thirteen essays is the creative tension between the Carolingian dynasty and its aristocratic followers across 250 years The first section explores the rising dynasty s attempts to consolidate its power through war and rewards The second section focuses on the exercise of authority through a complex system of governance and representation and the pivotal role played by the courts of Charlemagne and his successors In the third section we see the Carolingian system undergoing a crisis of legitimacy challenged by civil war royal divorce and aristocratic encroachment on dynastic exclusivity These essays anatomise the dynamics of power relations in the greatest empire of the early medieval west

Rulers and Ruling Families in Early Medieval Europe Janet L. Nelson,2019-07-18 First published in 1999 the ideas and practices involved in early medieval royal family politics are the central theme of this collection of papers by Janet L Nelson She first examines King Alfred of Wessex 871 99 in the context of Anglo Saxon conditions and in comparison with his Carolingian contemporaries When tension and conflict within the royal family are highlighted she argues that Alfred s talents and political thought emerge the more impressively A second group of papers deals with the reign of Charles the Bald 840 77 his patronage of learning and his interest in Spanish martyrs are set in political context while contemporary historiography is considered as a form of counsel and critique The third section reflects Nelson s growing interest in the political importance and gendered roles of royal women Consecration rites are analysed as ritual expressions and factors in the shaping of the queenship while two final papers also examine the making and unmaking of Frankish kings and princes
