War Prosperity And Depression P:

War, Prosperity, and Depression Peter Fearon, 1987 US Economic History Since 1945 Michael French, 1997 Since 1945 the US economy has evolved from an expanding consumer society in which affluence was more widely distributed than ever before Mike French's volume examines the principal economic developments and social changes in the US since 1945 including those in business regional dynamics protest movements and population distribution Social movements based on the civil rights demands of African Americans ethnic minorities and women are also examined The elements of continuity to pre 1945 trends and the points of departure notably in the post 1970 period are discussed to provide a more complete examination than previously available *War, Prosperity, and Depression* Peter Fearon, 1987 The Great Reckoning James Dale Davidson, William Rees-Mogg, 1994-01-10 The 1990s will be a time of political economic social and financial upheaval But even in a time of crisis prepared individuals can prosper if they know the secrets of megapolitics how technology will revolutionize economic and social institutions which businesses will thrive and which will fail how to build a financial foundation in a time of economic crisis *Modern Housing for America* Gail Radford, 2008-10-03 In an era when many decry the failures of federal housing programs this book introduces us to appealing but largely forgotten alternatives that existed when federal policies were first defined in the New Deal Led by Catherine Bauer supporters of the modern housing initiative argued that government should emphasize non commercial development of imaginatively designed compact neighborhoods with extensive parks and social services The book explores the question of how Americans might have responded to this option through case studies of experimental developments in Philadelphia and New York While defeated during the 1930s modern housing ideas suggest a variety of design and financial strategies that could contribute to solving the housing problems of our own time **Merchant, Soldier, Sage** David Priestland, 2013-03-21 A bold new interpretation of modern history as a struggle between three economic groups We are now living in an age of merchants but it was not always so The history of civilization in large part is a story of a battle between agrarian aristocracy the military and a class of learned experts or priests Yet in seventeenth century England and in the Netherlands another group entered the m l e for power the merchants For the last four decades the merchant's power has been unfettered In Merchant Soldier Sage acclaimed Oxford scholar David Priestland proposes a radical new approach to understanding today's balance of power and analyzes the societal and economic historical conditions required for one of these three value systems to dominate Priestland asserts that in the wake of the Great Recession the weakened and discredited merchant still clings to power but the world is again in the midst of a period of upheaval United States History Two/War Prosperity and Depression Richard G. Allan, 1981-01-01 **The New Dealers** Jordan A. Schwarz, 2011-07-06 This bold new analysis of the New Deal dramatically revises our vision of the Roosevelt legacy and of the new relation between government and business it made a central fact of American life With impressive scholarship and narrative brio Jordan A Schwarz persuasively demonstrates that the New Deal

s architects sought not merely to save an endangered American capitalism but to integrate economically underdeveloped regions of the nation within the scope of a dynamic state capitalism capable after World War II of dominating the global marketplace As he assesses the contributions of such figures as Supreme Court Justice Louis D Brandeis the legal and political fixer Thomas G Corcoran Texas legislators Sam Rayburn and Lyndon Johnson and the quintessential New Deal industrialist Henry Kaiser Schwarz produces a volume that should be required reading for anyone concerned with current American industrial policy And he does so with a liveliness and depth of insight that make The New Dealers comparable to the best work of Arthur Schlesinger or Robert Caro

How Growth Really Happens Michael H. Best,2018-06-26 A groundbreaking study that shows how countries can create innovative production based economies for the twenty first century Achieving economic growth is one of today s key challenges In this groundbreaking book Michael Best argues that to understand how successful growth happens we need an economic framework that focuses on production governance and skills This production centric framework is the culmination of three simultaneous journeys The first has been Best s visits to hundreds of factories worldwide starting early as the son of a labor organizer and continuing through his work as an academic and industrial consultant The second is a survey of two hundred years of economic thought from Babbage to Krugman with stops along the way for Marx Marshall Young Penrose Richardson Schumpeter Kuznets Abramovitz Keynes and Jacobs The third is a tour of historical episodes of successful and failed transformations focusing sharply on three core elements the production system business organization and skill formation and their interconnections Best makes the case that government should create the institutional infrastructures

needed to support these elements and their interconnections rather than subsidize individual enterprises The power of Best's alternative framework is illustrated by case studies of transformative experiences previously regarded as economic miracles America's World War II industrial buildup Germany's postwar recovery Greater Boston's innovation system Ireland's tech sector boom and the rise of the Asian Tigers and China Accessible and engaging How Growth Really Happens is required reading for anyone who wants to advance today's crucial debates about industrial policy free trade outsourcing and the future of work
