James Birx, 2005-12-08 This five volume Encyclopedia of Anthropology is a unique collection of over 1 000 entries that focuses on topics in physical anthropology archaeology cultural anthropology linguistics and applied anthropology Also included are relevant articles on geology paleontology biology evolution sociology psychology philosophy and theology The contributions are authored by over 250 internationally renowned experts professors and scholars from some of the most distinguished museums universities and institutes in the world Special attention is given to human evolution primate behavior genetics ancient civilizations sociocultural theories and the value of human language for symbolic communication The Performance of Viking Identity in Museums Guðrún D. Whitehead, 2024-08-12 The Performance of Viking Identity in Museums explores the representations and uses of Vikings in museums across Iceland British Isles and Norway Drawing on theories from history philosophy museology and sociology the book analyses how the Viking myth is used by visitors to make sense of present day society culture and politics and the role of museums in this meaning making process Demonstrating that the Viking myth is present in collective memory and plays an important role in the construction and modification of collective national and personal identities the book analyses this process through the framework of museums and their visitors Identifying museums as places where heritage identity and social norms are affirmed and reflected upon Whitehead demonstrates that all countries use their Viking heritage to define their identity on a local and international level through tourist attractions such as museums and other Viking related monuments and merchandise Providing readers with an insight into Vikings and their social relevance today The Performance of Viking Identity in Museums will be of great interest to academics and researchers across the social and human sciences It should also be essential reading for museum
