Do you think modern life is comfortable? Just wait and see! Future life is going to be more comfortable. Scientists tell us about the maid of future: the computer. We know the importance of the computer today, but it is going to be even more important in the future.

There is going to be a "home computer" in every house. A home computer is a computer terminal connected to public computer. It is going to be major source of information for the family.

The house wife is going to do her shopping through the computer. She is going to order directly to the computer supermarket. Then, the supermarket is going to deliver the goods directly to her house. No need to waste time with shopping. There is going to be complete system of instant information: right time, weather forecast, movies in town, airplane, train and bus schedules, traffic in the street, etc.

According to experiments in England and Japan, we are going to have a new newspaper system in the 21st century. The newspaper is going to disappear. We are going to have the newsvideo, or the videotext. You type a message into your home computer. You ask, "Give the political news of Western Europe". The news is going to appear immediately on the video screen of the terminal.

We are also going to see talking machines. You are going to tell your TV, "turn on", "change the channel", "correct the color". On the other hand, your stove is going to shout at you, "the water is boiling!", "the beans are burning", "turn me off!".

Two Ways To Change Worksheet:

Computers Today & Tomorrow □ 6 Meera Aggarwal, Dorothy Fanthome, COMPUTERS TODAY TOMORROW series consists of eight computer science textbooks for classes 1-8. This series is created to help students master the use of various kinds of software and IT tools. The books have been designed to keep pace with the latest technologies and the interests of the 21st century learners. The series is based on Windows 7 and MS Office 2007 and adopts an interactive approach to teach various concepts related to Computer Science. The books for classes 1-5 are introductory. They introduce students to the basic features of Windows 7 and MS Office 2007 starting with the history of computers, what are the basic parts of the computer, how to use Tux Paint, WordPad, MS Paint, how to program in LOGO and also give an introduction to the Internet. However, the books for classes 6-8 are for senior students and take a deep dive into the advanced features of Windows 7 and MS Office 2007 including how to do programming in QBasic, HTML and Visual Basic. Students learn to create animations using Flash and Photoshop and how to communicate using the Internet. The ebook version does not contain CD. New Log On To Computers □ 7 Manjeet Jauhar, Meera Aggarwal, New Log On To Computers Revised series consists of eight thoroughly revised and updated textbooks for classes 1-8. The books aim to help learners master the use of various types of software and IT tools. The books have been designed to keep pace with the latest technologies and the interests of the 21st century learners.
