skills to astonish and surprise your family friends and acquaintances as the excerpts from the following three experiments shows

An EXPERIMENT with FALSE MEMORY Hand the test subject a piece of paper listing a very long number For example something similar to this 164839244312673 778241983711893 Tell the subject Please read and memorize this number Once I take the piece of paper away after a few seconds you will have memorized the entire number and can write it down Then take the piece of paper away from the test subject and say And now you are able to write down the entire number without errors just from memory Remember Each suggestion must be canceled by a counter suggestion

An EXPERIMENT with FALSE PERCEPTION Tell the VP the following while handing him or her a peeled onion I am giving you here a nice juicy apple Eat it you will love its taste and it s good for you The subject will think of the onion as an apple and actually eat it like an apple A counter suggestion is here not required since no effect continues after the action has been completed

An EXPERIMENT with POST HYPNOSIS You can also use a subject and post hypnosis an action that is to be carried out at a later time Example Call me at 8 in the evening to tell me that you cannot visit me tomorrow When I ask you why you cannot come you tell me you don t have time Remember All these experiments must have a clearly defined effective start and end of a suggestion Never allow an effect to continue after the hypnosis without first canceling with a counter suggestion The listed experiments were just a small excerpt from the many possible hypnosis techniques Moreover you can also use your own creative ideas to develop and carry out new and interesting experiments The number of fantastic possibilities is endless once you have learned the methods provided by the Modern Hypnosis Technique instructions

The textbook of life. The laws of the mind Martin Kojc,2019-01-13 How you can use the power of thoughts successfully and realise your deepest desires consistently and with single mindedness With the power of thoughts you are the creator and architect of your own world at every moment As can be read

in many books a vivid image loaded with emotion which is known to take place in the right hand side of the brain is sufficient in itself to bring about the beginnings of this realisation If you imagine something or think about it then it already exists in an invisible form like a fertile egg cell which is just waiting to come to life Yet how can I make sure that my dreams and desires become reality without any hindrance and really do come true and not as so often happens once again disappointingly turn to dust Most people have not been aware of this step up to now Yet it is as simple as fertilising an egg cell Only when the left and right hand side of the brain are aligned together can the substance of our thoughts take shape automatically and purposefully without any hindrance until it reaches completion
