Vertigo When The World Spins Out Of Control:

Vertigo! Linda Howard Zonana, 2013-11-29 This book is about vestibular illnesses those that arise in the inner ear and precipitate the sickening experiences of vertigo and imbalance usually without warning There are not many books on vertigo written for the general public and the writer saw a need for one that offered not only detailed information concerning these diseases but an exploration of the vertigo experience itself and of the problems that can occur in searching for effective therapy and a sense of understanding The book is unique in that more than fifty people were interviewed in order to provide a good look at a variety of real life experiences Many of their stories are threaded through the text as examples Included are chapters on the psychological effects of illness challenges encountered in seeking help conventional and unconventional treatments anatomy and functioning of the ear as well as a history of the development of a scientific understanding of vertigo The book does not recommend any specific solutions but rather seeks to provide some understanding of these illnesses and their ramifications as well as options for coping with them The sections of the book devoted to strictly medical information were reviewed by an experienced otolaryngologist Comments by Madelon Baranoski PhD Associate Professor Department of Psychiatry Yale University This is an informative and entirely readable book on vertigo The author weaves her own experiences accounts from others who suffer from the disorder and anatomy physiology and treatment information into a coherent discourse on the human experience of the world spinning out of control Personally the book has helped me understand my mother's bouts of benign positional vertigo Reading it with me Mom felt less isolated in her struggle with the unpredictable enveloping dizziness and I felt a new connection with her We both felt less helpless There is nothing like this book in the medical or popular press I enthusiastically recommend it to family friends physicians and therapists of people with vertigo It is an empathic comprehensive and well written window into a very perplexing disorder

Back In The Swirl Mercedes Kim-Cabrera, 2013-05 On November 4th 2007 I visited with my best friend to celebrate my birthday It was a typical warm afternoon in Florida I was surprisingly complimented with a delectable meal accompanied by Miami staple drink Mojitos I sat in the backyard terrace oblivious to all cares of this world amid good company and laughter when suddenly I felt a lurch in my stomach followed by a piercing sound and the most uncomfortable fullness sensation in my ears The nausea wave followed suit and in seconds my celebratory meal and drinks were inevitably expelled in a projectile vomiting episode The deja vu feeling was overwhelming My relatives and friends faces danced in a sort of a burlesque fashion around me I was spinning violently yet my body rested motionless in my chair The terrace did not stop gyrating and neither did the faces who danced in an uncontrollable kaleidoscope fashion As I lay powerless and terrified I realized that I was Back in the Swirl of Meniere

Three More Mondays

Raymond Stevens MD, 2019-09-23 *Three More Mondays* is more than a time check about life and death. It's about us, you, and me. Together we will explore from the ancient time of Hippocrates to the present age, this ongoing saga of medical knowledge from twenty-six human maladies A to Z that I have witnessed, diagnosed, or treated as a physician. As we embark on this intimate medical odyssey, the fragile but resilient human spirit is visibly exposed in the context of illness by the trials, tribulations, and triumphs of my patients. Hopefully, this book will enlighten not only fledgling medical students, interns, and residents of what the practice and art of medicine once was, but sadly, what it is no longer: a personal doctor-patient relationship. For the general public, they may get a glimpse of themselves or of their loved ones in similar medical situations addressed in this book, and perhaps they may come away with a deeper awareness that illness is not just experienced alone, but shared, as each one of us travels on our own individual medical journey in search of hope and healing.

League of Spies Robert Merle, 2019-02-05 The fourth book in the bestselling *Fortunes of France* series in a brand new look. An uneasy peace reigns in France, but behind the scenes, Catholics, Protestants, and the agents of foreign powers are still locked in secretive, bloody combat as they struggle to control the country's future. In this unstable atmosphere, Pierre de Siorac again leaves his Perigord home for Paris, but his apparent employment as a doctor masks an even more serious and deadly occupation: as a spy working for King Henry IV, using fair means and foul to protect his rule and the peace of the realm. As the plots against his king thicken, Pierre finds himself struggling to save not only his country but the lives of his entire family. With his back to the wall, he will need a keen wit and a steady sword arm to fight his way to safety. Behold the Prince is the fourth book in the swashbuckling *Fortunes of France* series.

Burnt Offering Joan Metelerkamp, 2009 *Burnt Offering* is Joan Metelerkamp's seventh collection of poems. The title comes from a poem in a cycle that embodies the labours of the medieval alchemists: heating and burning, transformation of passionate intensity, the search for an enduring element. In the process, malignant doubt is burnt off, and what takes its place is trust in the everyday. Take this day, here, take it all: its clarity, all its gold. Like all of Metelerkamp's work, these generous poems draw on and weave together with her distinctive energy and passion the details of family and rural life, dreams, landscapes, and journeys.

Women in German Yearbook *Women in German Yearbook*, 1997-02-01 Volume 12 of *Women in German Yearbook* opens with a cluster of cross-disciplinary articles. Sara Lennox explores pertinent theoretical issues and introduces articles by historian Atina Grossman, sociologist Myra Marx Ferree, and political theorist Joan Cocks. Three subsequent articles focus on the nineteenth century. Todd Kontje challenges the notion that the Wars of Liberation renewed conservatism regarding gender. Irmela Marei Krüger Fiehoff presents a new reading of the father-daughter relationship in Kleist's *Marquise of O*, and Helen G. Morris Keitel describes the cultural work of Louise Otto's *Castle and Factory*. Barbara Hales analyzes the criminal *femme fatale* as evidence of Weimar Germany's deep-seated discomfort with modernity. Kathrin Bower discusses poems by Nelly Sachs and Rose Ausländer as searches for the Mother. Charlotte Melin analyzes gender differences in reworkings of the *Alice in Wonderland* motif. Helgard Mahrtdt explores

connections between Ingeborg Bachmann's prose and the cultural criticism of the Frankfurt School and Frederick A. Lubich interviews the writer Elisabeth Alexander. Two articles focus on cultural differences: Karen Jankowsky reads 'The Facade' by Libuse Monková, a Czech author writing in German, and Leslie Adelson discusses Eva Demski's 'Afra' in terms of Afro-German discourse. The volume closes with the editors' views on the yearbook's role in creating an American Germanic **Sensory Processes**.

David R. Soderquist, 2002-01-11: There is no comparable text for a course in perception that emphasizes the neural basis of perception rather than simply perceptual phenomena and psychophysics. It is strong in the clarity with which some difficult concepts are explained. The author does not restrict himself to a physics and engineering approach but rather gives the reader a mental image of what is happening biologically. Inclusion of disorders is another big advantage. The quality of writing is excellent. The level is appropriate for upper-level undergraduates.

RICKY HEFFNER, University of Toledo: I think the book's primary strengths are its attention to detail and willingness to tackle difficult topics and offer very good explanations and analogies.

STEVEN HAASE, University of Wisconsin at Madison: I'm very sympathetic to the goal of this book in taking an enhanced multidisciplinary approach to the area of Sensation/Perception with particular emphasis on the neuroscience background. Also commendable is the detailed treatment of sense modalities other than vision and audition.

MICHAEL SLOANE, University of Alabama at Birmingham: I like the general tone of the book. The overall approach and the metaphors are quite nice.

BRUCE HALPERN, Cornell University: This core text emphasizes the underlying neural structures and functions of sensory systems: pain, olfaction, gustation, audition, vision, etc., and presents this complex material at a level comprehensible to undergraduates as well as beginning graduate students. The text begins with a review of the central nervous system and its sensory components and includes discussions of methodological techniques and procedures used to study sensory processes.
