Ways Of Worldmaking Ways Of Worldmaking:

Ways of Worldmaking Nelson Goodman,1978-01-01 Provides a workable notion of the kinds of skills and capacities that are central for those who work in the arts

Cultural Ways of Worldmaking Vera Nünning,Ansgar Nünning,Birgit Neumann,2010-06-29 Taking as its point of departure Nelson Goodman s theory of symbol systems as delineated in his seminal book Ways of Worldmaking this volume gauges the possibilities and perspectives offered by the worldmaking approach as a model for the study of culture Its main objectives are to explore the usefulness and scope of the approach for the study of culture and to supplement Goodman s philosophy of worldmaking with a number of complementary disciplinary perspectives literary and cultural approaches and new questions and applications It focuses on three key issues or concepts which illuminate ways of worldmaking and their interdisciplinary relevance and ramifications viz 1 theoretical approaches to ways of worldmaking 2 the impact of media on ways of worldmaking and 3 narratives as ways of worldmaking The volume serves to demonstrate how specific media and narratives affect the worlds that are created and shows how these worlds are established as socially relevant It also illustrates the extent to which ways of worldmaking are imbued with cultural values and thus inevitably implicated in power relations

Varieties of World-making Nathalie Karagiannis,Peter Wagner,2007-01-01 Drawn from the elite ranks of sociology law international relations political philosophy and history this book cuts through polarized rhetoric to examine the global situation It proposes that the contemporary global network of business politics and culture be viewed from the inter disciplinary perspective of world making

Narratology in the Age of Cross-disciplinary Narrative Research Sandra Heinen,Roy Sommer,2009 Narrative Research has developed into an international and interdisciplinary field This volume collects fifteen essays which look at narrative and narrativity from various perspectives including literary studies and hermeneutics cognitive theory and creativity research metaphor studies and film theory and intermediality

Against Relativism James Franklin Harris,1992 Recent decades have witnessed the extraordinary growth of radical relativism a doctrine which now dominates the entire culture from popular music to journalism and from religion to school curricula According to the radical relativist creed any proposition can be true or false in relation to a chosen framework the evaluation of fundamental theories or paradigms is beyond argument there are no universal standards of rationality and methodologically Anything goes As James Harris explains in Against

Relativism the new relativism undoes the work of the Enlightenment and inevitably leads to the conclusion that Galileo was wrong to insist that the Earth indeed moves Success for relativism has come from many philosophical schools both Analytic and Continental Among the sources of the new relativism are the collapse of Logical Positivism and the shift within anthropology from a linear evolutionary model to numerous models for understanding human culture In this detailed critique Professor Harris has selected the strongest and most plausible arguments for relativism within contemporary academic philosophy He turns the techniques of relativism against relativism itself showing that it is ultimately self refuting or otherwise ineffectual He demonstrates that Quine s rejection of the analytic synthetic distinction appeals to the very analytic truths Quine tries to dispel that Kuhn s celebrated account of paradigms must be either self refuting or unintelligible that Rorty cannot avoid presupposing the epistemological principles he attacks and that although feminist criticisms of science exert a welcome corrective attempts to develop a distinctively feminist science are misconceived and unhelpful to feminism In all these discussions the author explains the arguments he is criticizing for the benefit of the non specialist reader so that this work can serve as a partisan but fair introduction to some of the most important of present day philosophy The Art of World-Making Harry Gould, 2017-06-26 On its face The Art of World Making focuses on honouring the career of Nicholas Greenwood Onuf and his contributions to the study of international relations of equal importance however while using Onuf s work as their touchstone the contributions to this volume range widely across IR theory making important interventions in some of the most important topics in the field today The volume considers the place of Constructivism and Republicanism in the field of international relations and the contestation that accompanies the question of their place in the field asking What explains the dominance of some forms of Constructivism and the relative lack of influence of other forms What can rule oriented Constructivism the focus here provide our field that other forms of Constructivism have been unable to Into what new and productive directions can Constructivism be taken What are its gaps and what are the resources to remedy those gaps What can Republicanism tell us about ongoing issues in international law global governance liberalism and crisis Drawing together essays from some of the leading scholars in the field space is given after each chapter for a detailed and highly personal response piece to each contribution written by Onuf This unique volume will be essential reading for students and scholars of international relations **Theories and Things** Willard Van Orman Quine, 1981 Here are the most recent writings some of them unpublished of the preeminent philosopher of our time Quine is always whatever his subject an elegant writer witty precise and forceful Admirers of his earlier books will welcome this new volume *Teen Boys and their Smartphones as Worldmaking Devices* John Magnus R. Dahl, 2025-07-16 This book is about how teen boys use their smartphones to create a world for themselves and their peers Based on an ethnographic fieldwork spanning two years and following six teenage boys on and offline the book investigates what kind of worlds these boys are making and how It explores the ways in which teen boys connect with other people and express themselves how they gain agency and make

shared worlds It also asks to what extent this worldmaking is shaped by the opportunities and constraints of technology as well as by social and cultural patterns and the individual existential projects of its creators A key finding of the book is how smartphone technology offers boys belonging to an ethnocultural or sexual minority new opportunities and agency This book sheds much needed light on how the smartphone impacts teenage lives and breaks new ground with its focus on boys and by introducing the worldmaking perspective inspired by the thinking of Hannah Arendt to the study of digital lives
