The Quest for Human Nature Marco J. Nathan, 2024 Over the last fifty years scholars in biology psychology anthropology and cognate fields have substantially enriched traditional philosophical theories about who we are and where we come from The assumption of a shared human nature lies at the core of some of the most pressing socio political issues of our time From race to sex and gender from medical therapy to disability from biotechnological enhancement to transhumanism all these timely debates presuppose a robust notion of human nature Nevertheless the riddle of human nature remains frustratingly elusive Why Marco J Nathan here provides an accessible detailed and up to date overview of cutting edge empirical research on human nature including evolutionary psychology critiques of essentialism innateness and genetic determinism addressing the question of why these fields have failed to provide a full blown theory of human nature Nathan's answer is that our nature is not the kind of notion that is susceptible to explanation Human nature rather plays a crucial role as an epistemological indicator a pivotal concept that sets out the agenda for much social political and normative discourse Nevertheless science cannot adequately grasp it without dissolving it in the process

Opening the Red Door Hae-Jin Choe, 2022-04-14 Many second generation Korean Americans SGKAs are living lives of marginality on the edge of Korean American and American cultures This double life often leads to heightened mental health concerns The rise of Asian hate crimes in this country in recent months have added to the distress in this population Due to cultural stigma however SGKAs may not seek out counseling or other mental health services If they do their unique cultural formation is often not fully addressed impeding growth and healing Red Door Ministry RDM a pastoral counseling center that started at a local Korean American church serves as a model for addressing this issue Built from a postcolonial understanding of third space RDM is constructed with various culturally sensitive elements that allow SGKAs to move from places of shame on the margins to empowered new centers This transformation is examined by four in depth interviews of RDM clients These clients show that healing and empowerment were possible because their complex cultural hybridity was addressed in the process of counseling This process is analyzed using concepts from Western psychological theories Korean American theology and postcolonial theory

What's Left of Human Nature? Maria Kronfeldner, 2023-10-31 A philosophical account of human nature that defends the concept against dehumanization Darwinian and developmentalist challenges Human nature has always been a foundational issue for philosophy What does it mean to have a human nature Is the concept the relic of a bygone age What is the use of such a concept What are the epistemic and ontological commitments people make when they use the concept In *What's Left of Human Nature* Maria Kronfeldner offers a philosophical account of human nature that

defends the concept against contemporary criticism In particular she takes on challenges related to social misuse of the concept that dehumanizes those regarded as lacking human nature the dehumanization challenge the conflict between Darwinian thinking and essentialist concepts of human nature the Darwinian challenge and the consensus that evolution heredity and ontogenetic development result from nurture and nature After answering each of these challenges Kronfeldner presents a revisionist account of human nature that minimizes dehumanization and does not fall back on outdated biological ideas Her account is post essentialist because it eliminates the concept of an essence of being human pluralist in that it argues that there are different things in the world that correspond to three different post essentialist concepts of human nature and interactive because it understands nature and nurture as interacting at the developmental epigenetic and evolutionary levels On the basis of this she introduces a dialectical concept of an ever changing and looping human nature Finally noting the essentially contested character of the concept and the ambiguity and redundancy of the terminology she wonders if we should simply eliminate the term human nature altogether **More Than Things** Paul Louis

Metzger,2023-08-08 In a world dominated by things we must work hard to account for one another's personhood Drawing a diverse set of thought leaders Paul Louis Metzger helps us navigate a pluralistic world through a personalist moral framework addressing issues such as abortion genetic engineering immigration drone warfare and more **European**

Rediscovering John Dewey Rex Li, 2020-11-02. This book tries to trace Dewey's intellectual history from his early years to the end, focusing on the themes of psychology and the psychological aspect of education in Dewey's lifelong writing. The author mixed the discussion on Dewey's work with his life stories and shows readers how his ideas evolved over time. In turn, the book offers a critical review of his ideas in the areas of psychology and education. Lastly, it assesses Dewey's involvement in and impact on education. In short, it provides a comprehensive account of his legacy in psychology and education.

In this insightful resource, evangelical academics, activists, and pastors come together to survey the history and outlines of liberation theology, opening a conversation for developing a specifically evangelical view of liberation that speaks to the critical justice issues of our time.

Montero, 2017-04-25 All Things in Common gets behind the

communism of the apostles passages in Acts 2 42 47 and 4 32 37 using the anthropological categories of social relationship espoused by David Graeber and other anthropologists Looking at sources ranging from the Qumran scrolls to the North African apologist Tertullian to the Roman satirist Lucian *All Things in Common* reconstructs the economic practices of the early Christians and argues that what is described in Acts 2 42 47 and 4 32 37 is a long term widespread set of practices that were taken seriously by the early Christians and that differentiated them significantly from the wider world This book takes into account Judean and Hellenistic parallels to the early Christian community of goods as well as the socioeconomic context from which it came and traces its origins back to the very teachings of Jesus This book will be of interest to anyone interested in Christian history and especially the socioeconomic aspects of early Christianity as well as anyone interested in Christian ethics and New Testament studies It would also be of interest to anyone interested in possible alternatives to the ideology of capitalism
