Perspectives on Thought Leadership for Africa's Renewal Kondlo, Kwandiwe, 2014-05-05 This book outlines perspectives of emerging and established African scholars on what one could describe as the debate on leadership and the articulation of the life of the mind in Africa's socio economic political and cultural life from the time of independence to date The papers contained in the book cover the following thematic areas Alternative Leadership Paradigm for Africa's Advancement African Perspectives on Globalisation and international relations Pan Africanism and the African Renaissance Scientific Technological and Cultural Dimensions of

African Development The first section deals with alternative leadership paradigms for Africa's advancement It also debates the thin line separating management studies from leadership studies and untangles the hermeneutic complexities in the term leadership Section two examines among other things the crucial challenge of globalisation and public ethics and others African perspectives The section also interrogates the current complexities and credibility deficits in the global governance of trade and towards the end engages philosophical questions about conscience and consciousness in African development and progress The debates in section three continue to section four and focus on the overall issues of language and liberation the significance of Multi Inter and Trans Disciplinary Approaches in the analysis of the African continent appropriate indigenous paradigms for promoting the African renaissance as well as a series of debates on the meaning and prospects of regional integration in Africa's renewal This provides just a snapshot of a very wide ranging and interesting debate contained in the publication

Studia Philosophica Wratislaviensia Adam Chmielewski, Roman Konik, Damian Leszczyński, Artur Pacewicz, 2012-12-01 Nic nie wpisano *Children of Paradise* Laura Secor, 2017-02-07 Deeply moving A first rate highly readable intellectual history The Wall Street Journal The drama that shaped today's Iran from the Revolution to the present day In 1979 seemingly overnight moving at a clip some thirty years faster than the rest of the world Iran became the first revolutionary theocracy in modern times Since then the country has been largely a black box to the West a sinister presence looming over the horizon But inside Iran a breathtaking drama has unfolded since then as religious thinkers political operatives poets journalists and activists have imagined and reimaged what Iran should be They have drawn as deeply on the traditions of the West as of the East and have acted upon their beliefs with urgency and passion frequently staking their lives for them With more than a decade of experience reporting on researching and writing about Iran Laura Secor narrates this unprecedented history as a story of individuals caught up in the slipstream of their time seizing and wielding ideas powerful enough to shift its course as they wrestle with their country's apparatus of violent repression as well as its rich and often tragic history Essential reading at this moment when the fates of our countries have never been more entwined *Children of Paradise* will stand as a classic of political reporting an indelible portrait of a nation and its people striving for change

Hayek's Challenge Bruce Caldwell, 2004 Friedrich A Hayek is regarded as one of the preeminent economic theorists of the twentieth century as much for his work outside of economics as for his work within it During a career spanning several decades he made contributions in fields as diverse as psychology political philosophy the history of ideas and the methodology of the social sciences Bruce Caldwell editor of *The Collected Works of F A Hayek* understands Hayek's thought like few others and with this book he offers us the first full intellectual biography of this pivotal social theorist Caldwell begins by providing the necessary background for understanding Hayek's thought tracing the emergence in fin de siècle Vienna of the Austrian school of economics a distinctive analysis forged in the midst of contending schools of thought In the second part of the book Caldwell follows the path by which Hayek beginning from the standard Austrian assumptions

gradually developed his unique perspective on not only economics but a broad range of social phenomena In the third part Caldwell offers both an assessment of Hayek s arguments and in an epilogue an insightful estimation of how Hayek s insights can help us to clarify and reexamine changes in the field of economics during the twentieth century As Hayek s ideas matured he became increasingly critical of developments within mainstream economics his works grew increasingly contrarian and evolved in striking and sometimes seemingly contradictory ways Caldwell is ideally suited to explain the complex evolution of Hayek s thought and his analysis here is nothing short of brilliant impressively situating Hayek in a broader intellectual context unpacking the often difficult turns in his thinking and showing how his economic ideas came to inform his ideas on the other social sciences Hayek s Challenge will be received as one of the most important works published on this thinker in recent decades **Alfred Schutz: Appraisals and Developments** K.H.
