Water Engineering Hydraulics Distribution And Treatment:

Water Engineering Nazih K. Shammass, Lawrence K. Wang, 2015-05-26 Details the design and process of water supply systems tracing the progression from source to sink Organized and logical flow tracing the connections in the water supply system from the water's source to its eventual use Emphasized coverage of water supply infrastructure and the design of water treatment processes Inclusion of fundamentals and practical examples so as to connect theory with the realities of design Provision of useful reference for practicing engineers who require a more in depth coverage higher level students studying drinking water systems as well as students in preparation for the FE PE examinations Inclusion of examples and homework questions in both SI and US units *Handbook of Advanced Industrial and Hazardous Wastes Management* Lawrence K. Wang, Mu-Hao S. Wang, Yung-Tse Hung, Nazih K. Shammass, Jiaping Paul Chen, 2017-10-30 This volume provides in depth coverage of environmental pollution sources waste characteristics control technologies management strategies facility innovations process alternatives costs case histories effluent standards and future trends in waste treatment processes It delineates methodologies technologies and the regional and global effects of important pollution control practices It focuses on specific industrial and manufacturing wastes and their remediation Topics include heavy metals electronics chemical and textile manufacturing *Control of Heavy Metals in the Environment* Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, Jiaping Paul Chen, 2025-02-28 Offering broad coverage of advanced principals and applications *Control of Heavy Metals in the Environment* mini series provides chemical and environmental engineers with the most complete resource available on the remediation of heavy metal contaminants with an emphasis on advanced and alternative approaches It investigates a variety of environmental pollution sources and waste characteristics that require a multitude of remediation methods It then details the latest in clean tech advances including fungal bioprocesses and addresses recycling and disposal techniques as well as metals pollution from the transportation industry The authors delve into costs and effluent standards and offer several illustrative case histories to illustrate the regional and global effects of key pollution control practices Features Provides technical information for industrial and hazardous waste treatment Discusses the control treatment and management of metal emissions from motor vehicles Explores the newest methods of clean production and waste minimization Includes numerous figures tables examples and case histories *Remediation of Heavy Metals in the Environment* Jiaping Paul Chen, Lawrence K. Wang, Mu-Hao S. Wang, Yung-Tse Hung, Nazih K. Shammass, 2016-11-18 This book provides in depth coverage of environmental pollution sources waste characteristics control technologies management strategies facility innovations process alternatives costs case histories effluent standards and future trends in waste treatment processes It delineates methodologies technologies and the regional and global effects of important pollution control practices It focuses on toxic heavy metals in the environment various heavy metal decontamination technologies brownfield restoration and industrial agricultural and radioactive waste management It discusses the importance of metals
