Water Politics And Money A Reality Check On Privatization:

Water, Politics and Money Manuel Schiffler, 2015-05-11 This book reveals all that can potentially happen when a private company takes over a local water supply system both the good and the bad Backed by real life stories of water privatization in action author Manuel Schiffler presents a nuanced picture free of spin or fear mongering Inside readers will find a detailed analysis of the multiple forms of water privatization from the outright sale of companies to various forms of public private partnerships After covering their respective strengths and weaknesses it then compares them to purely publicly managed water utilities The book examines the privatization and the public management of water and sewer utilities in twelve countries the United States the United Kingdom France Germany the Philippines Cambodia Egypt Jordan Uganda Bolivia Argentina and Cuba Readers will come to understand how and why some utilities failed while others succeeded including some that substantially increased access became more efficient and improved service quality even in the poorest countries of the world It is natural that a private company taking over a local water supply system causes both fear and worry for consumers With the aid of solid empirical evidence this book argues that who manages the system is only half the story Rather it is the corporate culture of the utilities and the political culture of where they operate that more often than not determines performance and how well a community is served *A Mighty Capital under Threat* Bill Luckin, Peter

Thorsheim, 2020-03-03 Demographically nineteenth century London or what Victorians called the new Rome first equaled then superseded its ancient ancestor By the mid eighteenth century the British capital had already developed into a global city Sustained by its enormous empire between 1800 and the First World War London ballooned in population and land area Nothing so vast had previously existed anywhere *A Mighty Capital under Threat* investigates the environmental history of one of the world's global cities and the largest city in the United Kingdom Contributors cover the feeding of London waste management movement between the city's numerous districts and the making and shaping of the environmental sciences in the late nineteenth and early twentieth centuries

Transnational Corporations in Urban Water Governance Joyce Valdovinos, 2021-08-14 This book examines the role played by business in urban water governance by analyzing the evolution of the global private water sector along with four public private partnerships in Mexico and the U S The local nature of water services often hides the global developments behind the rise of transnational water corporations which have gone from being local operators to becoming dynamic and powerful actors within an interconnected transnational space for water This book focuses on the French groups Veolia and Suez two of the most prominent private actors in global water governance and the development and adaptation strategies of both companies in the cities of Aguascalientes Mexico City Atlanta and Milwaukee over the past 30 years Drawing on over 100 interviews conducted with corporate executives public authorities and local users of water services this book moves beyond the simplistic dichotomy of the public private debate and develops a theoretical framework that analyzes the economic and political power wielded by transnational business actors in global

water governance Not only does the book explain how Veolia and Suez strategically mobilize resources at difference scales in order to expand their global operations but it also provides a nuanced picture of how state regulation remains of central importance to understanding the dynamics and evolution of the global water sector Students and scholars interested in business and the environment including public private partnerships business management and transnational corporations and water governance will find this book of great interest as will professionals and policymakers working in these fields

Publics in Action Christopher Kutz, C William Maxeiner Distinguished Professor Law and by Courtesy Philosophy and Political Science Christopher Kutz, 2025-08-27 In Publics in Action Christopher Kutz looks at how people should and do come together to create their shared institutions and the lessons we can learn from one another He argues that a healthy dynamic public takes itself seriously as a subject of action not just the passive beneficiary of a state institution Kutz builds the book around an extended metaphor we should understand ourselves as a public that improvises listening to each other as we riff off shared standards and so creating something new responsive to the scene and the moment

Water, Rhetoric, and Social Justice Theresa R. Castor, Casey R. Schmitt, Christopher S. Thomas, 2020-01-20 Water Rhetoric and Social Justice A Critical Confluence examines how individuals and communities have responded on a global scale to present day water crises as matters of social justice through oratory mass demonstration deliberation testimony and other rhetorical appeals This book applies critical communication methods and perspectives to interrogate the pressing yet mind boggling dilemma currently faced in environmental studies and policy that clean water the very stuff of life which flows freely from the tap in affluent areas is also denied to huge populations materially and fluidly exemplifying the currents of justice liberty and equity Contributors highlight discourse and water justice movements in nonofficial spheres from activists artists and the grassroots In extending the technical economic moral and political conversations on water justice this collection applies special focus on the novel rhetorical concepts and responses not necessarily unique to but especially enacted in water justice situations Scholars of rhetoric sociology activism communication and environmental studies will find this book particularly useful

Regulatory Property Rights Christine Godt, 2016-11-21 In Regulatory Property Rights The Transforming Notion of Property in Transnational Business Regulation editor Christine Godt generates fresh impetus for rethinking modern property theory The book's central theme is the transformation of property in response to societal changes brought about by internationalization digitalization and new forms of collective action The contributions sketch a vision of modern property which grew out of 18th and 19th century ideologies It operates in the modern multilevel system and is not confined to the nation state It is conscious about the broad range of functionalities of the title holder with regard to managing international supply and distribution chains and modern rationalities of the capital market and at the same time acknowledges the legitimate interests of third parties and modern forms of governance

Water, Governance, and Crime Issues Katja Eman, Gorazd Meško, Lorenzo Segato, Massimo Migliorini, 2020-07-23 This book provides an overview of crimes involving

water including pollution illegal dumping and supply chain disruption from a criminological perspective It examines a multifaceted issue from a comparative policy perspective supplemented with individual case studies to provide insights on the magnitude of the problem as well as possible solutions and policy recommendations As growing populations and economic sectors continue to put unprecedented pressures on water supplies the book aims to contribute to a better understanding of the problem in order to ensure the sustainability long term viability and equitable use of this essential resource The first part of the volume examines criminological and policy perspectives including an overview of regulatory approaches privatization of water resources and the scope of the criminal problem in this area The second part presents informative case studies from a variety of different regional and social contexts Finally the editors present an outlook in policy and enforcement improvements This work will be of interest to researchers in criminology criminal justice public policy and comparative law as well as those studying environmental regulations and sustainability Water Governance and Crime Issues is a much needed addition to the growing original contributions of green criminology This volume captures the complex landscape of water crimes including the numerous disparities and inequalities of there being too much water in some places and too little in others amongst the many complexities The edited collection also covers conceptual issues i e water as a human right as well as practical hurdles i e the challenges in keeping statistics on offences and real world examples Many of the chapters are likely to introduce readers to new issues and the interplay with a myriad of traditional problems corruption organised crime privatisation and terrorism I agree with the editors and authors that water crime issues deserve further scientific study and this provides a solid starting point Dr Tanya Wyatt University of Northumbria Population growth and urbanization more frequent droughts due to climate change the privatization of and unequal access to water resources and increasing water pollution are just some of the contemporary and future challenges relating to water crimes Water Governance and Crime Issues speaks to the scientific relevance of water for green criminology as well as the policy implications of water crimes Several of the cases in this edited book refer to countries and regions we do not usually hear about and yet are perfect illustrations of the challenges faced in governing and studying water crimes Dr Lieselot Bisschop Erasmus School of Law

Public Banks and Public Water in the Global South Thomas Marois, David A.

McDonald, Susan Spronk, 2024-12-05 This volume presents the first systematic review of public bank lending in the water sector in the Global South Many public banks have an explicit mandate to finance public water management yet despite a resurgence of interest in public banks and the role they can play in sustainable development their role in funding water management has been largely ignored Drawing on case studies from Asia Africa and Latin America this book measures the scale and nature of interaction between public banks and public water operators for the provision of safe drinking water and sanitation It identifies challenges and opportunities for deeper engagement between public banks and public water operators in the Global South and highlights promising practices showcasing how these might be transferred to different regions and

different sectors Each case study is based on in depth interviews with public banks that have funded public water operators and public water operators that have borrowed from public banks including Banco Popular in Costa Rica the Development Bank of the Philippines the National Bank for Agricultural and Rural Development in India and the TIB Development Bank in Tanzania Overall this book provides a critical analysis of the potential of public banks to address global water security issues This book will be of great interest to students and scholars of water resource management water and health sanitation and sustainable development It will also be of interest to professionals and policymakers working with public and development banks in the supply of safe water and sanitation for all The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Public Budgeting Systems Robert D. Lee Jr., Ronald W. Johnson, Philip G. Joyce, 2020-10-12 Public Budgeting Systems Tenth Edition is the most comprehensive and balanced treatment of the current state of budgeting throughout all levels of the United States government Current and prospective public managers accordingly often succeed or fail in their careers based in large part on whether they are intelligent consumers of financial data and have an adequate understanding of the budget process By providing a detailed overview of all budgeting and financial management the book enables students to gain an appropriate understanding of a complex topic

Empty Buckets and Overflowing Pits Roland Werchota, 2020-01-01 This book provides a multi level and multi dimensional insight into urban water and sanitation development by analyzing sector reforms in Africa With the recent events in mind water shortages in Cape Town widespread cholera in Haiti mass migration from low income countries etc it elaborates a pressing topic which is directly linked to the precarious living conditions of the urban poor in the developing countries It is urgent to acknowledge the proposed findings and recommendations of the book which will help to improve the situation of potential refugees in their home countries with a realistic vision for the development of the most basic of all life supporting services So many efforts to reverse the negative trend in water and sanitation development have failed or targets have been repeatedly missed by far without notable consequences for decision makers on different levels and institutions It has unnecessarily consumed many young lives contributed to keep billions in poverty until today and fostered discrimination of women The knowledge gap and the confusion in the sector lined out in the book becomes evident when a national leader in a low income country declares a state of emergency in urban water and sanitation while at the same time global monitoring publishes an access figure for urban water of over 90% for the same country It is time to change this with an effective sector development concept for our partner countries and a more realistic discourse on global level The book argues for a sweeping rethinking and combines extended local knowledge lessons learned from history in advanced countries and thorough research on reforms in Francophone and Anglophone developing countries This was possible because the writer was working in Sub Saharan partner countries for almost 30 years as an integrated long term advisor in different sector institutions ministry regulator financing basket and

different sizes of utilities and had the opportunity to cooperate closely with the main development partners The reader has the opportunity to obtain a comprehensive understanding of how the sector works and sector institutions in low income countries function and can discover the reasons behind success and failures of reforms The book also covers issues which have a significant influence on urban water and sanitation development but are hardly the subject of discussions It helps to make the shortcomings of the water and sanitation discourse more apparent and assist institutions to move beyond their present perceptions and agendas All of this makes the book different from other literature about urban water and sanitation in the developing world
